

September 2021 Update on *Louis XVI*

Site visits by three conservators were completed in June. Metro staff has received reports from each of the three conservators which include the following:

- Condition assessment
- Treatment recommendations/proposals, including cleaning and structural repairs
- Cost estimates
- Precedents
- Ethical and conceptual concerns

Recommendations vary amongst the three vendors. Cost estimates, where provided, range up to \$71,000. Based on the reports, there are additional costs beyond what is estimated for conservation treatments, that will depend upon any potential re-siting of the artwork. Plans for re-siting the artwork have not yet been determined.
