ADDICTION IS THE ONLY
PRISON WHERE THE LOCKS
ARE ON THE INSIDE

**Did opiates
or alcohol
get you
here today?**

We are here to help!

Pathway Advocacy and Alliances for Community Treatment (PA2CT) is a program at the jail offering the Vivitrol® (Naltrexone) injection, which is a form of Medication Assisted Treatment (MAT) for people that are addicted to opiates (heroin, fentanyl, morphine, pain pills) or alcohol. If you are interested, please ask your attorney or public defender to send a referral to the PA2CT program coordinator to interview you for the program. If eligible, you will receive your first injection before you are released and will have an appointment for second injection scheduled with a community provider.

What is Vivitrol®?

- Vivitrol® is an injection that is received once a month that blocks the brain from being able to experience the euphoria (high, buzz, drunk, etc.) produced when using opiates and alcohol. Vivitrol® also reduces cravings to use opiates and alcohol. Vivitrol® is not a narcotic and not habit forming. Vivitrol® is used to help support abstinence from opiates and alcohol while attending counseling or other forms of substance abuse treatment. ¹

¹ Vivitrol.com. (2019). What is Vivitrol?. Retrieved from <https://www.vivitrol.com/opioid-dependence/what-is-vivitrol>

How does the Vivitrol® process work at the jail?

- A PA2CT program social worker will assess you to see if you are appropriate to receive Vivitrol®
- Medical will then determine your eligibility to receive Vivitrol® based on lab results
- If you are cleared by medical, you can receive the injection before you are released
- You will take a urine drug screen to make sure you have no drugs in your system before receiving the injection (You must be free of opioids or alcohol for 7-10 days or you may be put into immediate withdrawal symptoms)
- Medical staff will give you a pill form of Vivitrol® to test if you have any allergic reaction to the medication
- If no reaction is had from the pill form of Vivitrol®, you will then receive the Vivitrol® injection

3 easy steps

- 1. You have to be mentally ready**
- 2. You have to be medically ready**
- 3. You have to show no allergic reaction to the medication**

- Contact your attorney or public defender to send a referral for your interest in the Vivitrol® program
- The Vivitrol® program will not decrease your time to serve. It is a tool to aide you in recovering from opioid and alcohol addiction
- Vivitrol® only works for treating people with an addiction to opiates or alcohol
- If you have an addiction to drugs other than opiates or alcohol, the agencies included on the back of this brochure can help you find resources to help aide in your substance abuse recovery
- If you do not receive the Vivitrol® injection while incarcerated, you can receive the injection in the community. Agencies providing Vivitrol® services are included on the back of this brochure
