

WEBVTT

1 "Harward, Sonya" (457645056)
00:12:35.819 --> 00:12:41.579
Oh, it was so okay.

2 "Harward, Sonya" (457645056)
00:13:24.524 --> 00:13:24.734
Okay.

3 "Harward, Sonya" (457645056)
00:13:37.409 --> 00:13:47.999
Oh, uh.

4 "Harward, Sonya" (457645056)
00:13:56.069 --> 00:14:02.819
The water.

5 "Harward, Sonya" (457645056)
00:14:02.819 --> 00:14:08.159
Oh, wow.

6 "Harward, Sonya" (457645056)
00:14:16.859 --> 00:14:25.169
The next meeting.

7 "Harward, Sonya" (457645056)
00:14:45.169 --> 00:14:48.959
Oh.

8 "Harward, Sonya" (457645056)
00:14:48.959 --> 00:15:01.589
Hello.

9 "Harward, Sonya" (457645056)
00:15:14.249 --> 00:15:22.679
Yes.

10 "Harward, Sonya" (457645056)
00:15:26.639 --> 00:15:34.649
So, here's the see this week.

11 "Harward, Sonya" (457645056)
00:15:34.649 --> 00:15:40.259
Sure, so you can see.

12 "Harward, Sonya" (457645056)
00:15:40.259 --> 00:15:51.929
So.

13 "Harward, Sonya" (457645056)
00:15:51.929 --> 00:15:59.279
Send it.

14 "Harward, Sonya" (457645056)
00:15:59.279 --> 00:16:05.879

And so I think there were a couple of boys who were so Abby said excited about being.

15 "Harward, Sonya" (457645056)
00:16:05.879 --> 00:16:10.919
They have their full page.

16 "Harward, Sonya" (457645056)
00:16:10.919 --> 00:16:16.709
Hello.

17 "Harward, Sonya" (457645056)
00:16:16.709 --> 00:16:22.589
Okay.

18 "Harward, Sonya" (457645056)

00:16:22.589 --> 00:16:27.029
You can travel? No, no, no.
19 "Harward, Sonya" (457645056)
00:16:27.029 --> 00:16:32.159
From high.
20 "Harward, Sonya" (457645056)
00:16:32.159 --> 00:16:37.529
As a privilege that.
21 "Harward, Sonya" (457645056)
00:16:37.529 --> 00:16:42.569
So, if.
22 "Harward, Sonya" (457645056)
00:16:42.569 --> 00:16:46.139
There is no, um.
23 "Harward, Sonya" (457645056)
00:16:46.139 --> 00:16:52.589
I'm very happy to do something like that. Yeah Yeah.
24 "Harward, Sonya" (457645056)
00:16:52.589 --> 00:17:00.419
You got to see it. Okay.
25 "Harward, Sonya" (457645056)
00:17:00.419 --> 00:17:06.329
System.
26 "Harward, Sonya" (457645056)
00:17:06.329 --> 00:17:11.009
To do some.
27 "Harward, Sonya" (457645056)
00:17:11.009 --> 00:17:15.329
Sitting smarter.
28 "Harward, Sonya" (457645056)
00:17:15.329 --> 00:17:19.079
So that is something that.
29 "Harward, Sonya" (457645056)
00:17:19.079 --> 00:17:24.179
It's for an environment that's the providers.
30 "Harward, Sonya" (457645056)
00:17:24.179 --> 00:17:31.889
And it goes from Sweden.
31 "Harward, Sonya" (457645056)
00:17:35.549 --> 00:17:40.889
Just here yeah. Okay.
32 "Harward, Sonya" (457645056)
00:17:40.889 --> 00:17:47.939
Yeah.
33 "Harward, Sonya" (457645056)
00:17:47.939 --> 00:17:51.839
See, so.
34 "Harward, Sonya" (457645056)
00:17:51.839 --> 00:17:57.029
So.
35 "Harward, Sonya" (457645056)
00:17:57.029 --> 00:18:04.139
Okay.
36 "Harward, Sonya" (457645056)

00:18:04.139 --> 00:18:07.259
Thanks.
37 "Harward, Sonya" (457645056)
00:18:07.259 --> 00:18:12.749
Hello.
38 "Harward, Sonya" (457645056)
00:18:12.749 --> 00:18:18.599
Now, let me.
39 "Harward, Sonya" (457645056)
00:18:18.599 --> 00:18:23.489
You.
40 "Harward, Sonya" (457645056)
00:18:27.029 --> 00:18:30.659
It's a question.
41 "Harward, Sonya" (457645056)
00:18:30.659 --> 00:18:35.489
Somebody.
42 "Harward, Sonya" (457645056)
00:18:35.489 --> 00:18:39.779
It will be some numbers here.
43 "Harward, Sonya" (457645056)
00:18:39.779 --> 00:18:43.949
All right. Bye.
44 "Harward, Sonya" (457645056)
00:18:43.949 --> 00:18:49.799
Come back, so we see.
45 "Harward, Sonya" (457645056)
00:18:49.799 --> 00:18:55.259
Hello.
46 "Harward, Sonya" (457645056)
00:18:55.259 --> 00:18:58.439
Question 1 day.
47 "Harward, Sonya" (457645056)
00:18:58.439 --> 00:19:03.119
It's always like that.
48 "Harward, Sonya" (457645056)
00:19:03.119 --> 00:19:06.509
That's awesome.
49 "Harward, Sonya" (457645056)
00:19:06.509 --> 00:19:10.829
Oh.
50 "Harward, Sonya" (457645056)
00:19:10.829 --> 00:19:19.739
Research finds individual ones. How many of the, uh.
51 "Harward, Sonya" (457645056)
00:19:19.739 --> 00:19:27.179
I think so.
52 "Harward, Sonya" (457645056)
00:19:27.179 --> 00:19:32.069
All right. Okay.
53 "Harward, Sonya" (457645056)
00:19:32.069 --> 00:19:36.479
Hello.
54 "Harward, Sonya" (457645056)

00:19:36.479 --> 00:19:40.589
But.
55 "Harward, Sonya" (457645056)
00:19:40.589 --> 00:19:46.409
Yeah, you know, I mean.
56 "Harward, Sonya" (457645056)
00:19:46.409 --> 00:19:50.429
There are, but definitely.
57 "Harward, Sonya" (457645056)
00:19:50.429 --> 00:19:55.439
Okay, that's fine. Okay.
58 "Harward, Sonya" (457645056)
00:19:55.439 --> 00:20:02.879
I noticed that, uh, of the, uh, the.
59 "Harward, Sonya" (457645056)
00:20:06.329 --> 00:20:09.389
Saturday.
60 "Harward, Sonya" (457645056)
00:20:09.389 --> 00:20:15.659
That's pretty good.
61 "Harward, Sonya" (457645056)
00:20:21.839 --> 00:20:25.229
My favorite.
62 "Harward, Sonya" (457645056)
00:20:25.229 --> 00:20:31.859
Like, 611.
63 "Harward, Sonya" (457645056)
00:20:31.859 --> 00:20:37.919
It's not a big.
64 "Harward, Sonya" (457645056)
00:20:37.919 --> 00:20:43.889
Day.
65 "Harward, Sonya" (457645056)
00:20:43.889 --> 00:20:47.729
Pretty.
66 "Harward, Sonya" (457645056)
00:20:47.729 --> 00:20:51.209
And so that.
67 "Harward, Sonya" (457645056)
00:20:51.209 --> 00:20:59.009
Honestly, the tools for me.
68 "Harward, Sonya" (457645056)
00:20:59.009 --> 00:21:05.699
Oh, yeah.
69 "Harward, Sonya" (457645056)
00:21:05.699 --> 00:21:10.949
Okay.
70 "Harward, Sonya" (457645056)
00:21:10.949 --> 00:21:19.829
Hello.
71 "Harward, Sonya" (457645056)
00:21:24.899 --> 00:21:31.139
Thank you for the.
72 "Harward, Sonya" (457645056)

00:21:31.139 --> 00:21:34.589
But let me know about it.
73 "Harward, Sonya" (457645056)
00:21:34.589 --> 00:21:39.149
1 question, I think.
74 "Harward, Sonya" (457645056)
00:21:39.149 --> 00:21:45.299
To figure it out and that's definitely they wouldn't be there. Maybe.
75 "Harward, Sonya" (457645056)
00:21:45.299 --> 00:21:52.049
Hey, you know.
76 "Harward, Sonya" (457645056)
00:21:52.049 --> 00:21:59.129
Uh, brand associated in doing that.
77 "Harward, Sonya" (457645056)
00:21:59.129 --> 00:22:02.219
I just I, I.
78 "Harward, Sonya" (457645056)
00:22:02.219 --> 00:22:13.079
But so all these brands, but essentially canada's 1.
79 "Harward, Sonya" (457645056)
00:22:13.079 --> 00:22:16.079
That's my, I'm just wondering.
80 "Harward, Sonya" (457645056)
00:22:16.079 --> 00:22:21.989
Hello.
81 "Harward, Sonya" (457645056)
00:22:33.389 --> 00:22:37.559
Oh, man.
82 "Harward, Sonya" (457645056)
00:22:37.559 --> 00:22:43.799
That's the secret.
83 "Harward, Sonya" (457645056)
00:22:43.799 --> 00:22:50.519
And the group of developer.
84 "Harward, Sonya" (457645056)
00:22:50.519 --> 00:23:00.689
Sounded like.
85 "Harward, Sonya" (457645056)
00:23:00.689 --> 00:23:04.409
That's right.
86 "Harward, Sonya" (457645056)
00:23:04.409 --> 00:23:09.389
Cool.
87 "Harward, Sonya" (457645056)
00:23:09.389 --> 00:23:12.929
Oh, yeah.
88 "Harward, Sonya" (457645056)
00:23:12.929 --> 00:23:17.999
Hello.
89 "Harward, Sonya" (457645056)
00:23:17.999 --> 00:23:23.609
Okay.
90 "Harward, Sonya" (457645056)

00:23:35.009 --> 00:23:39.659
Oh, okay.
91 "Harward, Sonya" (457645056)
00:23:45.149 --> 00:23:50.249
Hello.
92 "Harward, Sonya" (457645056)
00:23:50.249 --> 00:23:57.479
Hello.
93 "Harward, Sonya" (457645056)
00:24:00.869 --> 00:24:09.869
Hello.
94 "Harward, Sonya" (457645056)
00:24:12.929 --> 00:24:16.229
Oh.
95 "Sean Dreisbach" (4074146816)
00:24:25.409 --> 00:24:33.029
Hello.
96 "Harward, Sonya" (457645056)
00:24:51.414 --> 00:24:51.864
Nope.
97 "Harward, Sonya" (457645056)
00:24:53.029 --> 00:24:59.189
Yep.
98 "Harward, Sonya" (457645056)
00:24:59.189 --> 00:25:06.539
Project is well, she has money is.
99 "Harward, Sonya" (457645056)
00:25:06.539 --> 00:25:10.649
It's the.
100 "Harward, Sonya" (457645056)
00:25:10.649 --> 00:25:14.219
Okay.
101 "Harward, Sonya" (457645056)
00:25:14.219 --> 00:25:18.179
Yes.
102 "Harward, Sonya" (457645056)
00:25:18.179 --> 00:25:22.829
So a lot of different, so we know.
103 "Harward, Sonya" (457645056)
00:25:22.829 --> 00:25:32.249
Well, so they said, well, we need to go out project the location of the
project, or the project manager.
104 "Harward, Sonya" (457645056)
00:25:32.249 --> 00:25:36.299
It's not a true location on the client.
105 "Harward, Sonya" (457645056)
00:25:36.299 --> 00:25:41.999
I don't want to speak a lot of work on.
106 "Harward, Sonya" (457645056)
00:25:41.999 --> 00:25:45.419
And I'll send it to you, I'm just going to, except those projects.
107 "Harward, Sonya" (457645056)
00:25:48.899 --> 00:25:54.449
Absolutely positive. Or we did.

108 "Harward, Sonya" (457645056)
00:25:54.449 --> 00:25:58.499
Oh, wow.

109 "Harward, Sonya" (457645056)
00:25:58.499 --> 00:26:03.599
He must have been.

110 "Harward, Sonya" (457645056)
00:26:03.599 --> 00:26:09.059
Hello.

111 "Sean Dreisbach" (4074146816)
00:26:09.059 --> 00:26:14.159
Sure.

112 "Mike Nemes" (840296192)
00:26:14.159 --> 00:26:19.169
1.

113 "Mike Nemes" (840296192)
00:26:19.169 --> 00:26:22.529
Hello.

114 "Harward, Sonya" (457645056)
00:26:22.529 --> 00:26:29.159
I know you are.

115 "Mike Nemes" (840296192)
00:26:29.159 --> 00:26:36.329
The experience.

116 "Harward, Sonya" (457645056)
00:26:36.329 --> 00:26:39.899
Now.

117 "Harward, Sonya" (457645056)
00:26:39.899 --> 00:26:44.009
Bye.

118 "Harward, Sonya" (457645056)
00:26:44.009 --> 00:26:48.839
Hey, Sarah.

119 "Harward, Sonya" (457645056)
00:26:48.839 --> 00:26:56.669
I, I mean, I know your name.

120 "Harward, Sonya" (457645056)
00:26:56.669 --> 00:27:04.049
Oh, there's nothing on this.

121 "Harward, Sonya" (457645056)
00:27:04.049 --> 00:27:09.719
There you go.

122 "Harward, Sonya" (457645056)
00:27:09.719 --> 00:27:13.769
Um, can we set up too?

123 "Harward, Sonya" (457645056)
00:27:13.769 --> 00:27:18.899
Because there's people online. Yeah. Can you share it? Thank you. Yeah.

124 "Harward, Sonya" (457645056)
00:27:18.899 --> 00:27:32.519
So you'll just, but it's time you'll just and share and then it'll open
up both things. So ones at the top here ones at the top there, and
they're in PDF. Oh, gotcha. And if you'll do.

125 "Harward, Sonya" (457645056)

00:27:32.519 --> 00:27:35.639
If you'll do view and then full, because.
126 "Harward, Sonya" (457645056)
00:27:35.639 --> 00:27:42.659
Full screen mode, because then it's a bigger picture for her here.
Otherwise it's not a very big for us in here.
127 "Harward, Sonya" (457645056)
00:27:42.659 --> 00:27:50.159
Why don't you just leave that there? Because it'll be 1st then I don't
have to think. Oh, that's Bill's. I get the other 1 and that's fine.
128 "Harward, Sonya" (457645056)
00:27:50.159 --> 00:27:59.009
That one's me, we'll just leave it. There you go. And you said this Mike
is always love is always on.
129 "Harward, Sonya" (457645056)
00:27:59.009 --> 00:28:04.019
Oh, he's on I kind of hear the feedback. Yeah.
130 "Harward, Sonya" (457645056)
00:28:04.524 --> 00:28:04.614
Okay.
131 "Mike Nemes" (840296192)
00:28:44.429 --> 00:28:48.719
Okay.
132 "Mike Nemes" (840296192)
00:29:23.219 --> 00:29:26.489
Hello.
133 "Mike Nemes" (840296192)
00:29:34.619 --> 00:29:45.689
So, I think we've got enough numbers here and online to, uh.
134 "Harward, Sonya" (457645056)
00:29:45.689 --> 00:29:52.019
I begin the meeting so do you want to call the row? Please.
135 "Harward, Sonya" (457645056)
00:29:52.019 --> 00:29:57.359
Representative Jason name is Co chair Earl Jones.
136 "Harward, Sonya" (457645056)
00:29:57.359 --> 00:30:04.469
Oh, I'm sorry I'm sorry. Sorry Jones Senator Neil.
137 "GNeal2" (1437490432)
00:30:04.469 --> 00:30:11.549
Here sent it to her Julie, Rocky Adams.
138 "Harward, Sonya" (457645056)
00:30:11.549 --> 00:30:18.689
Senator Mike.
139 "Harward, Sonya" (457645056)
00:30:18.689 --> 00:30:23.369
I see him there representative kin Fleming.
140 "Harward, Sonya" (457645056)
00:30:23.369 --> 00:30:27.029
Your representative Pamela Stevenson here.
141 "pamela Stevenson" (2459303936)
00:30:27.029 --> 00:30:33.509
Council member council member Arthur.
142 "Harward, Sonya" (457645056)

00:30:33.509 --> 00:30:38.039

As a council member, Marianne Butler.

143 "Harward, Sonya" (457645056)

00:30:38.039 --> 00:30:41.489

Here, Shelby, William, some of, em.

144 "Shelby Somervell" (2261022976)

00:30:41.489 --> 00:30:44.669

Yeah, it's got Schoenberg.

145 "Harward, Sonya" (457645056)

00:30:44.669 --> 00:30:48.839

Present here, uh, Mayor bonnie's young.

146 "Sean Dreisbach" (4074146816)

00:30:52.349 --> 00:30:59.849

Here Mr. vice chair or a coach here you have a quorum.

147 "Harward, Sonya" (457645056)

00:30:59.849 --> 00:31:05.519

Great well, thank you. So, let's begin the meeting you all were on a call.

148 "Harward, Sonya" (457645056)

00:31:06.294 --> 00:31:19.584

That our last meeting, Mr. combs indicated that he had some additional research to do on the question of, I think expenditures and I understand from the materials he's sent to us that you've, you've done additional work.

149 "Harward, Sonya" (457645056)

00:31:19.614 --> 00:31:25.494

I don't know whether you can say you've completed it, but you certainly done additional work. So maybe we can begin with. You're presenting that to.

150 "Harward, Sonya" (457645056)

00:31:25.519 --> 00:31:35.729

Sure afternoon new number 1. um, we only have, uh, I guess 3 or 4 little topics today not as much as last time.

151 "Harward, Sonya" (457645056)

00:31:35.729 --> 00:31:50.064

Um, but it's some clean up on the paving issue, uh, based on some questions last time. Uh, also we have taken a pass at capital projects, which was raised last time as a question.

152 "Harward, Sonya" (457645056)

00:31:51.084 --> 00:31:54.264

We also were able to get some pretty good.

153 "Harward, Sonya" (457645056)

00:31:54.689 --> 00:32:03.689

Uh, geographically find data from, uh, the public health and wellness department and I'll show you that the utilization of public health.

154 "Harward, Sonya" (457645056)

00:32:03.689 --> 00:32:10.769

And then also, um, the folks over at were able to generate a fiscal years.

155 "Harward, Sonya" (457645056)

00:32:10.769 --> 00:32:24.899

Panel of usage of the bus system and so we can make pretty good estimates of the origin and destination of the bus uses. So those are the topics will pop through here.

156 "Harward, Sonya" (457645056)
00:32:24.899 --> 00:32:27.959
If you'll go to the 4th slide.

157 "Harward, Sonya" (457645056)
00:32:27.959 --> 00:32:34.019
This is an extension of what we showed last time.

158 "Harward, Sonya" (457645056)
00:32:34.019 --> 00:32:39.894
You remember, we were looking at, um, the actual paving dollars spent by parts of town.

159 "Harward, Sonya" (457645056)
00:32:40.254 --> 00:32:53.994
And I think the general conclusion in the group was, it looked to be based upon a very objective professional methodology as far as, um, which streets are paved each year based upon the.

160 "Harward, Sonya" (457645056)
00:32:54.019 --> 00:33:01.559
This a road condition index and so someone asked the question about.

161 "Harward, Sonya" (457645056)
00:33:01.559 --> 00:33:06.899
Okay, this is the geographic distribution of the spending. What about.

162 "Harward, Sonya" (457645056)
00:33:06.899 --> 00:33:09.929
The amount of square footage that's.

163 "Harward, Sonya" (457645056)
00:33:09.929 --> 00:33:20.459
Distributed around the county so, Matt did a great job of pulling all that data back in and calculating the square footage of pavement by part of.

164 "Harward, Sonya" (457645056)
00:33:20.459 --> 00:33:29.219
The county, and so there is a summary of the distribution of paving in terms of square footage. You can see.

165 "Harward, Sonya" (457645056)
00:33:29.219 --> 00:33:34.769
The last 2 fiscal years that have been programmed, it's pretty stable.

166 "Harward, Sonya" (457645056)
00:33:34.769 --> 00:33:45.149
Urban service district 43% up to 48, um, unincorporated 54% down to 48%.

167 "Harward, Sonya" (457645056)
00:33:45.149 --> 00:33:50.699
The suburban areas, it's a, it's a very small number of the suburban cities.

168 "Harward, Sonya" (457645056)
00:33:50.699 --> 00:34:00.479
But remember they get separate road money from the state to do their streets. So, Metro public works only does like.

169 "Harward, Sonya" (457645056)
00:34:00.479 --> 00:34:11.969
Um, highways or major roads, like bardstown road, say that goes through a city. They cover that, but the streets in the neighborhoods are covered by these suburban cities.

170 "Harward, Sonya" (457645056)
00:34:11.969 --> 00:34:20.429

And then the 2nd slide on paving, um, Matt has organized this bot.

171 "Harward, Sonya" (457645056)

00:34:20.429 --> 00:34:27.839

A total square feet of surfaces out there that need to be worried about and, um.

172 "Harward, Sonya" (457645056)

00:34:27.864 --> 00:34:42.444

Looked at the, uh, what's called the paving condition index that public works uses to prioritize their paving schedule and you can see over on the the very last column. This is the average road condition.

173 "Harward, Sonya" (457645056)

00:34:42.444 --> 00:34:47.274

Basically the score from 0 to 100. so 0 means. means

174 "Harward, Sonya" (457645056)

00:34:47.839 --> 00:34:57.749

You have the worst roads 100 means you have the best roads, or the best condition of roads, urban service district.

175 "Harward, Sonya" (457645056)

00:34:57.749 --> 00:35:01.589

Has the worst condition in this now? It's.

176 "Harward, Sonya" (457645056)

00:35:01.589 --> 00:35:15.324

The, the county average is 71 and urban service district 69 it's not a dramatic difference. And what people have told me is because of a large bond issue back in 2017. I think, uh, we basically doubled, uh.

177 "Harward, Sonya" (457645056)

00:35:15.894 --> 00:35:18.834

uh we basically doubled uh

178 "Harward, Sonya" (457645056)

00:35:19.199 --> 00:35:26.009

Yeah, see some of the council members nodding, you know, the story better better than me. There was basically a doubling of our paving budget.

179 "Harward, Sonya" (457645056)

00:35:26.009 --> 00:35:39.389

Supported by a 10 year plan, using this road condition index and so we've gotten caught up, I think is a fair thing to say about our road roads.

180 "Harward, Sonya" (457645056)

00:35:39.389 --> 00:35:44.879

So, anyway, this is just in response to some questions we had last time.

181 "Harward, Sonya" (457645056)

00:35:51.869 --> 00:35:57.089

Sorry, uh, there's the department, this top work habits have a.

182 "Harward, Sonya" (457645056)

00:35:57.089 --> 00:36:02.699

A number that that is determined to indicate what is good.

183 "Harward, Sonya" (457645056)

00:36:02.699 --> 00:36:08.009

I see these numbers here, but what does it mean 53 on a scale of what.

184 "Harward, Sonya" (457645056)

00:36:08.009 --> 00:36:11.849

Oh, see the footnote. Um, so.

185 "Harward, Sonya" (457645056)

00:36:11.849 --> 00:36:21.749

It's a scale of 0 to 100. so a 100 would be your roads or impeccable?
They're brand. New are freshly paved.

186 "Harward, Sonya" (457645056)
00:36:21.749 --> 00:36:27.869
And 0 means that are falling apart and so, but but not really all that great.

187 "Harward, Sonya" (457645056)
00:36:27.869 --> 00:36:33.479
We're not doing that great. Well, I mean, if these numbers are in the fifties.

188 "Harward, Sonya" (457645056)
00:36:33.479 --> 00:36:40.679
Some of the council members could answer this better than me because you all are in this every year.

189 "Harward, Sonya" (457645056)
00:36:40.679 --> 00:36:47.489
We're trying to understand if the if the, if the scale of road conditions is 0 to 100.

190 "Harward, Sonya" (457645056)
00:36:47.489 --> 00:36:50.699
And I think these numbers are indicating that that.

191 "Harward, Sonya" (457645056)
00:36:50.699 --> 00:36:56.819
Or, at least all of the areas that's in the fifties what does that mean?

192 "Harward, Sonya" (457645056)
00:36:56.819 --> 00:37:00.149
If if it's in the fifties, that's the condition of the road.

193 "Harward, Sonya" (457645056)
00:37:00.149 --> 00:37:09.329
Yes, but that would say that they're what average that they're no, they're, they're unfortunately or 50 50 needs to be paved.

194 "Harward, Sonya" (457645056)
00:37:09.329 --> 00:37:19.139
Anything like, 55 and below is what, you know, the rational for doing that for doing starting, you know, those get done. 1st.

195 "Harward, Sonya" (457645056)
00:37:19.139 --> 00:37:22.859
Yeah.

196 "Harward, Sonya" (457645056)
00:37:26.159 --> 00:37:39.119
Okay, so public health and Dell there, send us a very rich data on their clients and the usage across their clinics.

197 "Harward, Sonya" (457645056)
00:37:39.119 --> 00:37:44.579
Um, inside the county and again, Matt, our was.

198 "Harward, Sonya" (457645056)
00:37:44.579 --> 00:37:48.869
Uh, organized all that into these 3 geographies. We're interested in.

199 "Harward, Sonya" (457645056)
00:37:48.869 --> 00:38:00.809
And if you just look at the bottom, right hand corner, there's kind of the punch line across all of those services 37% to residents of the urban service district.

200 "Harward, Sonya" (457645056)

00:38:00.809 --> 00:38:05.489
10% suburban cities and 42%.
201 "Harward, Sonya" (457645056)
00:38:05.489 --> 00:38:11.670
Unincorporated areas with another 10 and a half percent to people that
are not residents of the county.
202 "Harward, Sonya" (457645056)
00:38:11.670 --> 00:38:20.430
So, it's not exactly, but compared to some other things we've looked at,
I would say it's roughly proportional to the population in these areas.
203 "Harward, Sonya" (457645056)
00:38:20.430 --> 00:38:25.740
So, I, you know, it was not a, um, I don't think there's any.
204 "Harward, Sonya" (457645056)
00:38:25.740 --> 00:38:30.630
Anything worth getting too excited about it. It looks like it's a.
205 "Harward, Sonya" (457645056)
00:38:30.630 --> 00:38:37.500
Pretty well distributed set of services and then this next chart just
shows you the.
206 "Harward, Sonya" (457645056)
00:38:37.500 --> 00:38:51.990
The general fund support, you can go back for a moment to the trip. The
1st, 1 on wellness. You mentioned, uh, who who pays for the, the, uh, non
resident where do the funds come from to support that? Well, we do.
207 "Harward, Sonya" (457645056)
00:38:51.990 --> 00:39:02.580
So that it comes out of our budget, and there are certain now, to what
extent they can charge insurance companies, Medicaid. I don't know.
208 "Harward, Sonya" (457645056)
00:39:02.580 --> 00:39:09.180
But, I don't know, but there's no, there's no support from the state for
example, for that. I don't know.
209 "Harward, Sonya" (457645056)
00:39:09.180 --> 00:39:15.930
Does anybody know the answer to that? Thank you.
210 "Harward, Sonya" (457645056)
00:39:15.930 --> 00:39:30.205
I was assuming that this is just paid for out of our general fund and if
somebody needs a service, and they walk into a clinic, they get served.
If you're from bullet County, Shelby County, southern Indiana. You get
served.
211 "Harward, Sonya" (457645056)
00:39:31.020 --> 00:39:36.300
That's my assumption, but I'm not positive.
212 "Harward, Sonya" (457645056)
00:39:36.300 --> 00:39:40.200
You can see if you want to look at the employment history, you can see
the.
213 "Harward, Sonya" (457645056)
00:39:40.200 --> 00:39:44.400
The spike up there for Calvin and through.
214 "Harward, Sonya" (457645056)
00:39:44.400 --> 00:39:49.620

Um, through this last fiscal year, it's at a pretty high level.
215 "Harward, Sonya" (457645056)
00:39:49.620 --> 00:39:53.400
Compared to what it was, you know, 5 or 6 years ago.
216 "Harward, Sonya" (457645056)
00:39:53.400 --> 00:39:57.480
And then on the left, you'll see the general fund support.
217 "Harward, Sonya" (457645056)
00:39:57.480 --> 00:40:00.810
So, there are a lot of federal grants.
218 "Harward, Sonya" (457645056)
00:40:00.810 --> 00:40:03.930
7.6000.
219 "Harward, Sonya" (457645056)
00:40:03.930 --> 00:40:07.770
And by the way this did clear up the issue of.
220 "Harward, Sonya" (457645056)
00:40:07.770 --> 00:40:20.550
How the, um, the corrections department provides medical care it turns out that, um, the city funnels the money. It's, uh, what is it?
8.4Million dollars.
221 "Harward, Sonya" (457645056)
00:40:20.550 --> 00:40:26.220
Through, uh, public health to then provide the medical services for corrections.
222 "Harward, Sonya" (457645056)
00:40:26.220 --> 00:40:35.220
So, that that was a mystery until we got this data, and they showed us their annual report and explained it.
223 "Harward, Sonya" (457645056)
00:40:38.760 --> 00:40:44.100
Okay, if you're ready, I'll go to park.
224 "Harward, Sonya" (457645056)
00:40:44.100 --> 00:40:51.660
So 1 of the members of the team is a moon lighter Chris bots who actually works for dark and he's their.
225 "Harward, Sonya" (457645056)
00:40:51.660 --> 00:40:57.120
Specialist, and also he's a, a student of maths, and he's really good.
226 "Harward, Sonya" (457645056)
00:40:57.120 --> 00:41:02.400
And he went back for the last fiscal year, fiscal year, 22.
227 "Harward, Sonya" (457645056)
00:41:02.400 --> 00:41:07.440
And looked at boardings and alignments.
228 "Harward, Sonya" (457645056)
00:41:07.440 --> 00:41:14.070
Oh, uh, is that correct? Uh, lightings people getting on the bus people getting off the bus by stop.
229 "Harward, Sonya" (457645056)
00:41:14.070 --> 00:41:17.670
And organize the data, um.
230 "Harward, Sonya" (457645056)
00:41:17.670 --> 00:41:22.380

According to these 3 jurisdictions of interest.

231 "Harward, Sonya" (457645056)

00:41:22.380 --> 00:41:27.180

And you can see, it's pretty dramatic that, um, the urban service district.

232 "Harward, Sonya" (457645056)

00:41:27.180 --> 00:41:31.650

Accounts for 77 of the bus usage.

233 "Harward, Sonya" (457645056)

00:41:31.650 --> 00:41:35.160

Um, suburban said he's 9%.

234 "Harward, Sonya" (457645056)

00:41:35.160 --> 00:41:39.960

Unincorporated 14 and a half. This, this is only.

235 "Harward, Sonya" (457645056)

00:41:39.960 --> 00:41:45.240

Um, for county, let's see. Yeah county.

236 "Harward, Sonya" (457645056)

00:41:45.240 --> 00:41:53.370

This is only county they also have service into southern Indiana that's omitted from this.

237 "Harward, Sonya" (457645056)

00:41:53.370 --> 00:42:05.365

You can see at the top of just reminded you, all of the the White targets funded obviously it gets a tremendous amount of federal money, but it is funded by local occupational taxes and it's pretty, it's, you know,

238 "Harward, Sonya" (457645056)

00:42:05.365 --> 00:42:13.015

over 70Million dollars generated by the occupational tax on wages and the net profits tax on businesses. businesses

239 "Harward, Sonya" (457645056)

00:42:13.370 --> 00:42:24.330

And so 2 months ago, I gave you the estimated distribution of who pays those taxes. You can see urban service district about 16.

240 "Harward, Sonya" (457645056)

00:42:24.330 --> 00:42:31.020

I'm sorry, 20%, suburban cities 16%, unincorporated 37%.

241 "Harward, Sonya" (457645056)

00:42:31.020 --> 00:42:37.500

So, there's a pretty good discrepancy there between the payers and the receivers of the service.

242 "Harward, Sonya" (457645056)

00:42:37.500 --> 00:42:46.410

Not necessarily a bad thing. Um, it's a community asset that, you know, we've voted to have and pay for. So.

243 "Harward, Sonya" (457645056)

00:42:46.410 --> 00:42:51.870

And I have 1 more slide. Yeah, here's the torque this. This was interesting.

244 "Harward, Sonya" (457645056)

00:42:52.705 --> 00:43:04.885

The annual conference of financial report for Metro, every year produces nice tables for most agencies, showing their employment levels over time, and also their services.

245 "Harward, Sonya" (457645056)
00:43:05.395 --> 00:43:11.845
And so, uh, for tarp, they had these 2 measures of services that I
thought would be interesting.

246 "Harward, Sonya" (457645056)
00:43:11.870 --> 00:43:15.960
To you, you can see that ridership.

247 "Harward, Sonya" (457645056)
00:43:15.960 --> 00:43:19.410
Has dropped dramatically from what about.

248 "Harward, Sonya" (457645056)
00:43:19.410 --> 00:43:23.070
14Million routers to about 5Million riders.

249 "Harward, Sonya" (457645056)
00:43:23.070 --> 00:43:27.810
Over the last decade, and now the number of buses in service.

250 "Harward, Sonya" (457645056)
00:43:27.810 --> 00:43:34.590
Falling with a lag behind that from looks like about 300 buses to 200
buses.

251 "Harward, Sonya" (457645056)
00:43:34.590 --> 00:43:42.390
So, there's a real decline in bus usage in the county and this is before
dark. I mean, before a covid happened.

252 "Harward, Sonya" (457645056)
00:43:42.390 --> 00:43:46.260
Question, you know, if this overall.

253 "Harward, Sonya" (457645056)
00:43:46.260 --> 00:43:53.100
Buses in service number accounts for our pair of transit system, it does
not, um.

254 "Harward, Sonya" (457645056)
00:43:53.100 --> 00:44:00.990
I don't believe that that's in the I think I would have grabbed it if I
saw it in the table.

255 "Harward, Sonya" (457645056)
00:44:00.990 --> 00:44:07.590
But that's that's obviously another service that they have that's called.
Or is that called 4?

256 "Harward, Sonya" (457645056)
00:44:07.590 --> 00:44:12.900
3333, so they'll, they'll bring a van.

257 "Harward, Sonya" (457645056)
00:44:12.900 --> 00:44:26.995
To your house pick you up to take you to a doctor, a hospital or
something if you're disabled and you qualify. What I understand. Talk 3
is only within the urban service district, right? Well, I don't think so.

258 "Harward, Sonya" (457645056)
00:44:26.995 --> 00:44:29.665
I've I've seen them in my neighborhood and I live outside.

259 "Harward, Sonya" (457645056)
00:44:30.090 --> 00:44:39.420
Um, you all know on counsel person tell me that and that's I wanted to
clarify that. Now, there, I think the only 1 satisfied.

260 "Harward, Sonya" (457645056)
00:44:39.420 --> 00:44:45.000
Okay, okay Thank you. Anyway. Okay. It's a federally funded program.
Okay.

261 "Harward, Sonya" (457645056)
00:44:45.000 --> 00:44:57.030
Paul, could you give a little more insight on the decline and the
ridership from 2011? Obviously.

262 "Harward, Sonya" (457645056)
00:44:57.030 --> 00:45:11.580
44,021 we know that's the pandemic contribution over there, but any
speculation or while decline population is shifting. People just not
being don't be mobile or.

263 "Harward, Sonya" (457645056)
00:45:11.580 --> 00:45:21.000
I, I can tell you from maybe 20 years ago, when I used to go to a couple
of their meetings and got to know Barry Barker in the and the board. Uh.

264 "Harward, Sonya" (457645056)
00:45:21.000 --> 00:45:27.630
And started looking at some of the data, it ridership was almost
inversely proportional to gas prices.

265 "Harward, Sonya" (457645056)
00:45:27.630 --> 00:45:33.690
So, when gas prices go to 5 dollars, people tend to ride the bus more.

266 "Harward, Sonya" (457645056)
00:45:33.690 --> 00:45:37.890
Then they would otherwise when gas prices go to 22,250.

267 "Harward, Sonya" (457645056)
00:45:37.890 --> 00:45:43.740
People drive that that's that's part of it. So, over that arrow there.

268 "Harward, Sonya" (457645056)
00:45:43.740 --> 00:45:49.170
Gas prices were falling, uh, part of the learning part of that cliff.

269 "Harward, Sonya" (457645056)
00:45:49.170 --> 00:45:57.810
So, I'm trying to remember the gas sources were that's trying to remember
a couple years ago back in 2011 to 2015.

270 "Harward, Sonya" (457645056)
00:45:57.810 --> 00:46:05.490
I thought they were on a private, the door and a half 2 dollars side to 2
something.

271 "Harward, Sonya" (457645056)
00:46:05.490 --> 00:46:12.840
But I'm not claiming that's the cause of it. I'm just you asked me for my
speculation. That's the 1st thing that came to my mind.

272 "Harward, Sonya" (457645056)
00:46:12.840 --> 00:46:19.290
It could be population shift, um.

273 "Harward, Sonya" (457645056)
00:46:19.290 --> 00:46:22.590
Do we have data on car car ownership?

274 "Harward, Sonya" (457645056)
00:46:22.590 --> 00:46:37.560

This time frame, I do have data, I haven't looked at it the American Community survey shows that and it shows that by census track. So we can look at that. If you, if you all think this is worth digging into.

275 "Harward, Sonya" (457645056)

00:46:37.560 --> 00:46:47.370

Well, I guess, I guess my question is, I'm not sure that I understand the significance of this of these data. Right? So, we, I would have expected.

276 "Harward, Sonya" (457645056)

00:46:47.370 --> 00:46:58.470

I would have expected then again, you know, I'm just, you know, somebody who lives here that the, that the use of dark would have been heavier in the urban services district. In the, what.

277 "Harward, Sonya" (457645056)

00:46:58.470 --> 00:47:04.380

In the urban services yeah. Yeah. What is and edit it? Indeed. It is. Um, and then it would have been.

278 "Harward, Sonya" (457645056)

00:47:04.380 --> 00:47:07.650

Less, uh, every place else.

279 "Harward, Sonya" (457645056)

00:47:07.650 --> 00:47:17.610

So, these things I'm surprised me, but I'm not sure that I joined a conclusion about that and any relationship between that fact, and where the revenue comes from.

280 "Harward, Sonya" (457645056)

00:47:17.610 --> 00:47:22.650

I mean, it's like, saying, what does that? What does that mean.

281 "Harward, Sonya" (457645056)

00:47:23.455 --> 00:47:29.635

Well, I mean, Marcus either, I guess we should ask the question is talk a community asset.

282 "Harward, Sonya" (457645056)

00:47:29.635 --> 00:47:40.075

That's basically an economic something to drive that economic vitality in the community as well as maybe routing health.

283 "Harward, Sonya" (457645056)

00:47:40.380 --> 00:47:50.280

In the central me able to get out and not be isolated plus getting to medical treatment or is it a pay for use services?

284 "5026***18" (629103616)

00:47:50.280 --> 00:47:57.390

Chairman, this is Jason. Ask a question. Yeah.

285 "5026***18" (629103616)

00:47:57.390 --> 00:48:01.740

Yeah, I also think I think all of that, I think, like, you.

286 "5026***18" (629103616)

00:48:01.740 --> 00:48:08.130

Mr. chairman, I would have definitely thought that it would be used more in the urban services district and I think that's perfectly appropriate. I bet that's.

287 "5026***18" (629103616)

00:48:08.130 --> 00:48:13.710

I bet that's what you would find in, in any, in any city in America, and I think that's appropriate.

288 "5026****18" (629103616)
00:48:13.710 --> 00:48:17.400
11 thing that.

289 "5026****18" (629103616)
00:48:17.400 --> 00:48:21.270
That I want to ask about it and then maybe we don't know the answer to but.

290 "5026****18" (629103616)
00:48:21.270 --> 00:48:24.840
I'm very happy to support talk, even though obviously.

291 "5026****18" (629103616)
00:48:24.840 --> 00:48:34.740
My areas don't use it nearly as much as other areas, but I wonder how much of the usage clearly not the majority of it, but I wonder how much of the usage of the non usage.

292 "5026****18" (629103616)
00:48:34.740 --> 00:48:39.660
In the in the suburban areas is because it's not very useful for us. For example.

293 "5026****18" (629103616)
00:48:39.660 --> 00:48:43.440
There's not a way to get from Middletown to J to.

294 "5026****18" (629103616)
00:48:43.440 --> 00:48:48.810
And so that's not very useful for the people that I represent for the people. You can't get from.

295 "5026****18" (629103616)
00:48:48.810 --> 00:48:56.250
Fair to Valley station, for example, it's all it's like, spoken will and that the other places aren't connected. So I wonder.

296 "5026****18" (629103616)
00:48:56.250 --> 00:48:59.490
If it would be used more, if it were actually more useful.

297 "5026****18" (629103616)
00:48:59.490 --> 00:49:09.780
For people who live in the suburbs, I'm not sure it's worth the cost. I don't know I'm just I'm just wondering how much of a lack of use it just because it's not designed to be useful for people in the suburbs.

298 "Harward, Sonya" (457645056)
00:49:09.780 --> 00:49:16.230
In in that way, we have been asking for an East West.

299 "Harward, Sonya" (457645056)
00:49:17.395 --> 00:49:32.035
Route for ever an East route East West well, coming from valet station and gets you to the airport to get you to ups to get people to report and it just seems like the impossible task.

300 "Harward, Sonya" (457645056)
00:49:32.035 --> 00:49:34.495
So if you want to go to.

301 "Harward, Sonya" (457645056)
00:49:35.040 --> 00:49:43.945
Um, say, ups and from Valley station, you're gonna get on a bus, and you're gonna go all the way down to 18 Broadway, and then come down.

302 "Harward, Sonya" (457645056)

00:49:43.945 --> 00:49:53.125

And I think, come out, uh, Preston, all the way back down to ups. It's like a 2 hour commute and it's crazy.

303 "5026****18" (629103616)

00:49:53.670 --> 00:50:04.860

And like that, and I don't know, I don't know, it sounds like on the face of it. That would be a very good thing. I'd like to see if Parker, anyone has done a study on it. It might not be.

304 "5026****18" (629103616)

00:50:04.860 --> 00:50:08.220

Economically feasible in a world with Uber and so forth where.

305 "5026****18" (629103616)

00:50:08.220 --> 00:50:12.150

Where people, you know, maybe maybe not enough. People would use it. I don't know.

306 "5026****18" (629103616)

00:50:12.150 --> 00:50:25.710

But I do want to note that we do pay the majority of the taxes. Obviously I'm not I, I still think it's a very, very useful thing in our community and it doesn't have to necessarily impact every, every zip code in the.

307 "5026****18" (629103616)

00:50:25.710 --> 00:50:31.560

Same positive way, but it is not designed to be useful for the people that are representing. I'd like to.

308 "5026****18" (629103616)

00:50:31.560 --> 00:50:39.150

See, if he has done any kind of study to see if that's economically feasible. Very well may not be just something I want to just flag.

309 "Harward, Sonya" (457645056)

00:50:39.625 --> 00:50:51.175

So, just a little bit about that um, you know, because I have been for 10 years talking to talk and I think Marianne was is when she was on the council as well.

310 "Harward, Sonya" (457645056)

00:50:51.175 --> 00:50:58.975

And it's just what they say is it's ridership. But if you can't get to the.

311 "Harward, Sonya" (457645056)

00:50:59.150 --> 00:51:10.140

Stop because there's no sandbox. It's kind of hard to get ridership. And if you can't get East to West in a reasonable amount of time.

312 "Harward, Sonya" (457645056)

00:51:10.140 --> 00:51:18.480

You know, so it it is a problem and I know they have done studies and I know that they are well aware because we tell them every year.

313 "Harward, Sonya" (457645056)

00:51:18.480 --> 00:51:27.060

So well, it's something I've observed too. It's it's it's and I guess I've always put it down, frankly, to to the geography of the city.

314 "Harward, Sonya" (457645056)

00:51:27.060 --> 00:51:39.960

When I moved here, I noticed that was the effect, and if this were primarily a city laid out on the grid, which is only in the urban services district, it would be a transportation by public.

315 "Harward, Sonya" (457645056)
00:51:39.960 --> 00:51:54.655
You know, public bus would be much easier. I mean, uh, gee, appliances, for example, we have problems with the same way. We can't get people from the western part of the city to come easily conveniently out to appliance spark.

316 "Harward, Sonya" (457645056)
00:51:55.045 --> 00:51:59.665
We've had to subsidize Uber trips as well. So, it's a very.

317 "Harward, Sonya" (457645056)
00:51:59.960 --> 00:52:12.120
The system itself is our cake. I'm not sure that it's within the scope of this, this study by the way, but it's if there's some way to sort of get the message out again to talk.

318 "Harward, Sonya" (457645056)
00:52:12.120 --> 00:52:19.860
About the inadequacy of the services, particularly, you know, the East West. Um, I think we should certainly do that.

319 "Harward, Sonya" (457645056)
00:52:19.860 --> 00:52:24.690
I don't know you Jason, whether or not, it's kind of thing that, um.

320 "Harward, Sonya" (457645056)
00:52:24.690 --> 00:52:36.360
I can tell you, even though the ridership is fallen from what 14Million to 5Million over that period every year there, the general fund.

321 "Harward, Sonya" (457645056)
00:52:36.360 --> 00:52:42.840
The occupational tax revenues have gone up so they've had steadily increasing revenues.

322 "Harward, Sonya" (457645056)
00:52:42.840 --> 00:52:46.140
While the ridership was dropping dramatically.

323 "Harward, Sonya" (457645056)
00:52:46.140 --> 00:52:51.450
So, there's, there's some resources out there.

324 "Harward, Sonya" (457645056)
00:52:51.450 --> 00:52:57.595
Yeah, there's a, there's a problem I think it's within the chairman.

325 "5026***18" (629103616)
00:52:57.625 --> 00:53:07.735
I'm not sure we can do too much about that with respect to resolve the problems and I think we can put a flag in it and make it something that we recommend that others may be the legislature with the city.

326 "5026***18" (629103616)
00:53:08.040 --> 00:53:21.330
Steady to see if see if we can move forward, especially in light of the fact that we want to also incentivize. I don't want the.

327 "5026***18" (629103616)
00:53:21.330 --> 00:53:24.510
The purpose of talk right now, although I know there are in southern Indiana.

328 "5026***18" (629103616)
00:53:24.510 --> 00:53:29.815
We have explosive growth in jobs in bullets county and Martin County,

329 "5026****18" (629103616)
00:53:29.815 --> 00:53:43.945
especially with battery coming and maybe it will be a wonderful opportunity to get our residents from the East and West mobile to those job locations as well as appliance market in a more efficient convenient way. Anyway, I think we can at least flag it and.

330 "5026****18" (629103616)
00:53:44.340 --> 00:53:49.560
And recommend further review of the.

331 "Harward, Sonya" (457645056)
00:53:49.560 --> 00:54:04.045
Can I add to that that I have been asking for a study to use the rail lines on the PNL rail lines in particular along to see how I to get to town?

332 "Harward, Sonya" (457645056)
00:54:04.105 --> 00:54:09.505
I mean, it would be a great opportunity and I have been saying this and we were involved.

333 "Harward, Sonya" (457645056)
00:54:09.560 --> 00:54:16.110
With national target cities, we're never going to be that city until we get public transit that is working.

334 "Harward, Sonya" (457645056)
00:54:16.110 --> 00:54:19.560
I mean, never, that's just my opinion.

335 "Harward, Sonya" (457645056)
00:54:28.350 --> 00:54:31.920
Right. I'll I'll go to the next 1 if you're ready.

336 "Harward, Sonya" (457645056)
00:54:31.920 --> 00:54:40.350
I have to do a little qualifying here because this is not comprehensive, but we did learn some things. Let's put it that way.

337 "Harward, Sonya" (457645056)
00:54:40.350 --> 00:54:44.880
So, Metro Council staff have been tracking.

338 "Harward, Sonya" (457645056)
00:54:44.880 --> 00:54:48.690
Um, capital projects since merger.

339 "Harward, Sonya" (457645056)
00:54:48.690 --> 00:54:52.140
Um, in every budget cycle.

340 "Harward, Sonya" (457645056)
00:54:52.140 --> 00:55:01.710
And, of course, you've had what this will be, the 3rd administration on the executive side, but the staff have been there all along.

341 "Harward, Sonya" (457645056)
00:55:01.710 --> 00:55:10.050
And they have this database with, I think it was about 7,900 capital projects in it that they sent me.

342 "Harward, Sonya" (457645056)
00:55:10.050 --> 00:55:13.110
Adding up to 2 and a half 1Billion dollars.

343 "Harward, Sonya" (457645056)
00:55:13.110 --> 00:55:19.890

That's the good news that we, we know the names of the projects the bad news is inside of that.

344 "Harward, Sonya" (457645056)

00:55:19.890 --> 00:55:32.520

Uh, there's no geographic identifiers, and a lot of them are very generic, and I can't tell how to allocate them and much of that 2 and a half. 1Billion was actually.

345 "Harward, Sonya" (457645056)

00:55:32.520 --> 00:55:47.215

Federally funded a lot of the housing stuff, housing projects, affordable housing stuff. A lot of that is federal money. So we don't have a comprehensive answer for you here, but there's a couple of indicative things that I think worth considering.

346 "Harward, Sonya" (457645056)

00:55:47.910 --> 00:55:52.020

Um, this 1st chart gives you the.

347 "Harward, Sonya" (457645056)

00:55:52.020 --> 00:55:56.130

Sort of macro, um, summary.

348 "Harward, Sonya" (457645056)

00:55:56.130 --> 00:56:00.900

Of the funding over the last, what 10 fiscal years.

349 "Harward, Sonya" (457645056)

00:56:00.900 --> 00:56:09.150

You can see it goes from anywhere from 65Million to 350Million dependent upon the year.

350 "Harward, Sonya" (457645056)

00:56:09.150 --> 00:56:16.680

And a little over half of it was funded by bonds at 22%, from federal funds.

351 "Harward, Sonya" (457645056)

00:56:16.680 --> 00:56:19.890

That's probably not newsworthy.

352 "Harward, Sonya" (457645056)

00:56:19.890 --> 00:56:23.910

This next 1, I think is more interesting.

353 "Harward, Sonya" (457645056)

00:56:23.910 --> 00:56:29.280

So the staff had carved out of that 7,500 projects.

354 "Harward, Sonya" (457645056)

00:56:29.280 --> 00:56:37.110

About, um, I camera about 3,025,300 projects that were clearly.

355 "Harward, Sonya" (457645056)

00:56:37.110 --> 00:56:42.690

Sort of community oriented, discretionary type projects in that.

356 "Harward, Sonya" (457645056)

00:56:42.690 --> 00:56:49.855

It excludes the road paving stuff that we've already talked about that's capital, but capital expenditure. We don't that's not included here.

357 "Harward, Sonya" (457645056)

00:56:50.395 --> 00:57:02.515

Uh, federal funded projects are not included here and some really big ticket items like the young center, the soccer stadium beyond the hotel. It that's all excluded from this so it makes the list.

358 "Harward, Sonya" (457645056)
00:57:02.690 --> 00:57:14.505
Smaller, and it's only what 382Million dollars, but it's probably more germane to this discussion because it's more discretionary and it's it's prominently probably features, uh, parks.

359 "Harward, Sonya" (457645056)
00:57:14.505 --> 00:57:18.315
prominently probably features uh parks

360 "Harward, Sonya" (457645056)
00:57:18.600 --> 00:57:23.040
Park improvements, uh, streetscape.

361 "Harward, Sonya" (457645056)
00:57:23.040 --> 00:57:29.910
Improvements libraries, library, renovations, the 3, new regional libraries.

362 "Harward, Sonya" (457645056)
00:57:29.910 --> 00:57:38.280
And I went through all these to make sure I understood what it was. And I, I agree. It's I think it's pretty representative for that.

363 "Harward, Sonya" (457645056)
00:57:38.280 --> 00:57:43.830
Way of looking at it instead of the whole shoot match.

364 "Harward, Sonya" (457645056)
00:57:43.830 --> 00:57:47.760
I see the sources, Metro Council's staff who exactly.

365 "Harward, Sonya" (457645056)
00:57:47.760 --> 00:57:53.700
Well, that's Steve and, uh, uh, best.

366 "Harward, Sonya" (457645056)
00:57:53.700 --> 00:57:57.360
That's that's the only ones I know that have kept us, but.

367 "Harward, Sonya" (457645056)
00:57:57.360 --> 00:58:05.070
You know, and I'm just curious, why were some of the exemptions made when they counted these up? And I, I think about.

368 "Harward, Sonya" (457645056)
00:58:05.365 --> 00:58:19.615
I don't know if you remember councilman councilman Anthony has this chart, that shows housing units, new dwellings that have been built by Council district and he always shows the chart just to talk about how much housing has gone into his district.

369 "Harward, Sonya" (457645056)
00:58:20.095 --> 00:58:22.495
I pulled it up earlier. When I first saw this. this

370 "Harward, Sonya" (457645056)
00:58:22.830 --> 00:58:28.530
And I'm thinking about exemptions and how do you calculate this and decide what the balance is.

371 "Harward, Sonya" (457645056)
00:58:28.530 --> 00:58:34.410
Of the housing units in his chart, and that's just from 2019 through March, 2022.

372 "Harward, Sonya" (457645056)
00:58:34.495 --> 00:58:49.105

8,419 new dwelling units were built over. 80% of those are in council districts outside of the urban services district. So you can make this look either way, depending on what you include and what you exclude. So, that's why I was curious. Where did this data come from?

373 "Harward, Sonya" (457645056)

00:58:49.105 --> 00:58:54.175

And we have more information that shows what those capital. information that shows what those capital

374 "Harward, Sonya" (457645056)

00:58:54.410 --> 00:59:04.860

Were so I think I know what you're referring to there's been a lot of affordable housing complex is built around in the suburbs. That's certainly true. That.

375 "Harward, Sonya" (457645056)

00:59:04.860 --> 00:59:08.430

That kind of thing is not in this table we're looking at now.

376 "Harward, Sonya" (457645056)

00:59:08.430 --> 00:59:13.170

This excludes all those of federally subsidized projects.

377 "Harward, Sonya" (457645056)

00:59:13.170 --> 00:59:24.300

This is parks mainly parks libraries. Those are the 2 and also a lot of sort of streetscape improvements. New Lou. There's a big project that's on there.

378 "Harward, Sonya" (457645056)

00:59:24.300 --> 00:59:36.540

Um, I can't remember the detail, but I went through it to make sure it was what they told me it was and I, I think this is pretty clean for what it is. You're what you're talking about is the, um.

379 "Harward, Sonya" (457645056)

00:59:36.540 --> 00:59:41.340

At the bottom are the 2.5000.

380 "Harward, Sonya" (457645056)

00:59:41.340 --> 00:59:46.800

That's it and what you and Tony you're talking about is buried in there.

381 "Harward, Sonya" (457645056)

00:59:46.800 --> 00:59:53.670

So right, and I'm just saying if we want to look at the demographics of where some of these capital projects go.

382 "Harward, Sonya" (457645056)

00:59:53.670 --> 01:00:08.280

Why exclude some projects and include others so, the clear the argument is, if it's federally funded, it would have happened in the county anyway, whether you had this distinction between the urban service district and everything else.

383 "Harward, Sonya" (457645056)

01:00:08.280 --> 01:00:19.890

That would be the argument so I thought it was logical to exclude federally funded projects because our county would compete for these regardless of merger lack of a merger.

384 "Harward, Sonya" (457645056)

01:00:19.890 --> 01:00:28.020

So so the source of the, the housing isn't always federal. I know we bond money for the affordable housing trust fund.

385 "Harward, Sonya" (457645056)
01:00:28.020 --> 01:00:33.660
We did approve some funding from the American rescue plan from Congress.
So it really just depends on the source.

386 "Harward, Sonya" (457645056)
01:00:33.660 --> 01:00:38.880
So, I'm just curious if we're going to talk about the expenditures based
on geography.

387 "Harward, Sonya" (457645056)
01:00:38.880 --> 01:00:53.070
Let's be fair which projects that we pick. We can't just pick the ones
that make it seem like they went to zip codes, 40,202 and 40,203. when in
reality if we start to add in other capital expenditures, the balance
looks totally different.

388 "Harward, Sonya" (457645056)
01:00:53.070 --> 01:00:59.490
I I agree, it's it's a great point. So, but my, my question is how much.

389 "Harward, Sonya" (457645056)
01:00:59.490 --> 01:01:04.890
How much, um, and I've been I've counsel for a while and I can't remember
the numbers.

390 "Harward, Sonya" (457645056)
01:01:04.890 --> 01:01:16.680
How much money does the city put forth in terms of bonding or just outlay
in terms of dollars to go for afforded affordable housing.

391 "Harward, Sonya" (457645056)
01:01:16.680 --> 01:01:30.030
This year's budget proposed 15Million I believe it's all bonded in years
past. We've had about 10Million each each fiscal year, the federal money,
American rescue plan money.

392 "Harward, Sonya" (457645056)
01:01:30.475 --> 01:01:34.465
It's about 100Million that we got, but it really just depends on the
year.

393 "Harward, Sonya" (457645056)
01:01:34.465 --> 01:01:48.475
Um, I'm not putting words out there, even though that's significant money
and it's, it's it sounds like it's a very good worthy cause they shift in
terms of percentage will change, but not that significant. that
significant

394 "Harward, Sonya" (457645056)
01:01:49.080 --> 01:02:02.725
Um, and I'm not trying to throw cold water or what it is, but I'm just,
I'm just trying to get that wrap my head around the numbers in terms of
percentage because yeah, I mean, when I look at that number, like, boy,
you know, it's, uh, 5657% in 2 districts, zip codes,

395 "Harward, Sonya" (457645056)
01:02:02.725 --> 01:02:08.455
which is significant. Um, and. is significant um and

396 "Harward, Sonya" (457645056)
01:02:08.790 --> 01:02:15.690
If you take that 15, this capital budget, you were mentioning in, in past
1010Million dollars.

397 "Harward, Sonya" (457645056)

01:02:15.690 --> 01:02:29.935
That that will still have an impact, but not as much as it might move.
Uh, significantly 11 thing to keep in mind there Ken is in this table
you're looking at you. See, the total is 382,000,000.
398 "Harward, Sonya" (457645056)
01:02:30.055 --> 01:02:31.345
three hundred and eighty two million
399 "Harward, Sonya" (457645056)
01:02:31.680 --> 01:02:35.040
Because it's restricted mainly to them as I described it.
400 "Harward, Sonya" (457645056)
01:02:35.040 --> 01:02:40.650
But the actual Tony since merger is 2 and a half 1,000,000,000.
401 "Harward, Sonya" (457645056)
01:02:40.650 --> 01:02:55.500
So, it's and that's to cory's point if we really want to know how it's
all been distributed, we're going to have to go back to well over a 1000
of these capital projects and try to allocate it.
402 "Harward, Sonya" (457645056)
01:02:55.500 --> 01:03:01.080
A geographically and and B by funding source.
403 "Harward, Sonya" (457645056)
01:03:01.080 --> 01:03:08.640
To tell the whole story, uh, I talked to staff about this last week and
they said if it's important, we'll do it.
404 "Harward, Sonya" (457645056)
01:03:08.640 --> 01:03:13.380
I think it's going to be an archaeological expedition to go back for 20
years.
405 "Harward, Sonya" (457645056)
01:03:13.380 --> 01:03:26.580
And to parse out funding sources and and geography for all of these, but
if it if it's really important, we'll do it and we'll do it the best we
can. There's, there's some of them in there that are like.
406 "Harward, Sonya" (457645056)
01:03:26.580 --> 01:03:31.470
They're generic, it'll say, uh, maintenance of, uh.
407 "Harward, Sonya" (457645056)
01:03:32.395 --> 01:03:46.825
Public assets or something deferred maintenance 12Million dollars. Well,
you know, that's across the whole system. I don't know that we'll ever be
able to do those, but the housing stuff I think we could do a lot there
and certainly the matching money or the general fund money.
408 "Harward, Sonya" (457645056)
01:03:46.825 --> 01:03:49.165
That gets that goes into bonding. bonding
409 "Harward, Sonya" (457645056)
01:03:49.470 --> 01:03:52.710
And, uh, for for the affordable housing, sure.
410 "Harward, Sonya" (457645056)
01:03:52.710 --> 01:04:00.420
Sure, we could, and we know where the units are. I guess I want to stay
focused on in terms of.
411 "Harward, Sonya" (457645056)

01:04:00.955 --> 01:04:13.765

Individuals that pay taxes, regardless of where you live, that's where we need to track. And I understand you're what you're rationale in terms of looking at the federal, uh, excluding the federal funded projects.

412 "Harward, Sonya" (457645056)

01:04:15.690 --> 01:04:26.850

You know, I'm, I'm trying to wrestle with fire. Um, John was obviously a combination of state and local.

413 "Harward, Sonya" (457645056)

01:04:26.850 --> 01:04:38.610

Um, Omni, you know, all those, there's a combination it gets really muddy, uh, in terms of that but if I understand your logic and going through that, but I just want to stay focused on.

414 "Harward, Sonya" (457645056)

01:04:38.610 --> 01:04:50.785

Taking the tax dollars that people pay and see where that goes if it goes to a capital project, then, you know, for, um, you know, for housing projects, then we need to we need to find that out quick question.

415 "Harward, Sonya" (457645056)

01:04:51.085 --> 01:04:55.375

So, when it comes to new roads, you have regular paving.

416 "Harward, Sonya" (457645056)

01:04:55.650 --> 01:05:00.150

I think you had, oh, Steve, uh, street improvements.

417 "Harward, Sonya" (457645056)

01:05:00.835 --> 01:05:14.035

What about there's nothing to hear about new roads, new county roads being made obviously, if it's a state road, and the state would participate that participate in that process and doing that.

418 "Harward, Sonya" (457645056)

01:05:14.035 --> 01:05:16.285

So, is that in here anywhere.

419 "Harward, Sonya" (457645056)

01:05:16.590 --> 01:05:21.840

There there were some street road projects in there. They're like, um.

420 "Harward, Sonya" (457645056)

01:05:21.840 --> 01:05:31.650

A couple of them were ramps on the interstate. I can't remember where that should be state funded project.

421 "Harward, Sonya" (457645056)

01:05:31.650 --> 01:05:38.280

Well, so cause I, I've gone through that process and he ran into goes up in your state that state.

422 "Harward, Sonya" (457645056)

01:05:38.280 --> 01:05:43.890

It should be States that'd be state. Well, there were a couple in here that, uh, I was told.

423 "Harward, Sonya" (457645056)

01:05:43.890 --> 01:05:51.120

Maybe it was a contribution to enhance something. I don't know. Maybe it was like, I don't know. Okay, but it was called a ramp project.

424 "5026***18" (629103616)

01:05:51.120 --> 01:06:00.120

In this, this list of a few 100 projects, Jason at the moment and that's perfect.

425 "Harward, Sonya" (457645056)

01:06:00.120 --> 01:06:04.410

What what are we looking for here? I mean.

426 "Harward, Sonya" (457645056)

01:06:04.410 --> 01:06:09.030

What what's the objective here? Well.

427 "Harward, Sonya" (457645056)

01:06:09.030 --> 01:06:13.410

You know, if we go at a high level, this commission.

428 "Harward, Sonya" (457645056)

01:06:13.410 --> 01:06:18.240

Is looking at where we are 20 years later after merger.

429 "Harward, Sonya" (457645056)

01:06:18.240 --> 01:06:23.880

There were some, obviously some issues that forced that conversation of people feeling like.

430 "Harward, Sonya" (457645056)

01:06:23.880 --> 01:06:30.690

They were getting not getting the services that they thought they'd paid for vice versa.

431 "Harward, Sonya" (457645056)

01:06:30.690 --> 01:06:34.380

So that led to who's paying for things.

432 "Harward, Sonya" (457645056)

01:06:34.380 --> 01:06:41.580

And who's getting the services and so up to this point, we've only looked at operational expenses.

433 "Harward, Sonya" (457645056)

01:06:41.815 --> 01:06:53.335

Now, we're looking at lumpy capital expenditures and are very significant and a lot of this is funded by general obligation bonds, which are paid for out of our property taxes,

434 "Harward, Sonya" (457645056)

01:06:53.365 --> 01:07:01.405

observational taxes and our insurance premium taxes somewhat understood what I'm trying to understand is. So then that 2.5000. point five billion

435 "Harward, Sonya" (457645056)

01:07:01.580 --> 01:07:07.020

Obviously, you know, you've indicated, obviously, it's not on this, not all in this chart.

436 "Harward, Sonya" (457645056)

01:07:07.020 --> 01:07:18.510

But you're indicating, for example, there were certain large projects, which were determined to have some overall community impact and therefore were excluded from consideration. Right? So.

437 "Harward, Sonya" (457645056)

01:07:18.510 --> 01:07:25.110

Wh, what, how do you characterize those projects? What, what makes a project in that group.

438 "Harward, Sonya" (457645056)

01:07:25.110 --> 01:07:30.300

Well, um, if you see the see, those little.

439 "Harward, Sonya" (457645056)
01:07:30.300 --> 01:07:35.730
On the far right hand side where I put capital R capital L.

440 "Harward, Sonya" (457645056)
01:07:35.730 --> 01:07:40.470
On the far right hand side there. Those are the 3 new.

441 "Harward, Sonya" (457645056)
01:07:40.470 --> 01:07:49.110
Regional libraries, Southwest, South, central Northeast. Those are all
1213Million dollars apiece.

442 "Harward, Sonya" (457645056)
01:07:49.110 --> 01:07:58.860
So, that that was discretionary, that was a policy to notice that the
population and the, and suburbs had been growing.

443 "Harward, Sonya" (457645056)
01:07:58.860 --> 01:08:11.610
And the libraries were mainly interior, we needed big new libraries. So,
um, to me, this is 1 of the things I think you all can point to as a
successive merger.

444 "Harward, Sonya" (457645056)
01:08:11.610 --> 01:08:18.930
Is that because we're 1 county with 1 government, we can do things like
this. So, you know.

445 "Harward, Sonya" (457645056)
01:08:18.930 --> 01:08:33.090
But again, that was something which, which was determined by, by the
categorization that you mentioned, that's something which is a large
project, which is what something that has community wide benefit is that
it? Or is it something that is.

446 "Harward, Sonya" (457645056)
01:08:33.090 --> 01:08:47.455
Other described otherwise, um, well, they are open to everyone just like
the parks are open to. Is that is that the criterion is what I'm trying
to understand what's the difference between the between a library and the
Omni center?

447 "Harward, Sonya" (457645056)
01:08:50.310 --> 01:08:53.490
In terms of they're both being excluded from this.

448 "Harward, Sonya" (457645056)
01:08:53.490 --> 01:08:57.870
List, well, the Omni would be.

449 "Harward, Sonya" (457645056)
01:08:57.870 --> 01:09:01.530
A tourism, economic development investment, right?

450 "Harward, Sonya" (457645056)
01:09:01.530 --> 01:09:07.050
The young is considered to be a regional sports complex that everybody.

451 "Harward, Sonya" (457645056)
01:09:07.050 --> 01:09:11.670
In 10 counties uses all the time.

452 "Harward, Sonya" (457645056)
01:09:11.670 --> 01:09:17.250
Whereas maybe a park in a neighborhood is mainly used by those residents.

453 "Harward, Sonya" (457645056)

01:09:17.250 --> 01:09:23.190

The regional libraries are mainly used by the people in that part of town.

454 "Harward, Sonya" (457645056)

01:09:23.190 --> 01:09:26.640

I think that's the distinction. Now. I didn't do this.

455 "Harward, Sonya" (457645056)

01:09:26.640 --> 01:09:33.570

This filtering, but we had to come up with something based upon your questions and.

456 "Harward, Sonya" (457645056)

01:09:33.570 --> 01:09:40.920

So, I went with what was available and now you're picking at it and you're banking very good points. Mr. chairman yes.

457 "Mike Nemes" (840296192)

01:09:40.920 --> 01:09:49.170

Is there any consideration that libraries have their own money and their own tax base? The library tax.

458 "Harward, Sonya" (457645056)

01:09:49.170 --> 01:09:52.710

There's no library tab. Oh, they don't.

459 "5026****18" (629103616)

01:09:52.710 --> 01:09:56.820

Not not in Jefferson.

460 "Harward, Sonya" (457645056)

01:09:56.820 --> 01:10:09.390

I would if I can venture, I guess I would say that the ones they excluded are the ones that are a combination of local funding state funding and some federal funding.

461 "Harward, Sonya" (457645056)

01:10:10.195 --> 01:10:14.485

Certain libraries are all local funded. Okay. Can you thank you.

462 "Harward, Sonya" (457645056)

01:10:14.485 --> 01:10:27.445

I think that's romney's a combination of everybody as and same with center and it's not just metro park is part of that deal too, because they built the parking garages.

463 "Harward, Sonya" (457645056)

01:10:28.050 --> 01:10:37.350

That therefore help pay for themselves and it was tax increment finance district or y'all. That's the state in there. And then Omni on fake also. Yes.

464 "Harward, Sonya" (457645056)

01:10:37.350 --> 01:10:43.920

Agree that that that's that's a distinction here. Anything that involves funds other than.

465 "Harward, Sonya" (457645056)

01:10:43.920 --> 01:10:58.410

Then city money that rings true that that's why it was explained to me this is primarily general fund financed discretionary things. Okay. So if that's it, then I guess I wanted to ask Mr Fleming is that.

466 "Harward, Sonya" (457645056)

01:10:58.410 --> 01:11:03.240

Do you accept that and are you then saying that there should be an additional.

467 "Harward, Sonya" (457645056)

01:11:03.240 --> 01:11:07.800

Document that shows these other funds.

468 "Harward, Sonya" (457645056)

01:11:07.800 --> 01:11:12.240

These other projects, or are you suggesting that there'd be 1.

469 "Harward, Sonya" (457645056)

01:11:12.240 --> 01:11:27.000

A list that includes everything. Um, I apologize chairman. I was talking to Scott, so right now about some of the numbers cause I'm still trying to get my head wrapped around a couple of different variables coming in.

Um, I guess.

470 "Harward, Sonya" (457645056)

01:11:27.000 --> 01:11:31.890

Um, I just want to make sure I just make sure that.

471 "Harward, Sonya" (457645056)

01:11:31.890 --> 01:11:42.595

That there are that there's logic and agreement in terms of what should be included, which not being included and what's included. We need to make sure that that doors are being tracked and going toward that.

472 "Harward, Sonya" (457645056)

01:11:42.595 --> 01:11:51.565

So, if there are federal funding that's going forward, you know, and I'll use the councilman's example, a affordable housing that's federal should they be included? Yes, we.

473 "Harward, Sonya" (457645056)

01:11:51.890 --> 01:12:06.870

The benefit and so forth, but we're really to kind of look at. What's the what's the what's the tax? What's where are people who pay the tax benefiting from it? Well, I understand that, but this is a list only of only projects that are paid exclusively by.

474 "Harward, Sonya" (457645056)

01:12:06.870 --> 01:12:09.900

By Jefferson County taxpayers.

475 "5026***18" (629103616)

01:12:09.900 --> 01:12:14.460

And I don't think that's I don't Mr. chairman. I'm not sure that's right.

476 "Harward, Sonya" (457645056)

01:12:14.460 --> 01:12:19.140

Okay, I'm not sure that's what I'd like, make sure.

477 "5026***18" (629103616)

01:12:19.140 --> 01:12:25.350

Yeah, I'd like to get a list of the things that have been excluded and it's my understanding they've been excluded because if they were included.

478 "5026***18" (629103616)

01:12:25.350 --> 01:12:40.050

It would make it look unbelievably unfair, skewed toward the urban services district, and it should have been excluded things like the young center and then new soccer field. Those are community projects and it's not fair to say those are. It's not fair to say that.

479 "5026***18" (629103616)

01:12:40.050 --> 01:12:47.520

That the suburbs are being treated unfairly treated because those are put in their services. Libraries are a horse of a different color altogether.

480 "5026****18" (629103616)

01:12:47.520 --> 01:13:00.055

I mean, nobody's going to go to the London library if they live in Valley. Nobody so so those are different in time, but I don't think they were excluded based on the source of the funding alone or even at all they were pulled out.

481 "5026****18" (629103616)

01:13:00.055 --> 01:13:06.475

Because I think up to do, otherwise would have been, wouldn't have been it's not fair to attribute.

482 "5026****18" (629103616)

01:13:07.520 --> 01:13:11.100

With the center, because that's that's also.

483 "5026****18" (629103616)

01:13:11.100 --> 01:13:19.710

Beneficial providers, I don't know. District, but so that's the, that's the reason they were still decide do not think it was source of funding and I would like to see a list.

484 "5026****18" (629103616)

01:13:19.710 --> 01:13:30.810

Of all the things that have been excluded, because I do think this is a very important thing Mr. chairman because, I mean, obviously fundamentally, and people can disagree with this, but fundamentally.

485 "5026****18" (629103616)

01:13:30.810 --> 01:13:45.025

The people that live outside of the Waterson are 2 thirds of our population and we think we're not getting the services that we pay for in a fair way. And that's what this study this proof or proof. And that's why, I'm not arguing.

486 "5026****18" (629103616)

01:13:45.115 --> 01:13:46.735

I'm not arguing your appropriate.

487 "Harward, Sonya" (457645056)

01:13:47.400 --> 01:13:51.930

I'm not arguing for 1 proposition or the other. All I'm trying to understand is.

488 "Harward, Sonya" (457645056)

01:13:51.930 --> 01:13:57.240

Is what's on 1 list and should that list be be revised?

489 "Harward, Sonya" (457645056)

01:13:57.240 --> 01:14:03.960

Or do we have to supplement it with another list, which is clearly defined what's in that list? That's all. I'm trying to understand.

490 "Harward, Sonya" (457645056)

01:14:03.960 --> 01:14:07.290

I mean, I do think it, it would make sense.

491 "Harward, Sonya" (457645056)

01:14:07.290 --> 01:14:10.770

That there will be that the lists not be combined.

492 "Harward, Sonya" (457645056)

01:14:10.770 --> 01:14:16.920

Because there is a clear difference between those, which are slowly funded.

493 "Harward, Sonya" (457645056)

01:14:16.920 --> 01:14:22.290

And if this is not if if this list that you've given us here is actually.

494 "Harward, Sonya" (457645056)

01:14:22.290 --> 01:14:28.860

Includes things that are funded by other sources, it should be supplemented.

495 "Harward, Sonya" (457645056)

01:14:28.860 --> 01:14:33.630

Um, but I think it makes sense to have 1 list. That is.

496 "Harward, Sonya" (457645056)

01:14:33.630 --> 01:14:45.420

Just discretionary funding, and then the other 1 that says, and these are these, these are funds that came in from other sources and to the extent that there's city money in there fine if they're state fine federal, who cares.

497 "Harward, Sonya" (457645056)

01:14:45.420 --> 01:14:57.120

But you can, you can still then determine to the extent that their city funds, what local taxpayers have contributed to those larger projects, you can still determine whether or not, there's been a imbalance there.

498 "Harward, Sonya" (457645056)

01:14:57.120 --> 01:15:03.150

Also, just going to add real quick latonya bells our financial and excuse me.

499 "Harward, Sonya" (457645056)

01:15:03.925 --> 01:15:15.595

Whatever the word is, she handled our money on the metro Council, so I just want to be clear, as we say metro Council staff Steve hag works for the Republican caucus. He doesn't work for the entire metro Council.

Thank you.

500 "5026***18" (629103616)

01:15:16.915 --> 01:15:19.225

I want a list of all these questions we can go through ourselves.

501 "Harward, Sonya" (457645056)

01:15:19.890 --> 01:15:27.300

And Corey, are you saying sorry, are you saying there's somebody else at Metro council that keeps track of the capital projects.

502 "5026***18" (629103616)

01:15:30.450 --> 01:15:39.930

Okay, I don't know if you can there's a website that has this on the little Metro, central government, and it has it by.

503 "5026***18" (629103616)

01:15:39.930 --> 01:15:45.690

A metro district capital projects I don't know who put that together, but it wasn't Republican staff.

504 "Harward, Sonya" (457645056)

01:15:45.690 --> 01:15:55.680

If you look at 3, I think you're going to find the majority of those capital projects are going to be on Metro buildings.

505 "Harward, Sonya" (457645056)

01:15:55.680 --> 01:16:00.900

That's where the majority of metro buildings are located. We would have to do that regardless.

506 "Harward, Sonya" (457645056)

01:16:00.900 --> 01:16:11.940

Of if we were merged or not, if it was still county or still city, they still have to maintain them this building alone. We've spent nearly 10Million dollars with a new roof, redoing this. Um.

507 "Harward, Sonya" (457645056)

01:16:12.385 --> 01:16:18.835

We patched the roof then we had to put the new 1 on same across the street at Metro hall. I would say in.

508 "Harward, Sonya" (457645056)

01:16:19.435 --> 01:16:30.025

It's probably when they re, did they bought that new facility and did the government center out there off 9th street where the clerk used to be in? I think the police are in it now.

509 "Harward, Sonya" (457645056)

01:16:30.960 --> 01:16:41.010

So, I think if you looked at those 2 zip codes, we've done some capital projects, but a good portion of them are going to be spent on Metro owned buildings.

510 "Harward, Sonya" (457645056)

01:16:41.010 --> 01:16:49.170

Yeah, so I got 1 recommendation I will send you all the lists and then you can see what's in it for yourself.

511 "Harward, Sonya" (457645056)

01:16:49.170 --> 01:16:58.980

Um, well, you know, it's funny because I guess I came to this with the assumption that quote, capital projects involved.

512 "Harward, Sonya" (457645056)

01:16:58.980 --> 01:17:05.490

Expenditures on public buildings that was just my understanding.

513 "Harward, Sonya" (457645056)

01:17:05.490 --> 01:17:12.090

I'm not suggesting it's correct, but that was my understanding parks and anything that was owned by the.

514 "Harward, Sonya" (457645056)

01:17:12.090 --> 01:17:16.740

By the city or the government so if it's true that.

515 "Harward, Sonya" (457645056)

01:17:16.740 --> 01:17:31.615

There is a definitive list at the Council staff category and it's comprehensive and it's organized by a council district. I'm sure my friend Matt up here can convert.

516 "Harward, Sonya" (457645056)

01:17:31.890 --> 01:17:40.230

Council district data to these 3 geographies, uh, and get pretty close. So we'll use that as a chore for next time.

517 "Harward, Sonya" (457645056)

01:17:40.230 --> 01:17:48.120

If that data exists, and it's organized by Council district, and hopefully it has flags on funding source then we can tell the whole story.

518 "Harward, Sonya" (457645056)

01:17:48.120 --> 01:17:51.360
And, uh, and everybody can agree on the answer.
519 "Harward, Sonya" (457645056)
01:17:51.360 --> 01:17:57.810
Well, not so just on that question if you took the entire 2.5Billion, you did that.
520 "Harward, Sonya" (457645056)
01:17:57.810 --> 01:18:02.190
How does that address? Ms butler's question about.
521 "Harward, Sonya" (457645056)
01:18:02.190 --> 01:18:06.720
Whether it's a public building, or it's something owned by the city versus.
522 "Harward, Sonya" (457645056)
01:18:06.720 --> 01:18:10.860
I don't know something that's a joint or a.
523 "Harward, Sonya" (457645056)
01:18:10.860 --> 01:18:16.380
You know, we could easily create a flag for county own buildings.
524 "Harward, Sonya" (457645056)
01:18:16.380 --> 01:18:24.540
Repair building whatever, and just because you'll have the actual list of the if the data's there. Sure. I just don't know. I haven't seen it.
525 "Harward, Sonya" (457645056)
01:18:24.540 --> 01:18:29.280
You know, I don't want to pick on or or.
526 "Harward, Sonya" (457645056)
01:18:29.280 --> 01:18:33.000
Anybody like that, but 1st of all this is.
527 "Harward, Sonya" (457645056)
01:18:33.000 --> 01:18:37.440
Year to date 12 to 22.
528 "Harward, Sonya" (457645056)
01:18:37.440 --> 01:18:41.460
So this is 10 years where the data, whether it's.
529 "Harward, Sonya" (457645056)
01:18:41.460 --> 01:18:48.720
A whole lot in 1 place or a whole another, but I really can't comprehend how in 10 years.
530 "Harward, Sonya" (457645056)
01:18:48.720 --> 01:18:53.850
Absolutely, no capital project money.
531 "Harward, Sonya" (457645056)
01:18:53.850 --> 01:18:58.500
I spend in the 2541.
532 "Harward, Sonya" (457645056)
01:18:58.500 --> 01:19:02.730
67 40299.
533 "Harward, Sonya" (457645056)
01:19:02.730 --> 01:19:07.710
And I'll look at 40,204 3 where my city is.
534 "Harward, Sonya" (457645056)
01:19:07.710 --> 01:19:13.950
And in 10 years, only 775,000 dollars.

535 "Harward, Sonya" (457645056)
01:19:13.950 --> 01:19:18.180
Worth of money of a now surely to goodness.

536 "Harward, Sonya" (457645056)
01:19:18.180 --> 01:19:22.710
If this is Metro and we're all in this together as a merger.

537 "Harward, Sonya" (457645056)
01:19:22.710 --> 01:19:27.450
It just had to have been at 10 years. Some project.

538 "Harward, Sonya" (457645056)
01:19:27.450 --> 01:19:32.310
In the 4 0, 4, 1 or 6 7.

539 "Harward, Sonya" (457645056)
01:19:32.310 --> 01:19:36.450
It should have had some money put to it. So, my question, I guess is.

540 "Harward, Sonya" (457645056)
01:19:36.450 --> 01:19:40.860
Who picked the projects, how were they picked.

541 "Harward, Sonya" (457645056)
01:19:41.095 --> 01:19:54.625
Why were they picked and why some of these zip codes have absolutely 0
money in the last 10 years been spent in it. Let me just make sure we're
clear though. This is not all capital projects.

542 "Harward, Sonya" (457645056)
01:19:54.625 --> 01:20:00.835
This is just the ones according to this. These may expenditures. I see
here as Cory pointed out, there may be.

543 "Harward, Sonya" (457645056)
01:20:00.860 --> 01:20:08.460
Be a large affordable housing project in your zip code I don't know. Or
yeah, in your zip code.

544 "Harward, Sonya" (457645056)
01:20:08.460 --> 01:20:20.700
But because it was partially federally funded, it's exempt from this. So
we're only talking here about 382Million out of 22 and a half 1Billion.
So it's only 107th.

545 "Harward, Sonya" (457645056)
01:20:20.700 --> 01:20:28.032
Of the total capital expenditures so I think let's all just hold up with
all our judgment until we can get.

546 "Harward, Sonya" (457645056)
01:20:28.000 --> 01:20:33.940
Data sure, and I'll add, I, I think the commission clearly wants to see
where these projects.

547 "Harward, Sonya" (457645056)
01:20:33.940 --> 01:20:39.609
Are going where the funding from comes from. Some of the sources are
there.

548 "Harward, Sonya" (457645056)
01:20:39.609 --> 01:20:47.769
The rest of it, I think will have to find like, capital infrastructure
funds that Metro council members approve of. We definitely have those,
especially through.

549 "Harward, Sonya" (457645056)

01:20:47.769 --> 01:20:51.010
Tanya bell at the metro Council.
550 "Harward, Sonya" (457645056)
01:20:51.010 --> 01:20:57.100
But, but some of this, it'll just be a matter of really digging and
figuring it out with the mayor's office.
551 "Harward, Sonya" (457645056)
01:20:57.100 --> 01:21:06.430
Good luck, thank you. So again, do the commissioners have other
recommendations or suggestions in terms of.
552 "Harward, Sonya" (457645056)
01:21:06.430 --> 01:21:12.160
Dr, and his team should talk with you mentioned, misspell is there
anybody else that.
553 "Harward, Sonya" (457645056)
01:21:12.160 --> 01:21:18.490
Would have information you all think is relevant. I, I would suggest.
554 "Harward, Sonya" (457645056)
01:21:18.490 --> 01:21:22.270
Um, someone with public facilities.
555 "Harward, Sonya" (457645056)
01:21:22.270 --> 01:21:28.840
Nope, Martin is 1 of them. Lord Grabowski is another.
556 "Harward, Sonya" (457645056)
01:21:28.840 --> 01:21:35.110
They can let, you know, how much was spent on the different buildings.
And, and if I may, I don't know how close you are to.
557 "Harward, Sonya" (457645056)
01:21:35.110 --> 01:21:40.450
Finalizing your data stuff, but I would love if this group could.
558 "Harward, Sonya" (457645056)
01:21:40.450 --> 01:21:44.050
Invite some people from the mayor's office.
559 "Harward, Sonya" (457645056)
01:21:44.050 --> 01:21:53.020
And or their directors to come, because if they were here, they may be
able to answer some of the questions that we have that.
560 "Harward, Sonya" (457645056)
01:21:53.020 --> 01:21:56.320
You just don't know all the background with.
561 "Harward, Sonya" (457645056)
01:21:56.320 --> 01:21:59.320
And they may be able to answer it pretty quickly.
562 "Harward, Sonya" (457645056)
01:21:59.320 --> 01:22:03.130
Yeah, well I actually that's a great idea. Um.
563 "Harward, Sonya" (457645056)
01:22:03.130 --> 01:22:07.720
And I would solicit the commissioners to identify.
564 "Harward, Sonya" (457645056)
01:22:07.720 --> 01:22:12.130
Um, you would think would who you like, I don't know.
565 "Harward, Sonya" (457645056)
01:22:12.130 --> 01:22:16.510

I don't think we need to identify anything. We just need to put the request over to the mayor.

566 "Harward, Sonya" (457645056)
01:22:16.510 --> 01:22:20.980
Have whoever he deems necessary, whether it's his.

567 "Harward, Sonya" (457645056)
01:22:20.980 --> 01:22:26.140
Deputy Mayor, or his directors, um, somebody that whatever information.

568 "Harward, Sonya" (457645056)
01:22:26.140 --> 01:22:32.980
Dr kim's has been given that they could answer questions if they come up.

569 "Harward, Sonya" (457645056)
01:22:32.980 --> 01:22:39.250
So, I, real quick Aaron Jackson. He might well, I'll talk to you after this budget passes after July 1.

570 "Harward, Sonya" (457645056)
01:22:39.250 --> 01:22:44.590
But he worked not only on the budget with this current administration, but the previous administration as well and he.

571 "Harward, Sonya" (457645056)
01:22:44.590 --> 01:22:51.100
Could help find some of the capital projects and some details about those. Aaron Aaron would be a great resource. I know Aaron.

572 "Harward, Sonya" (457645056)
01:22:51.100 --> 01:22:56.140
Brian, yep Yep. I contacted some people in.

573 "Harward, Sonya" (457645056)
01:22:56.140 --> 01:23:00.880
6 weeks ago about with a whole bunch of questions, they're just too busy right now.

574 "Harward, Sonya" (457645056)
01:23:00.880 --> 01:23:08.650
Didn't get it right now, but when are you finished with your budget? Month? 27.

575 "Harward, Sonya" (457645056)
01:23:08.650 --> 01:23:10.145
This after the budget is approved

576 "Harward, Sonya" (457645056)
01:23:24.065 --> 01:23:25.205
anymore on this.

577 "Harward, Sonya" (457645056)
01:23:26.080 --> 01:23:30.130
Just want to address. Okay.

578 "Harward, Sonya" (457645056)
01:23:30.130 --> 01:23:40.120
Where are you in your presentation? Dr Phil.

579 "Harward, Sonya" (457645056)
01:24:13.630 --> 01:24:19.960
Okay um, so this is a little bit different than most of of what.

580 "Harward, Sonya" (457645056)
01:24:19.960 --> 01:24:24.370
Has been kind of the focus is I, what I would take to be a sort of a distributional.

581 "Harward, Sonya" (457645056)

01:24:24.370 --> 01:24:28.030
Question within Jefferson County, so what we want to do.
582 "Harward, Sonya" (457645056)
01:24:28.030 --> 01:24:32.590
To do here is give a perspective and.
583 "Harward, Sonya" (457645056)
01:24:32.590 --> 01:24:36.910
And think about 2 things really 1 is trends.
584 "Harward, Sonya" (457645056)
01:24:36.910 --> 01:24:40.480
In spending and, uh, the other is a.
585 "Harward, Sonya" (457645056)
01:24:40.480 --> 01:24:45.910
Harrison to what we think are some natural comparison cities.
586 "Harward, Sonya" (457645056)
01:24:45.910 --> 01:24:50.950
Cities and counties and so that's what what we've done today. Um.
587 "Sandra Leonard" (837999616)
01:24:50.950 --> 01:24:59.919
Uh, what I had to talk about today, so, uh, just a little bit.
588 "Harward, Sonya" (457645056)
01:24:59.919 --> 01:25:05.739
Um, uh, so what we did we've done is we've.
589 "Harward, Sonya" (457645056)
01:25:05.739 --> 01:25:11.739
Chosen some cities you can see them on the list. Birmingham, Cincinnati,
Indianapolis, Lexington.
590 "Harward, Sonya" (457645056)
01:25:11.739 --> 01:25:15.969
Memphis Nashville in the region, we think fairly similar.
591 "Harward, Sonya" (457645056)
01:25:15.969 --> 01:25:19.809
We can argue about some of them. How of similar.
592 "Harward, Sonya" (457645056)
01:25:19.809 --> 01:25:27.339
Lexington, I will say we put in smaller obviously, but what we thought is
a good comparison in the sense within the same.
593 "Harward, Sonya" (457645056)
01:25:27.339 --> 01:25:32.379
Date into the centered state policy might influence things. We wanted to
do that.
594 "Harward, Sonya" (457645056)
01:25:32.379 --> 01:25:36.099
Um, the data comes from the census of governments.
595 "Harward, Sonya" (457645056)
01:25:36.099 --> 01:25:40.449
Census Bureau it's every 5 years.
596 "Harward, Sonya" (457645056)
01:25:40.449 --> 01:25:46.269
And so what we do is we have a 92 to 2017, so unfortunately.
597 "Harward, Sonya" (457645056)
01:25:46.269 --> 01:25:50.139
While a census was done in 2022.
598 "Harward, Sonya" (457645056)

01:25:50.139 --> 01:25:54.309
They don't get that data to us very quickly. Uh, so.
599 "Harward, Sonya" (457645056)
01:25:54.309 --> 01:25:59.379
Uh, we have up through 2017, and I think that's probably relevant for
some of the things.
600 "Harward, Sonya" (457645056)
01:25:59.379 --> 01:26:02.379
Um, and so what we're gonna do here is.
601 "Harward, Sonya" (457645056)
01:26:02.379 --> 01:26:05.739
Look at these trends in expenditures.
602 "Harward, Sonya" (457645056)
01:26:05.739 --> 01:26:10.959
Current expenditures I think maybe it speaks a little bit to kind of some
of the.
603 "Harward, Sonya" (457645056)
01:26:10.959 --> 01:26:14.229
Discussion here, you know, we did look at capital expenditures.
604 "Harward, Sonya" (457645056)
01:26:14.229 --> 01:26:19.839
And they're lumpy in there, they show up as lumpy in in, in the.
605 "Harward, Sonya" (457645056)
01:26:19.839 --> 01:26:24.729
A census of government, so it's difficult to see trends and make
comparison.
606 "Harward, Sonya" (457645056)
01:26:24.729 --> 01:26:28.659
All right, um, we certainly have that data, but we've, we've.
607 "Harward, Sonya" (457645056)
01:26:28.659 --> 01:26:36.249
We decided to focus on current expenditures and you can see the
expenditures that we have below again. We thought these were.
608 "Harward, Sonya" (457645056)
01:26:36.249 --> 01:26:39.639
Kind of particular interest corrections.
609 "Harward, Sonya" (457645056)
01:26:39.639 --> 01:26:43.149
Given the discussions we've had fire protection.
610 "Harward, Sonya" (457645056)
01:26:43.149 --> 01:26:46.479
Libraries parks and recreation.
611 "Harward, Sonya" (457645056)
01:26:46.479 --> 01:26:52.539
Police, then we aggregate those 5 categories, um, some other smaller
categories.
612 "Harward, Sonya" (457645056)
01:26:52.539 --> 01:26:57.099
Um, in some of these for, uh, well, in particular Lex, Lexington had
some.
613 "Harward, Sonya" (457645056)
01:26:57.099 --> 01:27:00.489
Problems 1997 with its bookkeeping.
614 "Harward, Sonya" (457645056)

01:27:00.489 --> 01:27:05.739
You will see that, uh, in in the slides, uh, some of the other categories, I think that.

615 "Harward, Sonya" (457645056)
01:27:05.739 --> 01:27:09.249
Very difficult to have a nice.

616 "Harward, Sonya" (457645056)
01:27:09.249 --> 01:27:12.459
Assignment made, and so we had had some variability.

617 "Harward, Sonya" (457645056)
01:27:12.459 --> 01:27:16.479
And the other thing I would say is we are going to be looking at.

618 "Harward, Sonya" (457645056)
01:27:16.479 --> 01:27:21.399
To sort of standardize things at per capita spending, how much spending.

619 "Harward, Sonya" (457645056)
01:27:21.399 --> 01:27:28.779
Per person, and, um, that's something that, uh, we think is going to be a.

620 "Harward, Sonya" (457645056)
01:27:28.779 --> 01:27:32.049
Particularly important, uh, and we'll come to that at the end of.

621 "Harward, Sonya" (457645056)
01:27:32.049 --> 01:27:36.369
When we think about this, so I'm going to show these these are kind of messy.

622 "Harward, Sonya" (457645056)
01:27:36.369 --> 01:27:39.729
I think it's probably something you want to look at. There'll be a lot of.

623 "Harward, Sonya" (457645056)
01:27:39.729 --> 01:27:43.419
Because we are comparing with a number of cities.

624 "Harward, Sonya" (457645056)
01:27:43.419 --> 01:27:46.719
Here, and we'll try to highlight.

625 "Harward, Sonya" (457645056)
01:27:46.719 --> 01:27:50.649
Right. So here's our 1st, 1 corrections.

626 "Harward, Sonya" (457645056)
01:27:50.649 --> 01:27:53.979
Um, and you can see, um.

627 "Harward, Sonya" (457645056)
01:27:53.979 --> 01:27:58.959
That with there, the dark red Lexington blue.

628 "Harward, Sonya" (457645056)
01:27:58.959 --> 01:28:03.039
I couldn't match with every color. I.

629 "Harward, Sonya" (457645056)
01:28:03.039 --> 01:28:06.819
Problem is we had 2, Tennessee, so I couldn't use.

630 "Harward, Sonya" (457645056)
01:28:06.819 --> 01:28:10.539
Orange for Tennessee I couldn't use red for Indiana.

631 "Harward, Sonya" (457645056)
01:28:10.539 --> 01:28:13.929
Just thinking about their teams now, right?

632 "Harward, Sonya" (457645056)
01:28:13.929 --> 01:28:20.619
Um, so, but I did at least want to get Lexington and logo, right. Okay so you can kind of see here.

633 "Harward, Sonya" (457645056)
01:28:20.619 --> 01:28:26.079
This is corrections focusing in on.

634 "Harward, Sonya" (457645056)
01:28:26.079 --> 01:28:29.739
Uh, uh, low level, you can kind of see.

635 "Harward, Sonya" (457645056)
01:28:29.739 --> 01:28:35.559
That relatively steady you'll notice a dip from 2002 to 2000.

636 "Harward, Sonya" (457645056)
01:28:35.559 --> 01:28:40.029
7, you're gonna see this in several, the expenditure categories.

637 "Harward, Sonya" (457645056)
01:28:40.029 --> 01:28:45.789
We're going to talk at the end about what might be some explanation for that. It does coincide.

638 "Harward, Sonya" (457645056)
01:28:45.789 --> 01:28:48.999
With merger, but I think there's more to it.

639 "Harward, Sonya" (457645056)
01:28:48.999 --> 01:28:53.379
That all right, Louisville is on the lower end of the expenditures on this.

640 "Harward, Sonya" (457645056)
01:28:53.379 --> 01:28:58.299
It's not the lowest, but maybe in the lower half and again, you're going to kind of see a.

641 "Harward, Sonya" (457645056)
01:29:02.109 --> 01:29:05.619
Um, okay, fire protection.

642 "Harward, Sonya" (457645056)
01:29:05.619 --> 01:29:09.669
All right a couple things here. All right, you'll see.

643 "Harward, Sonya" (457645056)
01:29:09.669 --> 01:29:15.339
Lexington all right this can't be correct that looks like about 5 dollars.

644 "Harward, Sonya" (457645056)
01:29:15.339 --> 01:29:21.339
Capita in 1997, these are 2022 dollars. We've corrected for inflation.

645 "Harward, Sonya" (457645056)
01:29:21.339 --> 01:29:25.299
Obviously bad data. All right now, you you do notice.

646 "Harward, Sonya" (457645056)
01:29:25.299 --> 01:29:31.149
Uh, in this 1, a real bunching of most of the other.

647 "Harward, Sonya" (457645056)

01:29:31.149 --> 01:29:36.189
Um, uh, cities and, and I should say, by the way, when I talk about city,
we are.

648 "Harward, Sonya" (457645056)
01:29:36.189 --> 01:29:42.819
Aggregating it's really the county, and we are aggregating all
governments within the county.

649 "Harward, Sonya" (457645056)
01:29:42.819 --> 01:29:47.499
With the exception of the school district, so that city that's county.

650 "Harward, Sonya" (457645056)
01:29:47.499 --> 01:29:51.369
That special districts townships if.

651 "Harward, Sonya" (457645056)
01:29:51.369 --> 01:29:55.419
And so on, they're all aggregated together and we're dividing among.

652 "Harward, Sonya" (457645056)
01:29:55.419 --> 01:29:59.079
The total population of the county, so we're not getting added.

653 "Harward, Sonya" (457645056)
01:29:59.079 --> 01:30:03.339
Distributional issue we're not talking about who in the county.

654 "Harward, Sonya" (457645056)
01:30:03.339 --> 01:30:06.339
What part of the county is getting this and who's getting that.

655 "Harward, Sonya" (457645056)
01:30:06.339 --> 01:30:10.029
This is just averaging across everybody in the county.

656 "Harward, Sonya" (457645056)
01:30:10.029 --> 01:30:17.319
Okay, now the 1 thing I might mention, you'll see, I have a note there
about fire.

657 "Harward, Sonya" (457645056)
01:30:17.319 --> 01:30:23.619
In Louisville, um, that, uh, this is ended in 2000.

658 "Harward, Sonya" (457645056)
01:30:23.619 --> 01:30:29.139
17, uh, my understanding is that, uh, uh, quite a significant.

659 "Harward, Sonya" (457645056)
01:30:29.139 --> 01:30:33.249
Expansion suburban of fire, and that just is not captured in.

660 "Harward, Sonya" (457645056)
01:30:33.249 --> 01:30:39.639
Yes, and so that may change things if we were to look at say, for
example, 2022. okay.

661 "Harward, Sonya" (457645056)
01:30:39.639 --> 01:30:43.329
Again, uh, uh, you can see this.

662 "Harward, Sonya" (457645056)
01:30:43.329 --> 01:30:49.449
Okay, libraries, um, and again across all of the, um.

663 "Harward, Sonya" (457645056)
01:30:49.449 --> 01:30:55.779
Uh, the county just aggregating across and, um, you can see.

664 "Harward, Sonya" (457645056)
01:30:55.779 --> 01:31:00.699
Has a downward trend a bit after 2002.

665 "Harward, Sonya" (457645056)
01:31:00.699 --> 01:31:04.179
Uh, down at the bottom.

666 "Harward, Sonya" (457645056)
01:31:04.179 --> 01:31:07.659
Another data error for Lexington clearly.

667 "Harward, Sonya" (457645056)
01:31:07.659 --> 01:31:12.339
Um, but again, this kind of gives us a little bit of perspective.

668 "Harward, Sonya" (457645056)
01:31:12.339 --> 01:31:17.829
On the trends there you can see even in and these are current expenditures.

669 "Harward, Sonya" (457645056)
01:31:17.829 --> 01:31:22.299
Even current expenditures are rather erratic for for.

670 "Harward, Sonya" (457645056)
01:31:22.299 --> 01:31:25.929
Some of these cities.

671 "Harward, Sonya" (457645056)
01:31:25.929 --> 01:31:29.499
City county. Okay.

672 "Harward, Sonya" (457645056)
01:31:29.499 --> 01:31:33.879
So, if any questions here, your, um.

673 "Harward, Sonya" (457645056)
01:31:33.879 --> 01:31:37.839
I'm happy to answer, but really, uh, we are kind of just.

674 "Harward, Sonya" (457645056)
01:31:37.839 --> 01:31:41.319
Taking what the census of governments gave us.

675 "Harward, Sonya" (457645056)
01:31:41.319 --> 01:31:47.169
To do this part of this. Okay. Parks and recreation.

676 "Harward, Sonya" (457645056)
01:31:47.169 --> 01:31:53.169
All right again, um, is down at the bottom of.

677 "Harward, Sonya" (457645056)
01:31:53.169 --> 01:31:59.289
Again, we've got a dip, uh, with a rise back from 2012 to 2000.

678 "Harward, Sonya" (457645056)
01:31:59.289 --> 01:32:03.399
Uh, 17, you'll notice that Lexington.

679 "Harward, Sonya" (457645056)
01:32:03.399 --> 01:32:07.839
Maybe has somewhat of a similar pattern, but a little sharper increase there.

680 "Harward, Sonya" (457645056)
01:32:07.839 --> 01:32:12.219
Oh, uh, so again, parks and recreation.

681 "Harward, Sonya" (457645056)

01:32:17.169 --> 01:32:21.609
And, uh, police okay.
682 "Harward, Sonya" (457645056)
01:32:21.609 --> 01:32:24.759
Again, that's sort of similar pattern.
683 "Harward, Sonya" (457645056)
01:32:24.759 --> 01:32:28.209
From 2002 to 2000.
684 "Harward, Sonya" (457645056)
01:32:28.209 --> 01:32:31.569
7, a recovery, um.
685 "Harward, Sonya" (457645056)
01:32:31.569 --> 01:32:34.689
An increase a back up.
686 "Harward, Sonya" (457645056)
01:32:34.689 --> 01:32:39.669
It's a kind of the level in inflation adjusted dollars.
687 "Harward, Sonya" (457645056)
01:32:39.669 --> 01:32:43.539
Uh, to what was in, say, 9,997, if.
688 "Harward, Sonya" (457645056)
01:32:43.539 --> 01:32:47.169
2002, all right again, uh, lower.
689 "Harward, Sonya" (457645056)
01:32:47.169 --> 01:32:51.009
Along with Lexington and Indiana.
690 "Harward, Sonya" (457645056)
01:32:51.009 --> 01:32:54.459
In Indianapolis. Okay. So then.
691 "Harward, Sonya" (457645056)
01:32:54.459 --> 01:32:59.049
No, surprise here if we some, those we kind of see.
692 "Harward, Sonya" (457645056)
01:32:59.049 --> 01:33:02.229
A, uh, what we would.
693 "Harward, Sonya" (457645056)
01:33:02.229 --> 01:33:07.239
We've seen in several of the other ones what looks like a focusing again
on Louisville.
694 "Harward, Sonya" (457645056)
01:33:07.239 --> 01:33:11.049
Line from 2002 to 2007.
695 "Harward, Sonya" (457645056)
01:33:11.049 --> 01:33:18.039
A slight increase since then, but but down at the bottom similar to
Lexington.
696 "Harward, Sonya" (457645056)
01:33:18.039 --> 01:33:21.279
Uh, in terms of, uh, uh.
697 "Harward, Sonya" (457645056)
01:33:21.279 --> 01:33:26.499
What we see another thing to point out here is consolidate.
698 "Harward, Sonya" (457645056)
01:33:26.499 --> 01:33:31.599

Versus, uh, uh, merged, uh, governments versus.
699 "Harward, Sonya" (457645056)
01:33:31.599 --> 01:33:34.629
Ones that are, you can kind of see Cincinnati.
700 "Harward, Sonya" (457645056)
01:33:34.629 --> 01:33:39.669
At the top there, Memphis, Birmingham consolidate.
701 "Harward, Sonya" (457645056)
01:33:39.669 --> 01:33:43.809
Lexington, Louisville, Indianapolis, Nashville, and so.
702 "Harward, Sonya" (457645056)
01:33:43.809 --> 01:33:48.669
That may be something there as well. Okay. Now.
703 "Harward, Sonya" (457645056)
01:33:48.669 --> 01:33:52.959
Here's something I think that that you remember these, these are.
704 "Harward, Sonya" (457645056)
01:33:52.959 --> 01:33:58.569
Spending per person. Okay.
705 "Harward, Sonya" (457645056)
01:33:58.569 --> 01:34:01.779
Okay, so here, if we're thinking about trends here.
706 "Harward, Sonya" (457645056)
01:34:01.779 --> 01:34:07.749
And there's sort of 2 things to think about the right the spending per
person. Depends upon.
707 "Harward, Sonya" (457645056)
01:34:07.749 --> 01:34:11.439
How much does the total spending in that county change?
708 "Harward, Sonya" (457645056)
01:34:11.439 --> 01:34:15.579
And how does the population change? Okay?
709 "Harward, Sonya" (457645056)
01:34:15.579 --> 01:34:21.849
And so, uh, uh, you know, you could have pretty similar trends in, say,
total spending.
710 "Harward, Sonya" (457645056)
01:34:21.849 --> 01:34:25.539
Maybe a steady growth rate in total spending. Your budget goes up.
711 "Harward, Sonya" (457645056)
01:34:25.539 --> 01:34:29.529
By 5% every year. All right.
712 "Harward, Sonya" (457645056)
01:34:29.529 --> 01:34:34.719
Well, what might change when we compare 2 cities with the same things is.
713 "Harward, Sonya" (457645056)
01:34:34.719 --> 01:34:38.799
Suppose there's a city that high population growth um.
714 "Harward, Sonya" (457645056)
01:34:38.799 --> 01:34:42.489
That's going to decrease per capita spending. All right.
715 "Harward, Sonya" (457645056)
01:34:42.489 --> 01:34:47.649

More people to spread it along in contrast. Think about 1 that actually has a.

716 "Harward, Sonya" (457645056)

01:34:47.649 --> 01:34:50.949

The population decrease. Okay.

717 "Harward, Sonya" (457645056)

01:34:50.949 --> 01:34:54.039

That's going to in it, but but a steady growth in.

718 "Harward, Sonya" (457645056)

01:34:54.039 --> 01:34:57.279

Total spending, but it's that population decreases big enough.

719 "Harward, Sonya" (457645056)

01:34:57.279 --> 01:35:00.909

You're actually going to get an increase in per capita spending.

720 "Harward, Sonya" (457645056)

01:35:00.909 --> 01:35:06.339

Okay, so, uh, here's what we did.

721 "Harward, Sonya" (457645056)

01:35:06.339 --> 01:35:10.929

To try to get at some of this here is population.

722 "Harward, Sonya" (457645056)

01:35:10.929 --> 01:35:16.899

Growth and so what I have here is, you'll see 1 in 1992 so here's the way to.

723 "Harward, Sonya" (457645056)

01:35:16.899 --> 01:35:22.299

Think about it, it is a population of that county that the city is in.

724 "Harward, Sonya" (457645056)

01:35:22.299 --> 01:35:27.369

Relative to 1992, so, in other words, in.

725 "Harward, Sonya" (457645056)

01:35:27.369 --> 01:35:31.659

1017 is 40%.

726 "Harward, Sonya" (457645056)

01:35:31.659 --> 01:35:37.479

Has a population is increased, you see the 1.440% relative to what it had.

727 "Harward, Sonya" (457645056)

01:35:37.479 --> 01:35:41.079

In 1992, that's Jefferson County population.

728 "Harward, Sonya" (457645056)

01:35:41.079 --> 01:35:44.499

All right. Okay. So, um.

729 "Harward, Sonya" (457645056)

01:35:44.499 --> 01:35:53.229

We could back go back and be more formal about this. But what what I think is emerging look at look at 2002 to 2007.

730 "Harward, Sonya" (457645056)

01:35:53.229 --> 01:35:59.079

Uh, for approval, um, right. That's the steepest increase. You'll actually find.

731 "Harward, Sonya" (457645056)

01:35:59.079 --> 01:36:04.659

Anywhere on that figure right? And per biggest percentage change in population.

732 "Harward, Sonya" (457645056)

01:36:04.659 --> 01:36:08.139

Was, uh, uh, uh.

733 "Harward, Sonya" (457645056)

01:36:08.139 --> 01:36:14.649

From Louisville from 2002 to 2007. all right. So what what might explain these dips.

734 "Harward, Sonya" (457645056)

01:36:14.649 --> 01:36:21.309

That we had from 2002 to 2007 that you saw earlier, dip there, right? In the total.

735 "Harward, Sonya" (457645056)

01:36:21.309 --> 01:36:24.639

Well, excuse me.

736 "Harward, Sonya" (457645056)

01:36:24.639 --> 01:36:30.129

The spending per person, what that really may be about is.

737 "Harward, Sonya" (457645056)

01:36:30.129 --> 01:36:33.219

Fast population growth. Okay if you look at.

738 "Harward, Sonya" (457645056)

01:36:36.369 --> 01:36:42.819

In in spending per person, Hamilton County's population was was.

739 "Harward, Sonya" (457645056)

01:36:42.819 --> 01:36:46.029

Increasing well has been decreasing from.

740 "Harward, Sonya" (457645056)

01:36:46.029 --> 01:36:51.999

Uh, longer than 9,992. so, um.

741 "Harward, Sonya" (457645056)

01:36:51.999 --> 01:36:56.769

You know, when we talk about, I think particular thinking about increases in in.

742 "Harward, Sonya" (457645056)

01:36:56.769 --> 01:37:02.259

In spending in lieu of all and we see this kind of or excuse me decreases.

743 "Harward, Sonya" (457645056)

01:37:02.259 --> 01:37:06.399

Uh, for example, between 2002 and 2007.

744 "Harward, Sonya" (457645056)

01:37:06.399 --> 01:37:09.579

I think probably a lot of that has to do with.

745 "Harward, Sonya" (457645056)

01:37:09.579 --> 01:37:13.509

Um, this, uh, passed increase.

746 "Harward, Sonya" (457645056)

01:37:13.509 --> 01:37:16.839

The population about almost a.

747 "Harward, Sonya" (457645056)

01:37:16.839 --> 01:37:21.429

Probably looking at that figure, 20% 25%.

748 "Harward, Sonya" (457645056)
01:37:21.429 --> 01:37:28.989
An increase in population between those 5 years. Okay. And that's that's
in the county so that's not changing.

749 "Harward, Sonya" (457645056)
01:37:28.989 --> 01:37:32.199
Uh, what it means to be in Louisville that's Jefferson County.

750 "Harward, Sonya" (457645056)
01:37:32.199 --> 01:37:36.429
Patient, so, um, uh, so I, I think that's, um.

751 "Harward, Sonya" (457645056)
01:37:36.429 --> 01:37:39.819
If we're sort of thinking about trying to understand.

752 "Harward, Sonya" (457645056)
01:37:39.819 --> 01:37:43.269
Um, what we see in.

753 "Harward, Sonya" (457645056)
01:37:43.269 --> 01:37:47.139
Terms of spending per person, which is kind of a natural way to look.

754 "Harward, Sonya" (457645056)
01:37:47.139 --> 01:37:50.319
Look at it, a lot of what makes.

755 "Harward, Sonya" (457645056)
01:37:50.319 --> 01:37:53.409
Blaine trends in different trends in.

756 "Harward, Sonya" (457645056)
01:37:53.409 --> 01:37:58.659
Across these these areas, maybe the population, their growth growth and I
think.

757 "Harward, Sonya" (457645056)
01:37:58.659 --> 01:38:01.899
Uh, kind of move again.

758 "Harward, Sonya" (457645056)
01:38:01.899 --> 01:38:06.759
In some sense may, maybe if we think about the line and.

759 "Harward, Sonya" (457645056)
01:38:06.759 --> 01:38:15.669
It's like the increase after 2007 slight increase in some sense that
might be total spending catching up with the population increase that.

760 "Harward, Sonya" (457645056)
01:38:15.669 --> 01:38:22.269
Happened, uh, between 2002 and in 2007 so that's all. I wanted.

761 "Harward, Sonya" (457645056)
01:38:22.269 --> 01:38:26.439
To show today, I think it might, you know.

762 "Harward, Sonya" (457645056)
01:38:26.439 --> 01:38:32.649
If you if you have questions, I'm certainly happy to to answer those now
or you want to.

763 "Harward, Sonya" (457645056)
01:38:32.649 --> 01:38:36.039
Want to, uh, look over this and and think more.

764 "Harward, Sonya" (457645056)
01:38:36.039 --> 01:38:39.549

I'm happy to happy to to correspond later.
765 "Harward, Sonya" (457645056)
01:38:44.619 --> 01:38:51.609
A question could, um, could you clarify the.
766 "Harward, Sonya" (457645056)
01:38:51.609 --> 01:38:58.059
Index on the population. Yeah. So so so what that index in the population is.
767 "Harward, Sonya" (457645056)
01:38:58.059 --> 01:39:01.119
Is it's basically say, for example.
768 "Harward, Sonya" (457645056)
01:39:01.119 --> 01:39:07.149
The population in Aflac of Louisville, in in.
769 "Harward, Sonya" (457645056)
01:39:07.149 --> 01:39:10.359
Uh, 2017 looks.
770 "Harward, Sonya" (457645056)
01:39:10.359 --> 01:39:16.089
It's about 1.35 or something like that let's say, 1.4 to make it simpler.
That is a.
771 "Harward, Sonya" (457645056)
01:39:16.089 --> 01:39:26.919
That is a population in 2017 divided by population in 1992, which means it's 40% higher than it was in 19.
772 "Harward, Sonya" (457645056)
01:39:26.919 --> 01:39:30.699
Uh, 92 so are you saying that.
773 "Harward, Sonya" (457645056)
01:39:30.699 --> 01:39:34.269
Grew just as fast as Nashville and Lexington. It's yes.
774 "Harward, Sonya" (457645056)
01:39:34.269 --> 01:39:37.599
That's what we're saying. Jefferson County grew.
775 "Harward, Sonya" (457645056)
01:39:37.599 --> 01:39:42.789
Now, that's not the metropolitan area, but Jefferson County grew at at the same rate as.
776 "Harward, Sonya" (457645056)
01:39:42.789 --> 01:39:48.099
Uh, Davidson and Fayette County.
777 "Harward, Sonya" (457645056)
01:39:48.099 --> 01:39:54.519
It's a percentage increase, but it's a percentage increase, but it's not actual growth. It's not actual numbers.
778 "Harward, Sonya" (457645056)
01:39:54.519 --> 01:39:58.659
Yeah, yeah, it's real numbers. I'm taking the population.
779 "Harward, Sonya" (457645056)
01:39:58.659 --> 01:40:04.809
And and I'm adjusting the base. Right? So if you're talking about the actual number increase.
780 "Harward, Sonya" (457645056)
01:40:04.809 --> 01:40:08.649

So, here here is the Jefferson County population here. Okay.
781 "Harward, Sonya" (457645056)
01:40:08.649 --> 01:40:13.269
But you're right, Nashville, Nashville, in terms of number of people,
it's.
782 "Harward, Sonya" (457645056)
01:40:13.269 --> 01:40:17.169
Starting with more people, right? So, 10% increase in the.
783 "Harward, Sonya" (457645056)
01:40:17.169 --> 01:40:20.499
Population of Nashville, relative to a 10% increase.
784 "Harward, Sonya" (457645056)
01:40:20.499 --> 01:40:24.279
The population of Lexington much smaller Davidson county.
785 "Harward, Sonya" (457645056)
01:40:24.279 --> 01:40:27.519
Um, pay it. Yeah, that would be more people.
786 "Harward, Sonya" (457645056)
01:40:27.519 --> 01:40:32.259
Okay, so yeah, yeah and and, uh, but but.
787 "Harward, Sonya" (457645056)
01:40:32.259 --> 01:40:36.519
It's certainly saying that Louisville Jefferson County is.
788 "Harward, Sonya" (457645056)
01:40:36.519 --> 01:40:40.119
It has many more people than Fayette County saying that more people.
789 "Harward, Sonya" (457645056)
01:40:40.119 --> 01:40:43.869
Have have come, uh, the population.
790 "Harward, Sonya" (457645056)
01:40:43.869 --> 01:40:47.709
Uh, Jefferson counties increased more than.
791 "5026****18" (629103616)
01:40:53.799 --> 01:40:57.969
I'd like to see the underlying numbers if I could, because I'm on
national website right now.
792 "5026****18" (629103616)
01:40:57.969 --> 01:41:01.359
And they claim to have grown 16% in the last 10 years.
793 "5026****18" (629103616)
01:41:01.359 --> 01:41:04.689
Louisville has a paltry growth of 40,000 people total.
794 "5026****18" (629103616)
01:41:04.689 --> 01:41:07.839
From 1 sentence to the next reason I know that is because I know a lot
about.
795 "5026****18" (629103616)
01:41:07.839 --> 01:41:11.859
Redistricting, so I can't, it seems to me that.
796 "5026****18" (629103616)
01:41:11.859 --> 01:41:15.639
Statistic that says the global growth is better than national.
797 "5026****18" (629103616)
01:41:15.639 --> 01:41:21.639

Anywhere near on par is suspect immediately to me. So I want to see the underlying data on that.

798 "5026****18" (629103616)

01:41:21.639 --> 01:41:24.789

And are there other things you said? Oh, well, I mean.

799 "Harward, Sonya" (457645056)

01:41:24.789 --> 01:41:33.129

Here's Jefferson County. This is the Bureau of economic analysis, which polls.

800 "Harward, Sonya" (457645056)

01:41:33.129 --> 01:41:38.529

Data from the the census so, I mean, if you.

801 "Harward, Sonya" (457645056)

01:41:41.799 --> 01:41:47.199

Longer span than that. Um, but we were, you know, we saw the jump from.

802 "Harward, Sonya" (457645056)

01:41:47.199 --> 01:41:53.529

1002 right to 2007.

803 "Harward, Sonya" (457645056)

01:41:53.529 --> 01:41:59.199

Um, so it it certainly more than that. Um, but, I mean, yeah, we can sort of.

804 "Harward, Sonya" (457645056)

01:41:59.199 --> 01:42:04.689

We can certainly provide the raw numbers, and we can put this in terms of rather than percentages. I've done.

805 "Harward, Sonya" (457645056)

01:42:04.689 --> 01:42:10.059

Um, uh, we can put it in in the actual population in.

806 "Harward, Sonya" (457645056)

01:42:10.059 --> 01:42:13.149

Increases but if you're thinking about.

807 "Harward, Sonya" (457645056)

01:42:13.149 --> 01:42:17.229

The spending per capita spending how much you spend it's really the.

808 "Harward, Sonya" (457645056)

01:42:17.229 --> 01:42:21.099

Percentage that they drive, but we can certainly do that. Um.

809 "Harward, Sonya" (457645056)

01:42:21.099 --> 01:42:27.429

I'm pretty confident in the data that we don't get better population data than the census.

810 "Harward, Sonya" (457645056)

01:42:27.429 --> 01:42:33.489

Um, so, uh, but, yeah, I mean, we can add a slide that that looks at, em, and.

811 "Harward, Sonya" (457645056)

01:42:33.489 --> 01:42:36.789

Raw numbers his has has David's.

812 "Harward, Sonya" (457645056)

01:42:36.789 --> 01:42:40.299

County added more population than Jefferson. Sure. Uh.

813 "5026****18" (629103616)

01:42:40.299 --> 01:42:45.879

It has more population start. Yeah. And the only reason it's important for our purposes.

814 "5026****18" (629103616)
01:42:45.879 --> 01:42:50.469

Looks like, it's very low in amount of spending per capita.

815 "5026****18" (629103616)
01:42:50.469 --> 01:42:53.559

Compared to the comparative the cities we compared it again.

816 "5026****18" (629103616)
01:42:53.559 --> 01:42:56.889

Um, and so that's where that's the only reason to become.

817 "Harward, Sonya" (457645056)
01:42:56.889 --> 01:43:00.579

Important, I think for our purposes, well, that won't change.

818 "Harward, Sonya" (457645056)
01:43:00.579 --> 01:43:07.119

That doesn't change I mean, we're taking the total spending of all governments in Jefferson.

819 "Harward, Sonya" (457645056)
01:43:07.119 --> 01:43:13.719

County, um, and we're providing by the total population and that that's not a percentage.

820 "5026****18" (629103616)
01:43:13.719 --> 01:43:18.249

So, here, here's my, here's my actual question on the substance of it.

821 "5026****18" (629103616)
01:43:18.249 --> 01:43:21.909

I thought I heard you say all special districts were included and then I heard.

822 "5026****18" (629103616)
01:43:21.909 --> 01:43:25.899

You said, I may have met with some stuff then I heard you say that you understand that.

823 "5026****18" (629103616)
01:43:25.899 --> 01:43:32.559

The suburban areas, not suburban cities, because they're not the ones to do it, but there's fire protection district.

824 "5026****18" (629103616)
01:43:32.559 --> 01:43:36.579

In the suburbs that have had significantly increase spending on fire.

825 "5026****18" (629103616)
01:43:36.579 --> 01:43:43.809

And I thought I heard you say that was included and then I heard you say it wasn't so it wasn't the increase in.

826 "Harward, Sonya" (457645056)
01:43:43.809 --> 01:43:48.789

Pending post 2017 is not included.

827 "5026****18" (629103616)
01:43:48.789 --> 01:43:52.269

Okay, I'd like to see if we can get that in there. And then the other thing is.

828 "5026****18" (629103616)
01:43:52.269 --> 01:43:56.049

Obviously, we have to subsidize our our, our county.

829 "5026****18" (629103616)
01:43:56.049 --> 01:43:59.319
In policing as well, and that's done and significantly out in.
830 "5026****18" (629103616)
01:43:59.319 --> 01:44:03.639
The suburban cities, which are only in the East end, which has 20.
831 "5026****18" (629103616)
01:44:03.639 --> 01:44:06.819
Taking those 40 minutes and that's 20. Linda. Now have 20.
832 "5026****18" (629103616)
01:44:06.819 --> 01:44:11.139
Police officers, so that should also be included in the.
833 "Harward, Sonya" (457645056)
01:44:11.139 --> 01:44:14.559
Spending of the cities and the.
834 "Harward, Sonya" (457645056)
01:44:14.559 --> 01:44:17.979
Uh, townships, special districts.
835 "Harward, Sonya" (457645056)
01:44:17.979 --> 01:44:22.239
County are all of anything within Jefferson County is.
836 "Harward, Sonya" (457645056)
01:44:22.239 --> 01:44:27.549
Now, what we aren't getting at is you suggested is, is cross subsidy.
837 "Harward, Sonya" (457645056)
01:44:27.549 --> 01:44:31.239
That is not what this is about. This is the total spending.
838 "Harward, Sonya" (457645056)
01:44:31.239 --> 01:44:36.009
Within the county adding all of the cities adding the county govern.
839 "Harward, Sonya" (457645056)
01:44:36.009 --> 01:44:39.429
Adding the special districts, um.
840 "Harward, Sonya" (457645056)
01:44:39.429 --> 01:44:43.959
Dividing by the total population within the county.
841 "Harward, Sonya" (457645056)
01:44:43.959 --> 01:44:49.239
So, yeah, we can't address who's paying for it who's paying and who's
getting the services.
842 "Harward, Sonya" (457645056)
01:44:49.239 --> 01:44:55.569
And we can't address that for for we can't address that for any of these
other cities. So.
843 "Harward, Sonya" (457645056)
01:44:55.569 --> 01:45:01.179
Uh, part of your point I think is is certainly true that what is being
paid for.
844 "Harward, Sonya" (457645056)
01:45:01.179 --> 01:45:06.489
Or in cities outside the urban service district, versus what they get in.
845 "Harward, Sonya" (457645056)
01:45:06.489 --> 01:45:10.959
Services or expenditures no, this is not addressing that that.

846 "Harward, Sonya" (457645056)
01:45:10.959 --> 01:45:15.729
That it's not addressing for nor is it addressing it for the other ones?
847 "5026****18" (629103616)
01:45:15.729 --> 01:45:20.469
I'll just say it's a direct question. It doesn't have any value on it,
any values attached to it, but.
848 "5026****18" (629103616)
01:45:20.469 --> 01:45:24.789
Is the money that the fire protection district included in this day, or
not?
849 "Harward, Sonya" (457645056)
01:45:24.789 --> 01:45:32.169
Yes, it is included up through 2017 through 2017. yeah.
850 "5026****18" (629103616)
01:45:32.169 --> 01:45:36.519
For the VMs, that's when the that's when the explosion of growth.
851 "Harward, Sonya" (457645056)
01:45:36.519 --> 01:45:42.309
Wasn't about that time. Well, that that's yes, yes, yes. As was noted in,
in, in in.
852 "Harward, Sonya" (457645056)
01:45:42.309 --> 01:45:45.429
The slide, thank you. Um.
853 "Harward, Sonya" (457645056)
01:45:45.429 --> 01:45:51.969
Yeah, so when 2022 data peers from the census of government, we would
have a.
854 "Sean Dreisbach" (4074146816)
01:45:55.749 --> 01:46:07.659
Just, I'll just add something there.
855 "Harward, Sonya" (457645056)
01:46:07.659 --> 01:46:11.589
From a fellow gig that I had not.
856 "Harward, Sonya" (457645056)
01:46:11.589 --> 01:46:14.709
Looked at this data before this way so I found it fascinating.
857 "Harward, Sonya" (457645056)
01:46:14.709 --> 01:46:17.739
And and the thing that jumped out me at a high level.
858 "Harward, Sonya" (457645056)
01:46:17.739 --> 01:46:21.489
Is that regardless of all these qualifiers?
859 "Harward, Sonya" (457645056)
01:46:21.489 --> 01:46:24.879
Post pretty low expenditures.
860 "Harward, Sonya" (457645056)
01:46:24.879 --> 01:46:29.679
Per capita you can talk about, you know, this 5 year, period versus that.
861 "Harward, Sonya" (457645056)
01:46:29.679 --> 01:46:34.899
Or the lack of the, uh, the last 5 years, but these charts for these.
862 "Harward, Sonya" (457645056)
01:46:34.899 --> 01:46:38.499

Train local public surfaces are showing we spend.
863 "Harward, Sonya" (457645056)
01:46:38.499 --> 01:46:41.919
Generally less per capita than other cities.
864 "Harward, Sonya" (457645056)
01:46:41.919 --> 01:46:46.929
For parks, police, corrections, et cetera. I think it's a big takeaway.
865 "Harward, Sonya" (457645056)
01:46:46.929 --> 01:46:54.039
I didn't I was surprised I'm not surprised.
866 "Harward, Sonya" (457645056)
01:46:54.039 --> 01:46:58.449
I mean, I guess I, I, there's gotta be a correlation.
867 "Harward, Sonya" (457645056)
01:46:58.449 --> 01:47:01.599
Between public expenditures and.
868 "Harward, Sonya" (457645056)
01:47:01.599 --> 01:47:04.959
Growth at least in some part, and we lagged in growth.
869 "Harward, Sonya" (457645056)
01:47:04.959 --> 01:47:10.359
And most of the cities against which you've compared with, so.
870 "Harward, Sonya" (457645056)
01:47:10.359 --> 01:47:15.669
So, in the parks for all study, that was just conductive in the last 2
years.
871 "Harward, Sonya" (457645056)
01:47:15.669 --> 01:47:20.439
There, I mean, it was obviously much lower.
872 "Harward, Sonya" (457645056)
01:47:20.439 --> 01:47:26.109
Like, 40 to 112%, um.
873 "5026****18" (629103616)
01:47:26.109 --> 01:47:34.809
Yeah, was the chairman 1 thing that's really interesting about your point
is if our expenditures are really.
874 "5026****18" (629103616)
01:47:34.809 --> 01:47:39.519
I've always heard that our taxation and locals.
875 "5026****18" (629103616)
01:47:39.519 --> 01:47:43.329
Compared to other cities, if that's if our expenditures are low.
876 "5026****18" (629103616)
01:47:43.329 --> 01:47:46.419
Maybe our taxation is low compared to these other things. I don't know
that I've always.
877 "5026****18" (629103616)
01:47:46.419 --> 01:47:52.539
Hi, but that might change fundamentally how I look at local tax policy
and what.
878 "5026****18" (629103616)
01:47:52.539 --> 01:47:55.659
Well, I may, and maybe my colleagues.
879 "5026****18" (629103616)

01:47:55.659 --> 01:47:59.199
Urge the legislator to allow her to do, or so forth. So this is a.
880 "5026****18" (629103616)
01:47:59.199 --> 01:48:02.829
This could be a pretty explosive finding here.
881 "5026****18" (629103616)
01:48:02.829 --> 01:48:07.149
That I certainly would change my way of thinking about things. So.
882 "5026****18" (629103616)
01:48:07.149 --> 01:48:10.629
I'd like to see our tax revenues also very.
883 "5026****18" (629103616)
01:48:10.629 --> 01:48:13.719
Very low compared to our competitors cities again. Very tough.
884 "Harward, Sonya" (457645056)
01:48:13.719 --> 01:48:17.979
Can do it same data? Same data. We can do it.
885 "5026****18" (629103616)
01:48:17.979 --> 01:48:23.469
And it says that we grow. Okay. And you're gonna have to convince me
because any data that starts from proposition.
886 "5026****18" (629103616)
01:48:23.469 --> 01:48:27.279
A little bit of growing Nashville extremely.
887 "Harward, Sonya" (457645056)
01:48:27.279 --> 01:48:32.499
Suspect to me, can you take so bring it up?
888 "Harward, Sonya" (457645056)
01:48:32.499 --> 01:48:37.299
When you take more just to talk to go just.
889 "Harward, Sonya" (457645056)
01:48:37.299 --> 01:48:45.369
Point out what you said chairman nevus is that when you look at taxes
that include quite a few different types of taxes.
890 "Harward, Sonya" (457645056)
01:48:45.369 --> 01:48:48.789
When I went through and partnered with you about urban studies.
891 "Harward, Sonya" (457645056)
01:48:48.789 --> 01:48:53.319
That came up, uh, with about 3rd highest.
892 "Harward, Sonya" (457645056)
01:48:53.319 --> 01:48:57.519
Tax city among 15 competitive.
893 "Harward, Sonya" (457645056)
01:48:57.519 --> 01:49:01.869
And at that time, we were looking at the local option sales tax. And if
you put that in there.
894 "Harward, Sonya" (457645056)
01:49:01.869 --> 01:49:05.589
I was going to, you know, uh, increase even more so I would I.
895 "Harward, Sonya" (457645056)
01:49:05.589 --> 01:49:09.039
I would contain unless, you know, less things have changed since.
896 "Harward, Sonya" (457645056)

01:49:09.039 --> 01:49:12.669
And we're still probably on the high end of the tax.
897 "Harward, Sonya" (457645056)
01:49:12.669 --> 01:49:16.059
Bracket when you look at, um.
898 "5026****18" (629103616)
01:49:16.059 --> 01:49:21.579
When you look at things in this totality, something's not jabbing right?
If we're.
899 "5026****18" (629103616)
01:49:21.579 --> 01:49:24.789
Highest and tax or protect rate for a person.
900 "5026****18" (629103616)
01:49:24.789 --> 01:49:30.009
But we're the lowest, and we only compare ourselves to 6 others in this
thing. But 6 other, it's pretty fair.
901 "5026****18" (629103616)
01:49:30.009 --> 01:49:36.099
Competitors and we're the lowest of those 7 including us. something's not
Javelin.
902 "Harward, Sonya" (457645056)
01:49:36.099 --> 01:49:40.569
Where is that extra tax money going? Well so.
903 "Harward, Sonya" (457645056)
01:49:40.569 --> 01:49:45.249
I think professor Coombs can speak to this. He is certainly looked at
this.
904 "Harward, Sonya" (457645056)
01:49:45.249 --> 01:49:48.429
But, I mean, 1 of the issue is, of course, state aid.
905 "Harward, Sonya" (457645056)
01:49:48.429 --> 01:49:54.879
Uh, this is expenditures, right? This is expenditures at the local level.
906 "Harward, Sonya" (457645056)
01:49:54.879 --> 01:50:00.129
Where that revenue comes from is not part of what I've just done here.
907 "Harward, Sonya" (457645056)
01:50:00.129 --> 01:50:04.389
To the extent that that that may be generating.
908 "Harward, Sonya" (457645056)
01:50:04.389 --> 01:50:08.049
It's expenditures more by local taxes.
909 "Harward, Sonya" (457645056)
01:50:11.469 --> 01:50:14.949
Uh, local taxes, and when I did a.
910 "Harward, Sonya" (457645056)
01:50:14.949 --> 01:50:18.999
This was actually highlighted, uh, when we did.
911 "Harward, Sonya" (457645056)
01:50:18.999 --> 01:50:24.279
The tax commission for.
912 "Harward, Sonya" (457645056)
01:50:24.279 --> 01:50:27.999
The 1st governor this year and we looked at.

913 "Harward, Sonya" (457645056)
01:50:27.999 --> 01:50:34.779
Taxes and we found the same thing that was referred to that level because
of the occupational license tax. Uh.

914 "Harward, Sonya" (457645056)
01:50:34.779 --> 01:50:40.839
Predominantly, uh, was certainly at 1 of the higher tax, uh, cities that
we found as well.

915 "Harward, Sonya" (457645056)
01:50:40.839 --> 01:50:43.899
So, we can certainly do that and.

916 "Harward, Sonya" (457645056)
01:50:43.899 --> 01:50:49.779
And I think 1 of the points is, you, you may not find a line up that that
low.

917 "Harward, Sonya" (457645056)
01:50:49.779 --> 01:50:55.059
Expenditures does not necessarily mean low, low, low.

918 "Harward, Sonya" (457645056)
01:50:55.059 --> 01:51:00.489
Local taxes, because of the role of state government that may differ
across these states.

919 "Harward, Sonya" (457645056)
01:51:00.489 --> 01:51:03.519
So, but, yeah, we.

920 "Harward, Sonya" (457645056)
01:51:03.519 --> 01:51:08.859
Can do it this is, this is also included. This is just just just the
items that we spent on based on.

921 "Harward, Sonya" (457645056)
01:51:08.859 --> 01:51:11.979
Yeah, what you said those, the parks, the police, the.

922 "Harward, Sonya" (457645056)
01:51:11.979 --> 01:51:16.749
Fire, that's just those areas that include other areas as well. Yeah,
that's right.

923 "Harward, Sonya" (457645056)
01:51:21.429 --> 01:51:26.559
It could, could be we're spending more in that in those areas as well
when we put a great.

924 "Harward, Sonya" (457645056)
01:51:26.559 --> 01:51:31.539
Aggregate up for those areas we can do that. Uh, yeah I'm on. I'm sorry.

925 "Harward, Sonya" (457645056)
01:51:31.539 --> 01:51:38.649
I had 22 things we've already touched 1 on 1. it's to me, this is like
the exercise of sources and uses.

926 "Harward, Sonya" (457645056)
01:51:38.649 --> 01:51:43.119
Go through that, and I'm I'm very intrigued on the sources side and both
the uses.

927 "Harward, Sonya" (457645056)
01:51:43.119 --> 01:51:49.989

Because there's a lot of the fund. Well, there's, there's a lot of tax that is paid through.

928 "Harward, Sonya" (457645056)

01:51:49.989 --> 01:51:53.049

Um, various exercises here, so.

929 "Harward, Sonya" (457645056)

01:51:53.049 --> 01:51:57.219

And I'd be intrigued to know what it's like in the other cities, whether it's.

930 "Harward, Sonya" (457645056)

01:52:01.599 --> 01:52:05.289

Managed within the municipality and then the 2nd thing.

931 "Harward, Sonya" (457645056)

01:52:05.289 --> 01:52:08.769

That I'm just personally interested in as we look at the, um.

932 "Harward, Sonya" (457645056)

01:52:08.769 --> 01:52:13.149

But the, the actual growth in terms of population.

933 "Harward, Sonya" (457645056)

01:52:13.149 --> 01:52:17.889

And we looked at this a little bit before it would be how we could equalize.

934 "Harward, Sonya" (457645056)

01:52:17.889 --> 01:52:23.859

The growth in per capita income and do that as it relates to pure cities as well just to understand that.

935 "Harward, Sonya" (457645056)

01:52:23.859 --> 01:52:28.509

Because that will also factor in to your sources analysis.

936 "Harward, Sonya" (457645056)

01:52:28.509 --> 01:52:34.149

And then also, in terms of where we've seen that growth, what.

937 "Harward, Sonya" (457645056)

01:52:34.149 --> 01:52:41.259

What is that growth? Yeah, let me follow up a little bit here. I mean, the source is yes, we can do. It sounds like we should be doing that.

938 "Harward, Sonya" (457645056)

01:52:41.259 --> 01:52:45.699

Uh, it, it, it'll be the same data source. Uh.

939 "Harward, Sonya" (457645056)

01:52:45.699 --> 01:52:57.249

Now, I think what you said, sort of interest about the per capita income, because there are 2 ways to think about about, I think taxes in particular revenue sources you can think about revenue.

940 "Harward, Sonya" (457645056)

01:52:57.249 --> 01:53:03.729

Per person or per capita, but maybe the more enlightening I give particularly given.

941 "Harward, Sonya" (457645056)

01:53:03.729 --> 01:53:09.159

The corporate role of the occupational license for, uh, uh.

942 "Harward, Sonya" (457645056)

01:53:09.159 --> 01:53:12.309

Approval is, um, taxes per dollar.

943 "Harward, Sonya" (457645056)
01:53:12.309 --> 01:53:17.859
Right and that we would want to take the income into account and.

944 "Harward, Sonya" (457645056)
01:53:17.859 --> 01:53:21.339
We can look at it both ways and.

945 "Harward, Sonya" (457645056)
01:53:21.339 --> 01:53:26.559
To me, I think the more revealing 1 in terms of.

946 "Harward, Sonya" (457645056)
01:53:26.559 --> 01:53:33.129
Behavioral incentives and things how attractive a city is might well be
the, the taxes per dollar.

947 "Harward, Sonya" (457645056)
01:53:33.129 --> 01:53:36.789
Which I also think will begin to correlate back to.

948 "Harward, Sonya" (457645056)
01:53:36.789 --> 01:53:41.409
Where that growth is again, how appealing the city is, because, you know,
the take away.

949 "Harward, Sonya" (457645056)
01:53:44.799 --> 01:53:47.919
Question maybe well, perhaps this is 1 of the.

950 "Harward, Sonya" (457645056)
01:53:50.979 --> 01:53:57.069
And to attract the type of industry and, uh, et cetera that we want. So,
yeah.

951 "Harward, Sonya" (457645056)
01:53:57.069 --> 01:54:02.619
I can follow up to 1 on 1 of these earlier questions that link to that
is, you know, I think that's an.

952 "Harward, Sonya" (457645056)
01:54:02.619 --> 01:54:09.459
Interesting comparison that what we may be thinking about when we think
about high taxes and and I'm not quite sure what studies.

953 "Harward, Sonya" (457645056)
01:54:09.459 --> 01:54:12.699
References maybe high taxes per dollar.

954 "Harward, Sonya" (457645056)
01:54:12.699 --> 01:54:18.279
How much of each dollar we earn it goes to local.

955 "Harward, Sonya" (457645056)
01:54:18.279 --> 01:54:21.609
Taxes we could be very high in that.

956 "Harward, Sonya" (457645056)
01:54:21.609 --> 01:54:27.009
And low in taxes per person, because we have lower average income.

957 "Harward, Sonya" (457645056)
01:54:27.009 --> 01:54:33.759
And so we can get kind of 2 different approaches, and you can kind of
choose what you think is more meaningful.

958 "Harward, Sonya" (457645056)
01:54:33.759 --> 01:54:40.059

Um, and we can certainly give you that option. Well, can I ask another question? And that is.

959 "Harward, Sonya" (457645056)

01:54:40.059 --> 01:54:46.779

I guess I'm trying to understand what conclusions we were to draw from from this analysis.

960 "Harward, Sonya" (457645056)

01:54:51.339 --> 01:54:56.049

And I would wait to assume then that that.

961 "Harward, Sonya" (457645056)

01:54:56.049 --> 01:55:01.689

At the entire universe of expenditures is based on.

962 "Harward, Sonya" (457645056)

01:55:01.689 --> 01:55:05.559

The taxes, et cetera.

963 "Harward, Sonya" (457645056)

01:55:05.559 --> 01:55:09.219

Generated here in the county no, we can't. We can't.

964 "Harward, Sonya" (457645056)

01:55:09.219 --> 01:55:14.139

Okay, so then what is the, what is the, the importance of the.

965 "Harward, Sonya" (457645056)

01:55:14.139 --> 01:55:19.899

The impact, for example, of those additional expenditures, for example.

966 "Harward, Sonya" (457645056)

01:55:19.899 --> 01:55:24.489

Um, he was made a point about.

967 "Harward, Sonya" (457645056)

01:55:24.489 --> 01:55:31.749

Um, comparing a local to Nashville, Nashville, as I recall, is the capital, um.

968 "Harward, Sonya" (457645056)

01:55:31.749 --> 01:55:37.899

Tennessee, and my assumption would be that some significant portion of the expenditures or the income.

969 "Harward, Sonya" (457645056)

01:55:42.039 --> 01:55:48.399

And I'm curious whether or not, how do you factor things like that into these analysis?

970 "Harward, Sonya" (457645056)

01:55:48.399 --> 01:55:53.649

I know it's not in your analysis I meant in in the whole question of the relevance of local.

971 "Harward, Sonya" (457645056)

01:55:53.649 --> 01:56:01.149

Taxes to local expenditures and growth associated with it. Okay. Well, the.

972 "Harward, Sonya" (457645056)

01:56:01.149 --> 01:56:06.759

You're you're talking about growth and income growth and population and things like that. Yeah.

973 "Harward, Sonya" (457645056)

01:56:06.759 --> 01:56:10.929

Uh, well, there's certainly a large literature that tries tries to.

974 "Harward, Sonya" (457645056)
01:56:15.759 --> 01:56:21.249
Um, you know, in terms of thinking about, uh, as you mentioned.

975 "Harward, Sonya" (457645056)
01:56:21.249 --> 01:56:26.709
And maybe Nashville, which has significantly higher expenditures.

976 "Harward, Sonya" (457645056)
01:56:26.709 --> 01:56:31.929
Um, well has higher expenditures in Louisville. Maybe part of that is.

977 "Harward, Sonya" (457645056)
01:56:31.929 --> 01:56:37.989
Because as you sort of suggest, some of that may be coming from, uh.

978 "Harward, Sonya" (457645056)
01:56:37.989 --> 01:56:41.889
More state aid to Nashville, because it is a capital could be.

979 "Harward, Sonya" (457645056)
01:56:41.889 --> 01:56:45.549
I mean, we can certainly look at that. Uh, we can, we can.

980 "Harward, Sonya" (457645056)
01:56:45.549 --> 01:56:49.899
See, how much is sort of their own source revenue? Um.

981 "Harward, Sonya" (457645056)
01:56:49.899 --> 01:56:54.699
I mean, I raised, I raised the question only to the extent though that we are to.

982 "Harward, Sonya" (457645056)
01:56:54.699 --> 01:56:59.379
Let's say, make some policy decisions based on, on the data that we're.

983 "Harward, Sonya" (457645056)
01:56:59.379 --> 01:57:03.939
Collecting, um, here, I just think it should be.

984 "Harward, Sonya" (457645056)
01:57:03.939 --> 01:57:10.209
Complete if indeed it's going to result in significant decisions about the future of the city, including its tax.

985 "Harward, Sonya" (457645056)
01:57:10.209 --> 01:57:16.089
Seeing authority, it's, it's ability to generate revenue or, in fact.

986 "Harward, Sonya" (457645056)
01:57:16.089 --> 01:57:20.589
Stability not to generate revenue. Well, we're certainly.

987 "Harward, Sonya" (457645056)
01:57:24.759 --> 01:57:32.469
The expenditures and and the taxes and, uh, it may be an interesting relationship to see.

988 "Harward, Sonya" (457645056)
01:57:32.469 --> 01:57:37.989
How much of spending which we have here relative to these other cities.

989 "Harward, Sonya" (457645056)
01:57:37.989 --> 01:57:40.989
Is in some sense supported by.

990 "Harward, Sonya" (457645056)
01:57:40.989 --> 01:57:45.669
Taxes upon Louisville, rather than say state aid, state of federal.

991 "Harward, Sonya" (457645056)
01:57:45.669 --> 01:57:54.879
I mean, we certainly can do that, and I think you're quite right, that would be a more complete picture. Would you, would you do you take a look at that? Yeah. Okay.

992 "Harward, Sonya" (457645056)
01:57:54.879 --> 01:57:58.179
Yeah, uh, yeah, I didn't give credit to.

993 "Harward, Sonya" (457645056)
01:57:58.179 --> 01:58:02.199
Lucas at the beginning when so when I said I did this, um.

994 "Harward, Sonya" (457645056)
01:58:02.199 --> 01:58:07.329
I talked a lot, but I have a graduate student who is is very good at.

995 "Harward, Sonya" (457645056)
01:58:10.539 --> 01:58:14.379
I have 1 more question. Is there is there a way to do the cities after.

996 "Harward, Sonya" (457645056)
01:58:14.379 --> 01:58:19.269
Actually reported the municipalities on administrative and overhead expenses.

997 "Harward, Sonya" (457645056)
01:58:19.269 --> 01:58:22.299
Yeah, because we've, we've never had that discussion.

998 "Harward, Sonya" (457645056)
01:58:22.299 --> 01:58:26.439
In here as it relates to the amount of dollars the proportion that's spent.

999 "Harward, Sonya" (457645056)
01:58:26.439 --> 01:58:33.879
Literally on the because with county government and other things, I would guess that that's aggregating up into your dollars.

1000 "Harward, Sonya" (457645056)
01:58:33.879 --> 01:58:40.240
Well, it's not in these dollar, not in these dollars. Well, you know, the, the administration, but but there is there.

1001 "Harward, Sonya" (457645056)
01:58:40.240 --> 01:58:46.990
This is where it gets a little tricky. There are some functional categories.

1002 "Harward, Sonya" (457645056)
01:58:46.990 --> 01:58:51.490
And if you look at 1 city versus another, it has a lot in sort of.

1003 "Harward, Sonya" (457645056)
01:58:51.490 --> 01:58:56.350
I mean, there's 1 budget, there's 1 sort of finance there's.

1004 "Harward, Sonya" (457645056)
01:58:56.350 --> 01:59:02.560
Public building services, I think we have to aggregate those together to make sense of.

1005 "Harward, Sonya" (457645056)
01:59:02.560 --> 01:59:05.560
Because I frankly, I think 1 city.

1006 "Harward, Sonya" (457645056)

01:59:10.060 --> 01:59:13.570
So, we have to do that, but we can, but we can do that.
1007 "Harward, Sonya" (457645056)
01:59:13.570 --> 01:59:18.460
And, um, well, we have done it we just didn't report it. Um.
1008 "Harward, Sonya" (457645056)
01:59:18.460 --> 01:59:27.460
It's certainly possible any, any other questions or comments.
1009 "Harward, Sonya" (457645056)
01:59:27.460 --> 01:59:32.110
I just say this, I think is extremely.
1010 "Harward, Sonya" (457645056)
01:59:32.110 --> 01:59:37.150
Again, I think this is very helpful once it's completed and we'll.
1011 "Harward, Sonya" (457645056)
01:59:37.150 --> 01:59:44.440
We'll give us some pretty critical data, I think specifically for my
group. Okay.
1012 "Harward, Sonya" (457645056)
01:59:44.440 --> 01:59:51.250
Mr. chairman I have the situation come up Saturday after our last
commission meeting that.
1013 "Harward, Sonya" (457645056)
01:59:51.250 --> 01:59:56.560
I, I'd like to get a little clarification on because it wasn't sinking
it.
1014 "Harward, Sonya" (457645056)
01:59:56.560 --> 02:00:01.960
And so we were talking about an ambulance services.
1015 "Harward, Sonya" (457645056)
02:00:01.960 --> 02:00:05.980
And the expenses where they are.
1016 "Harward, Sonya" (457645056)
02:00:05.980 --> 02:00:13.450
Services go what they do. I had an event on a Saturday morning.
1017 "Harward, Sonya" (457645056)
02:00:13.450 --> 02:00:18.370
Where, um, the Anchorage Middletown ambulance.
1018 "Harward, Sonya" (457645056)
02:00:18.370 --> 02:00:24.010
Left my event, and I asked the captain where they were going.
1019 "Harward, Sonya" (457645056)
02:00:24.010 --> 02:00:30.190
And they said that they were going to run to 23rd and Duncan.
1020 "Harward, Sonya" (457645056)
02:00:30.190 --> 02:00:34.690
And then 5 minutes later, there was another.
1021 "Harward, Sonya" (457645056)
02:00:34.690 --> 02:00:38.080
1, that was going to 9th.
1022 "Harward, Sonya" (457645056)
02:00:38.080 --> 02:00:41.650
And Jefferson, so I know we talked.
1023 "Harward, Sonya" (457645056)

02:00:41.650 --> 02:00:47.830
About ambulances and some of them are.
1024 "Harward, Sonya" (457645056)
02:00:47.830 --> 02:00:51.010
Privately build 2.
1025 "Harward, Sonya" (457645056)
02:00:51.010 --> 02:00:54.940
To the person through, I guess Medicaid.
1026 "Harward, Sonya" (457645056)
02:00:54.940 --> 02:01:01.330
Care, so that would be if I had a heart attack, then insurance, then you
would build that right?
1027 "Harward, Sonya" (457645056)
02:01:01.330 --> 02:01:08.290
Okay, so my question is within a span of about.
1028 "Harward, Sonya" (457645056)
02:01:08.290 --> 02:01:12.610
10 minutes 2 of my ambulances left.
1029 "Harward, Sonya" (457645056)
02:01:12.610 --> 02:01:18.370
The Anchorage, Middletown, far district, and in the conversation with.
1030 "Harward, Sonya" (457645056)
02:01:18.370 --> 02:01:21.490
The captain there explained to me.
1031 "Harward, Sonya" (457645056)
02:01:21.490 --> 02:01:25.690
That over 40% of the runs.
1032 "Sean Dreisbach" (4074146816)
02:01:25.690 --> 02:01:30.400
That Anchorage military is outside.
1033 "Harward, Sonya" (457645056)
02:01:30.400 --> 02:01:37.060
The Anchorage milltown district now, my question is, is.
1034 "Harward, Sonya" (457645056)
02:01:37.060 --> 02:01:43.120
When that ambulance goes to 23rd and Duncan.
1035 "Harward, Sonya" (457645056)
02:01:43.120 --> 02:01:46.600
For a service who pays.
1036 "Harward, Sonya" (457645056)
02:01:46.600 --> 02:01:54.700
Set ambulance to do that run. So I was told that.
1037 "Harward, Sonya" (457645056)
02:01:54.700 --> 02:02:01.930
I did as the Anchorage Middletown person in that fire district.
1038 "Sean Dreisbach" (4074146816)
02:02:01.930 --> 02:02:07.990
You mean, as a taxpayer, right? I also pay.
1039 "Harward, Sonya" (457645056)
02:02:07.990 --> 02:02:13.330
Um, our district money, you know, I pay to Anchorage, Middletown fire.
1040 "Harward, Sonya" (457645056)
02:02:13.330 --> 02:02:18.010
So, I think 1 of the questions that is continuing coming up.

1041 "Harward, Sonya" (457645056)
02:02:18.010 --> 02:02:24.070
Especially in the area that I live in, and also other areas.

1042 "Harward, Sonya" (457645056)
02:02:24.070 --> 02:02:31.360
That if 2 of the ambulances within my fire district has now been pulled out of my district.

1043 "Harward, Sonya" (457645056)
02:02:31.360 --> 02:02:34.540
Do a run why.

1044 "Harward, Sonya" (457645056)
02:02:34.540 --> 02:02:37.600
Who is paying for it? I'm.

1045 "Harward, Sonya" (457645056)
02:02:37.600 --> 02:02:42.970
If I'm not being taxed, if I have a heart attack, I get it. You're going to build my.

1046 "Harward, Sonya" (457645056)
02:02:42.970 --> 02:02:46.030
Medicare Medicaid, but.

1047 "Harward, Sonya" (457645056)
02:02:46.030 --> 02:02:55.390
Now, I'm down 2 ambulances in my fire district that I pay far district money for has now gone somewhere else.

1048 "Harward, Sonya" (457645056)
02:02:55.390 --> 02:03:00.580
Take care of a situation in the urban service district so I would like.

1049 "Harward, Sonya" (457645056)
02:03:00.580 --> 02:03:05.290
As we move along, some clarification about that is to.

1050 "Harward, Sonya" (457645056)
02:03:05.290 --> 02:03:11.710
Who pays those runs when they go outside of the district that.

1051 "Harward, Sonya" (457645056)
02:03:11.710 --> 02:03:18.100
I'm paying for them to stay into the district. I, I just would like to know.

1052 "Harward, Sonya" (457645056)
02:03:18.100 --> 02:03:22.480
Well, I think going back, it's there's an, with.

1053 "Harward, Sonya" (457645056)
02:03:22.480 --> 02:03:28.150
Um, Metro government, so the 40% has gone up.

1054 "Harward, Sonya" (457645056)
02:03:28.150 --> 02:03:31.600
A lot since the.

1055 "Harward, Sonya" (457645056)
02:03:31.600 --> 02:03:35.110
And right and so, you know, if if.

1056 "Harward, Sonya" (457645056)
02:03:35.110 --> 02:03:39.400
If we global EMS or.

1057 "Harward, Sonya" (457645056)
02:03:39.400 --> 02:03:42.760

Fire does not have an ambulance.
1058 "Harward, Sonya" (457645056)
02:03:42.760 --> 02:03:46.840
You know, they're calling on the suburban and I'd.
1059 "Harward, Sonya" (457645056)
02:03:46.840 --> 02:03:52.870
I would assume that private insurance or Medicare, Medicaid would pay.
1060 "Harward, Sonya" (457645056)
02:03:52.870 --> 02:03:56.170
Pay and reimburse, they may not get.
1061 "Harward, Sonya" (457645056)
02:03:56.170 --> 02:04:00.610
Reimburse the full amount, um, but that's not.
1062 "Harward, Sonya" (457645056)
02:04:00.610 --> 02:04:04.750
I also understand that councilman.
1063 "Harward, Sonya" (457645056)
02:04:11.260 --> 02:04:15.640
Metro EMS covered the whole county.
1064 "Harward, Sonya" (457645056)
02:04:15.640 --> 02:04:19.930
Um, and so obviously with.
1065 "Harward, Sonya" (457645056)
02:04:19.930 --> 02:04:24.970
You only have 11 ambulances that is not happening right? And and and so.
1066 "Harward, Sonya" (457645056)
02:04:24.970 --> 02:04:29.200
The disparity of I don't mind how.
1067 "Harward, Sonya" (457645056)
02:04:29.200 --> 02:04:35.770
Open I, if you need the ambulance, take it, but also if.
1068 "Harward, Sonya" (457645056)
02:04:35.770 --> 02:04:39.640
If I'm consistently paying for 40%.
1069 "Harward, Sonya" (457645056)
02:04:39.640 --> 02:04:44.110
And I would like to know, I'd like to find out what that breakdown is, is
40% of.
1070 "Harward, Sonya" (457645056)
02:04:44.110 --> 02:04:48.100
People going with heart attacks. Is it 40%?
1071 "Harward, Sonya" (457645056)
02:04:48.100 --> 02:04:53.050
Of assisting in a fatality or whatever.
1072 "Harward, Sonya" (457645056)
02:04:53.050 --> 02:04:59.140
Um, you know, my taxpayers would like to know why they're not being
reimbursed for it.
1073 "Harward, Sonya" (457645056)
02:04:59.140 --> 02:05:04.270
I gotta take my ambulance all the way from milltown to downtown.
1074 "Harward, Sonya" (457645056)
02:05:04.270 --> 02:05:07.720
Why are they not being reimbursed? That was just 1 of the questions.

1075 "Harward, Sonya" (457645056)
02:05:07.720 --> 02:05:10.780
Looking at those services and.

1076 "Harward, Sonya" (457645056)
02:05:10.780 --> 02:05:18.790
And so, I think, dig it into this information is going to be very vital when we find that out.

1077 "Harward, Sonya" (457645056)
02:05:18.790 --> 02:05:22.240
Whether or not tax money is being distributed.

1078 "Harward, Sonya" (457645056)
02:05:22.240 --> 02:05:25.870
As it should be, have you talked to.

1079 "Harward, Sonya" (457645056)
02:05:25.870 --> 02:05:31.600
Your chief at their in Anchorage milltown wherever your.

1080 "Harward, Sonya" (457645056)
02:05:31.600 --> 02:05:35.140
They are, it's not just my fire district. It's your.

1081 "Harward, Sonya" (457645056)
02:05:35.140 --> 02:05:41.830
Yeah, all of them, it's all of them they all have right that right?

1082 "Harward, Sonya" (457645056)
02:05:41.830 --> 02:05:45.790
Well, my other question is, does is there a certificate.

1083 "Harward, Sonya" (457645056)
02:05:45.790 --> 02:05:49.270
A need for I want to call it a lower.

1084 "Harward, Sonya" (457645056)
02:05:54.010 --> 02:05:59.770
If I've got somebody needs to go to the doctor, are they calling.

1085 "Harward, Sonya" (457645056)
02:05:59.770 --> 02:06:03.790
Uh, Milton, Anchorage, ambulance.

1086 "Harward, Sonya" (457645056)
02:06:03.790 --> 02:06:08.110
To get me to the doctor to get reimbursed or is is there a.

1087 "Harward, Sonya" (457645056)
02:06:08.110 --> 02:06:18.730
Uber, ambulance that Metro is allowing certificate of these for I mean, it would seem to me if there is a level of level of some sort of service.

1088 "Harward, Sonya" (457645056)
02:06:18.730 --> 02:06:24.730
That the dispatcher knows, it's a broken leg that doesn't necessarily require oxygen.

1089 "Harward, Sonya" (457645056)
02:06:24.730 --> 02:06:27.940
Maybe that just need requires somebody with a.

1090 "Harward, Sonya" (457645056)
02:06:27.940 --> 02:06:37.780
Medical certificate of need to get that person to the hospital and I would assume that if we're going to.

1091 "Harward, Sonya" (457645056)
02:06:37.780 --> 02:06:42.520

Unless somebody here can answer those questions, we'll have to have somebody come.

1092 "Harward, Sonya" (457645056)

02:06:42.520 --> 02:06:48.130

It may be chief trees back. We're on he might be able to give us some information on that.

1093 "Harward, Sonya" (457645056)

02:06:48.130 --> 02:06:52.900

Is okay, well, then back do you have any.

1094 "Harward, Sonya" (457645056)

02:06:52.900 --> 02:06:57.580

Any information that you, that would be helpful in responding to marriage.

1095 "Harward, Sonya" (457645056)

02:07:03.760 --> 02:07:10.150

And here you are you there now.

1096 "Sean Dreisbach" (4074146816)

02:07:10.150 --> 02:07:15.700

Yes, Amy. Okay. You hear me. Okay. So who paid for those ambulances?

1097 "Sean Dreisbach" (4074146816)

02:07:15.700 --> 02:07:20.380

That the mayor mentioned earlier that responded out of Anchorage Middletown into.

1098 "Sean Dreisbach" (4074146816)

02:07:20.380 --> 02:07:23.380

Downtown little area the taxpayers.

1099 "Sean Dreisbach" (4074146816)

02:07:23.380 --> 02:07:27.190

Middletown pays the original their tax that goes towards.

1100 "Sean Dreisbach" (4074146816)

02:07:27.190 --> 02:07:30.430

Providing of the SMS service for that particular community.

1101 "Sean Dreisbach" (4074146816)

02:07:30.430 --> 02:07:34.780

Now, that particular, once when it responds to downtown or.

1102 "Sean Dreisbach" (4074146816)

02:07:34.780 --> 02:07:39.010

Anywhere outside the Anchorage, Middletown, they're going to build the patient.

1103 "Sean Dreisbach" (4074146816)

02:07:39.010 --> 02:07:43.600

Insurance company for that particular run if they.

1104 "Sean Dreisbach" (4074146816)

02:07:43.600 --> 02:07:46.780

Support we do not bill if we do not transport. So if we transport.

1105 "Sean Dreisbach" (4074146816)

02:07:46.780 --> 02:07:50.020

The patient, we're going to build a patient, the insurance.

1106 "Sean Dreisbach" (4074146816)

02:07:50.020 --> 02:07:55.090

Company in those circumstances outside are our response area.

1107 "Sean Dreisbach" (4074146816)

02:07:55.090 --> 02:08:00.550

Yeah, we're going to do a balanced bill that means that the insurance company only pays a certain percentage.

1108 "Sean Dreisbach" (4074146816)
02:08:00.550 --> 02:08:06.670
Then the patient gets the bill if they pay that so they try to negotiate with the patient to get.

1109 "Sean Dreisbach" (4074146816)
02:08:06.670 --> 02:08:10.540
A payment from that point, um, as for.

1110 "Sean Dreisbach" (4074146816)
02:08:10.540 --> 02:08:15.250
The mutual aid agreements, we do have mutual agreements amongst all the Jefferson.

1111 "Sean Dreisbach" (4074146816)
02:08:15.250 --> 02:08:19.060
County as well, as the city local fire department responding so it's a.

1112 "Sean Dreisbach" (4074146816)
02:08:19.060 --> 02:08:24.280
Mutual agreement we have if Anchorage, Middletown needs an additional, and whichever some time will provide that.

1113 "Sean Dreisbach" (4074146816)
02:08:24.280 --> 02:08:27.370
Wants to the closest so our.

1114 "Sean Dreisbach" (4074146816)
02:08:27.370 --> 02:08:30.640
Not have borders and that's in that sense.

1115 "Sean Dreisbach" (4074146816)
02:08:30.640 --> 02:08:34.090
So, when you call now on wine, you may be paying.

1116 "Sean Dreisbach" (4074146816)
02:08:34.090 --> 02:08:39.340
Money to the anchors Middletown, but let's say your house just happens to be closer to my firehouse.

1117 "Sean Dreisbach" (4074146816)
02:08:39.340 --> 02:08:44.740
Where am I, and what happens to be stationed you're gonna get a Jefferson town and was because.

1118 "Sean Dreisbach" (4074146816)
02:08:44.740 --> 02:08:47.920
We want to make sure you get the proper resource.

1119 "Sean Dreisbach" (4074146816)
02:08:47.920 --> 02:08:51.940
The quickest resources possible to your emergency.

1120 "Sean Dreisbach" (4074146816)
02:08:51.940 --> 02:08:56.860
So, we, we have that in place. Um, it does cause for.

1121 "Sean Dreisbach" (4074146816)
02:08:56.860 --> 02:09:00.400
Jumping 1 district to the other. Um, but.

1122 "Sean Dreisbach" (4074146816)
02:09:00.400 --> 02:09:03.430
The idea is to provide the best service we can.

1123 "Sean Dreisbach" (4074146816)
02:09:03.430 --> 02:09:07.870

To each individual person that calls 901, regardless.
1124 "Sean Dreisbach" (4074146816)
02:09:07.870 --> 02:09:11.410
What district is what is a perfect system?
1125 "Sean Dreisbach" (4074146816)
02:09:11.410 --> 02:09:16.060
Probably not, uh, as for that, go out for your.
1126 "Sean Dreisbach" (4074146816)
02:09:16.060 --> 02:09:20.050
For transport services problem with local Metro.
1127 "Sean Dreisbach" (4074146816)
02:09:20.050 --> 02:09:23.470
5, to 10 years, a lot of our private company.
1128 "Sean Dreisbach" (4074146816)
02:09:23.470 --> 02:09:26.500
These have left, they've been sold out, bought out.
1129 "Sean Dreisbach" (4074146816)
02:09:26.500 --> 02:09:30.550
Have left the local metro area there's no longer mercy. There's no longer.
1130 "Sean Dreisbach" (4074146816)
02:09:30.550 --> 02:09:37.930
Yellow, em, once and so on. So, those non emergency type transports those non 901 transport services.
1131 "Sean Dreisbach" (4074146816)
02:09:37.930 --> 02:09:41.500
Just don't exist like they used to um, so they're.
1132 "Sean Dreisbach" (4074146816)
02:09:41.500 --> 02:09:44.890
You know, that's hurting our 901.
1133 "Sean Dreisbach" (4074146816)
02:09:44.890 --> 02:09:48.910
And 1 service, because now, people are calling in.
1134 "Sean Dreisbach" (4074146816)
02:09:48.910 --> 02:09:55.330
And say, hey, I need to be transported to the hospital. It's a non emergency transport, maybe to set up for a surgery that day.
1135 "Sean Dreisbach" (4074146816)
02:09:55.330 --> 02:09:59.530
They said, well, maybe 2, maybe 4 hours before we can get to you. Well.
1136 "Sean Dreisbach" (4074146816)
02:09:59.530 --> 02:10:02.530
They want to get there earlier than later. So what do they do.
1137 "Sean Dreisbach" (4074146816)
02:10:02.530 --> 02:10:07.090
They may call 911, so it's a misuse of the 901 service as part of our.
1138 "Sean Dreisbach" (4074146816)
02:10:07.090 --> 02:10:10.720
Our biggest problem I would say with the LMS is the misuse of.
1139 "Sean Dreisbach" (4074146816)
02:10:10.720 --> 02:10:16.270
I have 11 service, and all the metro does use a taxi service, and it'll sense and those circumstances.
1140 "Sean Dreisbach" (4074146816)

02:10:16.270 --> 02:10:21.340
Ask for Ubers I couldn't tell you how often Uber is used in the.
1141 "Sean Dreisbach" (4074146816)
02:10:21.340 --> 02:10:25.930
To provide for patient patients, going to the hospital for transports.
1142 "Sean Dreisbach" (4074146816)
02:10:25.930 --> 02:10:29.590
I know that the, at the actually yellow.
1143 "Sean Dreisbach" (4074146816)
02:10:29.590 --> 02:10:34.870
England service and yellow cabins are yellow cab transports are being used.
1144 "Sean Dreisbach" (4074146816)
02:10:34.870 --> 02:10:38.590
I just don't know how often they're being used, because that's run by Metro safe.
1145 "Sean Dreisbach" (4074146816)
02:10:38.590 --> 02:10:42.700
Hopefully that answered. Some of your questions I realize is.
1146 "Sean Dreisbach" (4074146816)
02:10:42.700 --> 02:10:48.370
Imperfect, uh, system are actually issued by the state. They are not.
1147 "Sean Dreisbach" (4074146816)
02:10:48.370 --> 02:10:52.930
Will match, or any local government so you have to go to this.
1148 "Sean Dreisbach" (4074146816)
02:10:52.930 --> 02:10:57.280
State to get that certificate of need, uh, for your services.
1149 "Harward, Sonya" (457645056)
02:10:57.280 --> 02:11:03.550
And we looked at if we look and you probably know, uh, we looked at the and Ernest on hospitals 707.
1150 "Harward, Sonya" (457645056)
02:11:03.550 --> 02:11:08.620
And, and that was a challenge in itself and, um, we think we have problems here.
1151 "Harward, Sonya" (457645056)
02:11:13.930 --> 02:11:16.990
And providing services all that, but craving around.
1152 "Harward, Sonya" (457645056)
02:11:20.980 --> 02:11:25.660
Uh, makes a run across another district and the patient.
1153 "Harward, Sonya" (457645056)
02:11:25.660 --> 02:11:29.290
Fuse than the responding, uh.
1154 "Harward, Sonya" (457645056)
02:11:33.580 --> 02:11:39.820
Responding to that particular service in addition to that, uh, there's a mental health Pro, uh, per.
1155 "Harward, Sonya" (457645056)
02:11:39.820 --> 02:11:44.980
Perspective on this as well that, uh, complicate the issue in terms of delivering.
1156 "Harward, Sonya" (457645056)

02:11:44.980 --> 02:11:49.930
Uh, the patient from, um, from 1 point to another point.
1157 "Sean Dreisbach" (4074146816)
02:11:49.930 --> 02:11:54.790
That's correct. The answer the 1st question is you write the fire district.
1158 "Sean Dreisbach" (4074146816)
02:11:54.790 --> 02:11:59.110
Responds to another far districts area for that patient care and they refuse.
1159 "Sean Dreisbach" (4074146816)
02:11:59.110 --> 02:12:04.390
Yes, I need to cost the fuel and the manpower that time that they.
1160 "Sean Dreisbach" (4074146816)
02:12:04.390 --> 02:12:09.400
Wear and tear on my end, let's go into that particular run and it's it's it's a.
1161 "Sean Dreisbach" (4074146816)
02:12:09.400 --> 02:12:14.560
Pay off type of thing for 1 district to the other same way. If they come into my district mind going in their district.
1162 "Sean Dreisbach" (4074146816)
02:12:14.560 --> 02:12:21.460
It's a mutual agreement we've kind of come across ask for the other part of I can my Amazon service can't.
1163 "Sean Dreisbach" (4074146816)
02:12:21.460 --> 02:12:28.090
Go to a nursing home, because they call and said such and such patient needs to be taken to the doctor.
1164 "Sean Dreisbach" (4074146816)
02:12:28.090 --> 02:12:33.310
To be checked on, or for a, you know, for a scheduled.
1165 "Sean Dreisbach" (4074146816)
02:12:33.310 --> 02:12:37.870
I can't make non emergency transports, so my end.
1166 "Sean Dreisbach" (4074146816)
02:12:37.870 --> 02:12:41.890
Is not supposed to make non emergency transports everything that.
1167 "Sean Dreisbach" (4074146816)
02:12:41.890 --> 02:12:46.660
Our analyst services make in Jefferson County with the exception of local.
1168 "Sean Dreisbach" (4074146816)
02:12:46.660 --> 02:12:51.940
In Anchorage, Middletown and pleasure's park, and the only 3 handling services that have a.
1169 "Sean Dreisbach" (4074146816)
02:12:51.940 --> 02:12:56.050
Non emergency transport.
1170 "Sean Dreisbach" (4074146816)
02:12:56.050 --> 02:12:59.470
Everyone else is based on 901 calls only.
1171 "Sean Dreisbach" (4074146816)
02:12:59.470 --> 02:13:05.110

Yeah, I couldn't tell you how many runs non emergency runs. They make transport wise from those 3.

1172 "Sean Dreisbach" (4074146816)

02:13:05.110 --> 02:13:10.210

Districts, but my guess is probably very few, because honestly, we're so busy.

1173 "Sean Dreisbach" (4074146816)

02:13:10.210 --> 02:13:13.960

The with the 901 cause we don't have the resources to.

1174 "Sean Dreisbach" (4074146816)

02:13:13.960 --> 02:13:19.090

Make those type of calls as well does that does that answer that question? Sir?

1175 "Harward, Sonya" (457645056)

02:13:19.090 --> 02:13:25.540

Yeah, yeah, yeah, that it does and, I mean, so clarifies which, uh, I already know, but at least there are other people.

1176 "Harward, Sonya" (457645056)

02:13:28.990 --> 02:13:35.500

Is this 1 more question for clarification? So the 40%.

1177 "Harward, Sonya" (457645056)

02:13:38.710 --> 02:13:48.070

They go after the as much money as they can and if they can't get the money from Medicare, Medicaid, or whatever, then Anchorage.

1178 "Sean Dreisbach" (4074146816)

02:13:52.210 --> 02:13:58.060

Well, that money already been sucked up by the taxpayers they're already paying for the budget.

1179 "Harward, Sonya" (457645056)

02:13:58.060 --> 02:14:03.970

That's my question. Yes, you don't get reimbursed and you don't get reimbursed.

1180 "Harward, Sonya" (457645056)

02:14:03.970 --> 02:14:10.900

I'm the 1 paying for that email is to go outside my district under I municipal.

1181 "Harward, Sonya" (457645056)

02:14:10.900 --> 02:14:18.940

Compromise and just let, you know, chief, we are trying to correct that for any type of any type. Um, Ron you make and it's, uh, it's a.

1182 "Harward, Sonya" (457645056)

02:14:27.280 --> 02:14:32.440

Born by you as well as other districts in doing that, gotcha. Yeah. And, you know, there's.

1183 "Sean Dreisbach" (4074146816)

02:14:32.440 --> 02:14:36.040

I know there are some agencies maybe after that state as well.

1184 "Sean Dreisbach" (4074146816)

02:14:36.040 --> 02:14:40.840

So, if you call a number 1, and they show up, you get a bill, regardless if they.

1185 "Sean Dreisbach" (4074146816)

02:14:40.840 --> 02:14:45.250

Quarter not here in a little, a little metro in Jefferson County.

1186 "Sean Dreisbach" (4074146816)
02:14:45.250 --> 02:14:50.770
I'm pretty sure there's not a certain. There's not a single suburban fire department.

1187 "Sean Dreisbach" (4074146816)
02:14:50.770 --> 02:14:54.850
Bill, you just were showing up and knocking on your door. I'm not I cannot.

1188 "Sean Dreisbach" (4074146816)
02:14:54.850 --> 02:15:02.740
I don't know exactly how little metro does that. I don't know how they do their billing. We use a 3rd party billing. I think Google match with has their own billing.

1189 "Sean Dreisbach" (4074146816)
02:15:02.740 --> 02:15:08.380
I could not tell you how they do that, but I know Jefferson County, the suburban park districts. None of us bill, you.

1190 "Sean Dreisbach" (4074146816)
02:15:08.380 --> 02:15:12.520
For just showing up at your door, we only bill you when we transport.

1191 "Harward, Sonya" (457645056)
02:15:12.520 --> 02:15:16.660
Is that is that a decision you've made not to do?

1192 "Harward, Sonya" (457645056)
02:15:16.660 --> 02:15:20.980
That you decided not to build them, or you're are unable to build them.

1193 "Sean Dreisbach" (4074146816)
02:15:20.980 --> 02:15:24.100
Were able to bill, we could send them a bill. We chose.

1194 "Sean Dreisbach" (4074146816)
02:15:24.100 --> 02:15:27.970
To, and primarily is because they're already paying a tax.

1195 "Sean Dreisbach" (4074146816)
02:15:27.970 --> 02:15:34.270
For that service in their area, and we just kind of feel like it's, you know, it's a mutual agreement we have amongst each other.

1196 "Sean Dreisbach" (4074146816)
02:15:34.270 --> 02:15:39.430
So, I'm not going to build your taxpayer. You're not gonna build my taxpayer for that particular. You know.

1197 "5026****18" (1701927168)
02:15:39.430 --> 02:15:52.090
Brian to check on a patient that didn't need to be transported. I would rather not. I have a quick question. Go ahead. Obviously, Sean, you know, we're all.

1198 "5026****18" (1701927168)
02:15:52.090 --> 02:15:59.320
Staying across the county for EMS, but we know that we don't get the local EMS services. We pay extra for that.

1199 "5026****18" (1701927168)
02:15:59.320 --> 02:16:05.590
Would it properly incentivize logo to cover their own territory? If.

1200 "5026****18" (1701927168)
02:16:05.590 --> 02:16:08.890

We required them to re, required the the city.

1201 "Sean Dreisbach" (4074146816)

02:16:09.695 --> 02:16:24.335

The to reimburse you, if you go into their area, we'll make it that would make a big difference on a lot of the departments budgets that's for sure. As for getting that money back for the matter runs, they make and the particular areas, but it still doesn't goal.

1202 "Sean Dreisbach" (4074146816)

02:16:24.880 --> 02:16:29.200

Still the idea of trying to keep our ambulances in our own.

1203 "Sean Dreisbach" (4074146816)

02:16:34.030 --> 02:16:42.640

You know what you can somebody always told me you can never you always have 1 more run than you do analyses. And that's the truth. I mean, we can keep adding ambulances.

1204 "Sean Dreisbach" (4074146816)

02:16:42.640 --> 02:16:47.260

But I don't think adding Amazon is going to fix the problem. It might help.

1205 "Sean Dreisbach" (4074146816)

02:16:47.260 --> 02:16:54.190

But it's not going to fix it, you know, there's a lot of those things are broken and 1 of the things that is broken. Like I mentioned.

1206 "Sean Dreisbach" (4074146816)

02:16:54.190 --> 02:17:00.220

The 901 system, and people abusing the 901 system. Um, is 1 of the biggest.

1207 "5026****18" (1701927168)

02:17:00.220 --> 02:17:04.960

Problems, I think we run into more than the other Sean. It seems like there's another.

1208 "5026****18" (1701927168)

02:17:04.960 --> 02:17:11.680

Broken part of the system it is. Louisville does not have an incentive to cover the whole county.

1209 "5026****18" (1701927168)

02:17:11.680 --> 02:17:14.890

Bless their own areas, so when we go in, they have no incentive.

1210 "5026****18" (1701927168)

02:17:14.890 --> 02:17:21.880

Not for us, not to have us run the run the route. If there's an incentive, which means if we run it, they pay for it.

1211 "5026****18" (1701927168)

02:17:21.880 --> 02:17:25.570

Then they're going to get their business taken care of and they're gonna, we're gonna have to stop covering them more.

1212 "5026****18" (1701927168)

02:17:25.570 --> 02:17:34.450

Because they're going to follow the dollar, they don't want to pay it so they're going to do their work. So that's 1 thing I like for this group to consider is when.

1213 "5026****18" (1701927168)

02:17:43.390 --> 02:17:46.990

We will needs to pay us for what we've subset.

1214 "Harward, Sonya" (457645056)
02:17:51.910 --> 02:17:58.090
Um, that ask yeah question uh, chief, I'm wondering if you could, um.

1215 "Harward, Sonya" (457645056)
02:17:58.090 --> 02:18:03.040
Fill us in on how like a run.

1216 "Harward, Sonya" (457645056)
02:18:03.040 --> 02:18:07.660
My understanding from talking to chief.

1217 "Harward, Sonya" (457645056)
02:18:07.660 --> 02:18:12.130
And is that if there's not.

1218 "Harward, Sonya" (457645056)
02:18:12.130 --> 02:18:16.540
Ems ambulance available.

1219 "Harward, Sonya" (457645056)
02:18:16.540 --> 02:18:20.290
From or anywhere then.

1220 "Harward, Sonya" (457645056)
02:18:20.290 --> 02:18:23.980
They will respond in their su.

1221 "Harward, Sonya" (457645056)
02:18:23.980 --> 02:18:29.110
And administer that, and sometimes that saves.

1222 "Harward, Sonya" (457645056)
02:18:29.110 --> 02:18:33.790
A run and I'd also like to know in.

1223 "Harward, Sonya" (457645056)
02:18:37.210 --> 02:18:44.050
Percentage of runs that you all see in a month's time.

1224 "Sean Dreisbach" (4074146816)
02:18:44.050 --> 02:18:48.610
That's a that's a good question. 1, the answer what the chief mindset.

1225 "Sean Dreisbach" (4074146816)
02:18:48.610 --> 02:18:51.940
We do the same thing across the county. We have what we call.

1226 "Sean Dreisbach" (4074146816)
02:18:51.940 --> 02:18:55.840
Flag cars, local Metro has black cars. Jefferson has a.

1227 "Sean Dreisbach" (4074146816)
02:18:55.840 --> 02:19:00.970
You know, has black bars and supervisors that ride or drive and and those are usually.

1228 "Sean Dreisbach" (4074146816)
02:19:00.970 --> 02:19:04.510
That make those type of runs, so we could.

1229 "Sean Dreisbach" (4074146816)
02:19:04.510 --> 02:19:10.240
If we had an analyst that may be coming from all my investors are tied up and my.

1230 "Sean Dreisbach" (4074146816)
02:19:10.240 --> 02:19:15.070
Closest analyst is kalona, I would have a supervisor be able to respond or.

1231 "Sean Dreisbach" (4074146816)
02:19:15.070 --> 02:19:19.930
O'clock, I'll respond to that particular run builder to administer, or if it's a.

1232 "Sean Dreisbach" (4074146816)
02:19:19.930 --> 02:19:23.590
Full rest cardiac arrest they could start CPR. Wow. That.

1233 "Sean Dreisbach" (4074146816)
02:19:23.590 --> 02:19:27.550
This is still being set and again you're also going to get on particular runs like.

1234 "Sean Dreisbach" (4074146816)
02:19:27.550 --> 02:19:30.580
That you're also get to close as far as in the response and.

1235 "Sean Dreisbach" (4074146816)
02:19:30.580 --> 02:19:35.260
And for our engines and local, we are very blessed to, you know, those are all.

1236 "Sean Dreisbach" (4074146816)
02:19:35.260 --> 02:19:40.090
Bls units, they all have EMTs on them. Some of them have paramedics on.

1237 "Sean Dreisbach" (4074146816)
02:19:40.090 --> 02:19:43.300
Throughout the county, so you may get a far engine.

1238 "Sean Dreisbach" (4074146816)
02:19:43.300 --> 02:19:51.100
That can also start, uh, administering drugs and so on as well as all of them been trained to administer to those.

1239 "Sean Dreisbach" (4074146816)
02:19:51.100 --> 02:19:54.160
Have to run so we do have a quick response.

1240 "Sean Dreisbach" (4074146816)
02:19:54.160 --> 02:20:00.970
By the closest far engine as well as a paramedic in a vehicle to get there quicker.

1241 "Sean Dreisbach" (4074146816)
02:20:00.970 --> 02:20:05.140
If an ambulance is coming from a long distance or not available for that particular run.

1242 "Sean Dreisbach" (4074146816)
02:20:05.140 --> 02:20:08.920
Your other question was, um, sorry.

1243 "Harward, Sonya" (457645056)
02:20:08.920 --> 02:20:13.720
To begin with that 2nd question was if if you have a a rough.

1244 "Harward, Sonya" (457645056)
02:20:13.720 --> 02:20:19.330
Percentage of narcan runs you make in a month's time.

1245 "Sean Dreisbach" (4074146816)
02:20:19.330 --> 02:20:24.670
That's a good question. I would say, you know, if we make in our in our district again, it's.

1246 "Sean Dreisbach" (4074146816)
02:20:24.670 --> 02:20:29.080

You know, more of a Northeast and of Jefferson County, you know, if we make.

1247 "Sean Dreisbach" (4074146816)

02:20:29.080 --> 02:20:34.150

Maybe, I don't know, I would say probably 5.

1248 "Sean Dreisbach" (4074146816)

02:20:34.150 --> 02:20:38.230

Percent in a month finite. Not much. Probably more.

1249 "Sean Dreisbach" (4074146816)

02:20:38.230 --> 02:20:43.870

Way more like 1 or 2 a day is what we're making in our average a day is anywhere between 30 to 35.

1250 "Sean Dreisbach" (4074146816)

02:20:43.870 --> 02:20:48.010

Runs so we may have an overdose each day maybe 1 and a half.

1251 "Harward, Sonya" (457645056)

02:20:48.010 --> 02:20:52.060

Half a day if you want to go by a month and so.

1252 "Harward, Sonya" (457645056)

02:20:52.060 --> 02:20:55.060

Does it is that end of.

1253 "Harward, Sonya" (457645056)

02:20:59.410 --> 02:21:05.050

You know, does that end up going? Somehow together? Social worker sets them up with.

1254 "Harward, Sonya" (457645056)

02:21:05.050 --> 02:21:10.840

Insurance through the state, or how does that work or do you know I would say that.

1255 "Sean Dreisbach" (4074146816)

02:21:10.840 --> 02:21:16.330

Most of them do not have insurance. If if anything set up through the state, I.

1256 "Sean Dreisbach" (4074146816)

02:21:16.330 --> 02:21:22.090

Unaware of that, but I would say most of those runs are a taxpayer run. We're making them.

1257 "Sean Dreisbach" (4074146816)

02:21:22.090 --> 02:21:25.150

On on the tax payers dollar to provide.

1258 "Sean Dreisbach" (4074146816)

02:21:25.150 --> 02:21:28.600

Can sometimes multiple doses of.

1259 "Sean Dreisbach" (4074146816)

02:21:28.600 --> 02:21:33.280

Nor can on that particular patient. Sometimes you may make that patient twice in the same day.

1260 "Sean Dreisbach" (4074146816)

02:21:33.280 --> 02:21:36.580

That's happened before. It's not it's not a rarity that.

1261 "Sean Dreisbach" (4074146816)

02:21:36.580 --> 02:21:40.570

That happens occasionally it does happen where you making this up the same patient.

1262 "Harward, Sonya" (457645056)
02:21:40.570 --> 02:21:44.470
Maybe twice in 1 day. Yeah, thank you. Very much.

1263 "Harward, Sonya" (457645056)
02:21:48.760 --> 02:21:57.850
And you have anything else on this question yes, I just want to make sure as we consider recommendations.

1264 "Harward, Sonya" (457645056)
02:21:57.850 --> 02:22:01.120
Think it was mentioned earlier that we bring in the people who are doing that work.

1265 "Harward, Sonya" (457645056)
02:22:01.120 --> 02:22:05.920
And we don't do anything just, you know, based on filling in that moment.

1266 "Harward, Sonya" (457645056)
02:22:05.920 --> 02:22:09.130
Talking with the director of emergency services, and he's pointing out the.

1267 "Harward, Sonya" (457645056)
02:22:09.130 --> 02:22:14.410
Millions of calls that come into the 911 dispatch center so it might not be best.

1268 "Harward, Sonya" (457645056)
02:22:18.910 --> 02:22:22.390
So, I want to make sure we hear from the experts who are doing that work before we send out.

1269 "Harward, Sonya" (457645056)
02:22:30.760 --> 02:22:40.210
Okay, um, well, I think we've, um, are we done our data reports? I mean, you put other thing, we need.

1270 "Harward, Sonya" (457645056)
02:22:48.220 --> 02:22:52.150
Yeah, I want to check whether or not the committees have any reports they want to.

1271 "Harward, Sonya" (457645056)
02:22:52.150 --> 02:22:58.750
To make to the larger group now, we'll have.

1272 "Harward, Sonya" (457645056)
02:22:58.750 --> 02:23:02.260
We'll have our next committee meeting in the next few weeks. We'll be prepared.

1273 "Harward, Sonya" (457645056)
02:23:05.770 --> 02:23:09.160
Anybody else okay then the other thing.

1274 "Harward, Sonya" (457645056)
02:23:09.160 --> 02:23:13.570
That we wanted to make sure Jason, I have to make a.

1275 "Harward, Sonya" (457645056)
02:23:13.570 --> 02:23:17.980
Exchange of emails just recently on the whole question of the community meetings.

1276 "Harward, Sonya" (457645056)
02:23:21.340 --> 02:23:26.830

Question is I think we've all agreed that that's something you wanted to make provision for.

1277 "Harward, Sonya" (457645056)

02:23:26.830 --> 02:23:33.550

You all have suggestions about schools where these meetings might be held.

1278 "Harward, Sonya" (457645056)

02:23:33.550 --> 02:23:39.490

Brian pile of the, um, of city hall has been checking with some of the.

1279 "Harward, Sonya" (457645056)

02:23:39.490 --> 02:23:44.230

It's not been, um, let's say a very, um.

1280 "Harward, Sonya" (457645056)

02:23:44.230 --> 02:23:48.190

Fruitful at the effort. Some of them are not gotten back yet.

1281 "Harward, Sonya" (457645056)

02:23:48.190 --> 02:23:51.490

I think the 1, if I recall correctly, Jason, from the.

1282 "Harward, Sonya" (457645056)

02:23:51.490 --> 02:23:56.890

Mail Eastern is the only school that seems to be available.

1283 "Harward, Sonya" (457645056)

02:23:56.890 --> 02:24:04.420

And, uh, the concern there would be the number the limited number of mikes that they've got available, which is 2. so, depending upon.

1284 "Harward, Sonya" (457645056)

02:24:07.570 --> 02:24:15.400

I think where you'd have to rotate a Mike, I guess, amongst the commissioners to the extent that anybody wanted to speak and then 1 for the audience.

1285 "Harward, Sonya" (457645056)

02:24:15.400 --> 02:24:19.870

And so there'll be some logistics problems, but I guess it could obviously.

1286 "Harward, Sonya" (457645056)

02:24:19.870 --> 02:24:25.570

Be done I think he is going to be looking as well at the.

1287 "Harward, Sonya" (457645056)

02:24:25.570 --> 02:24:30.700

The, um, the, your screen center, or was it the center.

1288 "5026***18" (1701927168)

02:24:30.700 --> 02:24:34.270

Jason, do you remember I.

1289 "Harward, Sonya" (457645056)

02:24:40.270 --> 02:24:45.190

The other question is of the suggestions here about where we might do this.

1290 "Harward, Sonya" (457645056)

02:24:45.190 --> 02:24:50.230

In the appropriate geographical parts of the county.

1291 "Harward, Sonya" (457645056)

02:24:50.230 --> 02:24:56.020

In in Western, it says Central high schools not available. Have we checked with the.

1292 "Harward, Sonya" (457645056)
02:24:56.020 --> 02:25:07.210
Community Center at the LTC Kevin field? I don't believe so. No, we were looking. Yeah.

1293 "Harward, Sonya" (457645056)
02:25:07.210 --> 02:25:14.650
I would do that. It looks like the schools are doing a lot of innovations in the summer, which makes perfect sense but.

1294 "Harward, Sonya" (457645056)
02:25:17.890 --> 02:25:22.300
American heritage center that may be able.

1295 "5026****18" (1701927168)
02:25:22.300 --> 02:25:25.835
To host our library as possible,

1296 "Harward, Sonya" (457645056)
02:25:26.135 --> 02:25:40.985
we might have to take room Mike's but yeah and this might have rooms that would accommodate the numbers without the need from Mike I

1297 "Harward, Sonya" (457645056)
02:25:40.985 --> 02:25:41.825
think in.

1298 "Harward, Sonya" (457645056)
02:25:42.300 --> 02:25:45.640
South Central or southern high school is.

1299 "Harward, Sonya" (457645056)
02:25:45.640 --> 02:25:53.710
Maybe not available, I think the library there no kalona it's got a large room or the.

1300 "Harward, Sonya" (457645056)
02:25:57.670 --> 02:26:02.290
That would work and then out Valley. What about Sun Valley?

1301 "Harward, Sonya" (457645056)
02:26:02.290 --> 02:26:08.830
Well, I, I'm Brian, have you been able to reach out to Valley school? I have a contact.

1302 "Powell, Brian" (2388964096)
02:26:08.830 --> 02:26:19.025
I can imagine that we couldn't use their auditorium. Can you hear me? Yeah, yes I have received confirmation from valid. They are happy to host.

1303 "Powell, Brian" (2388964096)
02:26:19.025 --> 02:26:28.745
They just need to know specific dates and that's really what we're up against is we need to identify the dates that we would our date range rather that we would like to schedule these. So.

1304 "Powell, Brian" (2388964096)
02:26:28.830 --> 02:26:38.230
I can get them calendar for these different venues. Okay. Let's then talk about dates.

1305 "Harward, Sonya" (457645056)
02:26:38.230 --> 02:26:41.410
I think if our report is due, um.

1306 "Harward, Sonya" (457645056)
02:26:41.410 --> 02:26:47.200

Hope September I'm taking that to be the 1st of September.
1307 "Harward, Sonya" (457645056)
02:26:47.200 --> 02:26:53.740
Um, June 15th. Okay. Um.
1308 "Harward, Sonya" (457645056)
02:26:53.740 --> 02:26:58.780
Then this is going to be completed by no later than.
1309 "Harward, Sonya" (457645056)
02:26:58.780 --> 02:27:04.270
1st week of August or something, even that's very late.
1310 "Harward, Sonya" (457645056)
02:27:04.270 --> 02:27:12.725
I think we should all be done in July or not we should try to finish them
up by July. I agree with that.
1311 "Harward, Sonya" (457645056)
02:27:15.395 --> 02:27:24.245
Anybody have any preferences date wise or day wise of a week. I think we
should do them in the evenings, but have at least 1.
1312 "Harward, Sonya" (457645056)
02:27:24.270 --> 02:27:34.450
On a Saturday and and not on a Thursday, so.
1313 "pamela Stevenson" (2459303936)
02:27:34.450 --> 02:27:41.620
We should also do them at a time when we have opportunity to make sure
citizens. Know. And that they can prepare to come.
1314 "pamela Stevenson" (2459303936)
02:27:41.620 --> 02:27:47.080
A week before 2 weeks would be good. We need to run.
1315 "Harward, Sonya" (457645056)
02:27:53.200 --> 02:27:58.630
All 26 districts, but what if we start the.
1316 "Harward, Sonya" (457645056)
02:28:02.020 --> 02:28:08.560
That's the week that begins with Monday the 10th it works for me.
1317 "Harward, Sonya" (457645056)
02:28:40.060 --> 02:28:55.030
Did we say, 5 or 6 across the community on our call? Well fix it said 6,
but I think we may have to cut that back. I think if we can get 6 I guess
we can try, but that would be like, 2 weeks.
1318 "Harward, Sonya" (457645056)
02:29:02.020 --> 02:29:05.860
And then, um, I think the last 1 should be here.
1319 "Harward, Sonya" (457645056)
02:29:08.860 --> 02:29:15.850
The 1, where I think we can have the full recording, it will be the only
1 that will be recorded that to the extent that that.
1320 "Harward, Sonya" (457645056)
02:29:15.850 --> 02:29:21.550
We should have the 1, Brian. Do you think that we can ask? Um.
1321 "Harward, Sonya" (457645056)
02:29:21.550 --> 02:29:28.390
Metro TV to be there to record no.
1322 "Powell, Brian" (2388964096)
02:29:28.390 --> 02:29:32.050

Sonia has probably better understanding of that than I do. Yeah, she says now.

1323 "Harward, Sonya" (457645056)

02:29:35.530 --> 02:29:41.500

Do you have, do you remember when we went and we did the budget hearings out in the community so we have a.

1324 "Harward, Sonya" (457645056)

02:29:44.770 --> 02:29:52.750

Could use that, so at least you could record it to Facebook. Now. I don't know how that works, but I'm guessing between Brian and I.

1325 "Harward, Sonya" (457645056)

02:29:52.750 --> 02:29:55.840

Maybe you can count maybe and who.

1326 "Harward, Sonya" (457645056)

02:29:55.840 --> 02:30:03.730

Cal, she doesn't want to be outside of this if you don't if she doesn't have to. I'm sure right so.

1327 "Harward, Sonya" (457645056)

02:30:04.415 --> 02:30:18.845

You know, I mean, at worst, you could have a, a camera that's set up and videotaped it. People do that all the time right? Broadcasters do. So we can make that work. Okay. Okay. So so, Brian, is that enough information for you?

1328 "Harward, Sonya" (457645056)

02:30:18.940 --> 02:30:24.310

Those 3 weeks with the, you know, sort of make.

1329 "Harward, Sonya" (457645056)

02:30:24.310 --> 02:30:27.490

Do whatever you can for, uh, dates.

1330 "Powell, Brian" (2388964096)

02:30:27.490 --> 02:30:31.900

Uh, within those 3 weeks point for me.

1331 "Powell, Brian" (2388964096)

02:30:31.900 --> 02:30:38.320

I'm sorry, that is a great jumping off point for me. At least it gives me an idea of roughly what you guys would like.

1332 "Powell, Brian" (2388964096)

02:30:38.320 --> 02:30:44.440

How many you'd like per week? Um, how do I pick which one's gonna be the Saturday?

1333 "Powell, Brian" (2388964096)

02:30:44.440 --> 02:30:54.100

I don't I don't personally want to take that on. I'd rather the commission, uh, decide where we're gonna have the Saturday meeting. That is a, a.

1334 "Powell, Brian" (2388964096)

02:30:54.100 --> 02:30:57.970

Uh, preference, I'm sure some other parts of the city would like to enter.

1335 "Powell, Brian" (2388964096)

02:30:57.970 --> 02:31:04.000

Pain for themselves as well. Um, I don't want to have to be the 1 to pick that. I think it'd be.

1336 "Harward, Sonya" (457645056)

02:31:07.480 --> 02:31:11.770
How you can schedule the others and then, you know.
1337 "Harward, Sonya" (457645056)
02:31:11.770 --> 02:31:16.210
Go from that point, I think Mondays and Tuesdays.
1338 "Harward, Sonya" (457645056)
02:31:16.210 --> 02:31:21.490
During the week, if we have to have 2, and then whatever you.
1339 "Powell, Brian" (2388964096)
02:31:26.770 --> 02:31:31.540
As long as the style of the commission, that's what I'll do. Thank you. I was me I.
1340 "Harward, Sonya" (457645056)
02:31:31.540 --> 02:31:36.490
I don't think I have a preference. Can I say 1 more thing? This is Sonia. Harvard.
1341 "Harward, Sonya" (457645056)
02:31:36.490 --> 02:31:40.450
Remember that Webex will not be will not be an option. That's the 1 thing.
1342 "Harward, Sonya" (457645056)
02:31:48.640 --> 02:31:59.500
Then you all determine if you need a quorum or not I mean, okay and is that.
1343 "Harward, Sonya" (457645056)
02:32:03.970 --> 02:32:09.040
The plan from the commission, I guess that's for each of you.
1344 "Harward, Sonya" (457645056)
02:32:09.040 --> 02:32:14.440
To decide, but I would imagine that that that would.
1345 "Harward, Sonya" (457645056)
02:32:14.440 --> 02:32:20.350
Be the optimal situation, right? But at least the areas that.
1346 "5026****18" (1701927168)
02:32:20.350 --> 02:32:34.745
We're representing or whatever right? I think it's probably more important to be at the areas we don't represent because I want to hear from people that are not, you know, obviously I know it.
1347 "5026****18" (1701927168)
02:32:35.255 --> 02:32:40.265
Generally what constituents think about. I just want to have open an open.
1348 "5026****18" (1701927168)
02:32:40.350 --> 02:32:47.560
Here's for everyone else. Well, I think we should all.
1349 "Harward, Sonya" (457645056)
02:32:47.560 --> 02:32:50.620
Try to make all of the meetings. Yes. And if there is a.
1350 "Harward, Sonya" (457645056)
02:32:50.620 --> 02:32:59.830
If you have a personal matter that simply won't allow that to happen then. Okay. So if that's the.
1351 "Harward, Sonya" (457645056)
02:33:04.120 --> 02:33:08.590

Try to come back then if you can at our next meeting with.
1352 "Harward, Sonya" (457645056)
02:33:12.910 --> 02:33:18.340
I think our next our next, meeting's too late, I think we need to leave it up to.
1353 "Harward, Sonya" (457645056)
02:33:18.340 --> 02:33:22.540
Brian, and the chairs just set the meetings and.
1354 "Powell, Brian" (2388964096)
02:33:25.660 --> 02:33:29.590
And if we're gonna start the week of July 10th, July, 14.
1355 "Harward, Sonya" (457645056)
02:33:33.190 --> 02:33:40.660
So, then we've got actually, then what got 3 weeks inside of.
1356 "Powell, Brian" (2388964096)
02:33:40.660 --> 02:33:44.680
June to get this resolved, I'll be in touch with your.
1357 "Powell, Brian" (2388964096)
02:33:44.680 --> 02:33:47.860
Self and representative names yes. Okay.
1358 "Harward, Sonya" (457645056)
02:33:47.860 --> 02:33:58.690
Can I add does this Sonia again a few things to consider that you all want to consider? Just because I was thinking about our budget hearings. How many people you were going to allow to sign up.
1359 "Harward, Sonya" (457645056)
02:33:58.690 --> 02:34:04.960
What's the time period for them to sign up? Like, can they sign up 30 minutes before the meeting? We're going to take the 1st, 10 people.
1360 "Harward, Sonya" (457645056)
02:34:04.960 --> 02:34:11.470
We're going to take the 1st, any many people can sign up for 30 minutes.
1361 "Harward, Sonya" (457645056)
02:34:11.470 --> 02:34:17.140
For an hour, you say, sign up for 30 minutes to speak for 30 minutes? No. To speak.
1362 "Harward, Sonya" (457645056)
02:34:17.140 --> 02:34:21.400
So, let's say that your meeting's at 6 o'clock, are you going to.
1363 "Harward, Sonya" (457645056)
02:34:25.360 --> 02:34:35.470
30, what's the limit on the number of people? Because all of these things you'll want to know when you send out the list of dates, which Kyle will help us with.
1364 "Harward, Sonya" (457645056)
02:34:35.470 --> 02:34:39.190
And and those are just a lot of those little.
1365 "Harward, Sonya" (457645056)
02:34:42.280 --> 02:34:47.350
1 minute 3 minutes yeah, usually we usually go with 3. um, seems to be a good number.
1366 "Harward, Sonya" (457645056)
02:34:47.350 --> 02:34:53.650

Um, well, I would we have a time where we can help with guide it by you all having done.

1367 "Harward, Sonya" (457645056)
02:34:53.650 --> 02:34:56.830
Much of this in the past that whatever is a.

1368 "Harward, Sonya" (457645056)
02:34:56.830 --> 02:35:00.580
Is the process you've used that seems to work for normal.

1369 "Harward, Sonya" (457645056)
02:35:00.580 --> 02:35:07.210
Your normal processing you choose a number. How long do you want to? Let's say 3 minutes of purchase then right? How long do you want to.

1370 "Harward, Sonya" (457645056)
02:35:07.210 --> 02:35:11.350
There 1 hour, 2 hours as many people can sign up.

1371 "Harward, Sonya" (457645056)
02:35:14.800 --> 02:35:18.760
You know what I think gauge on how many people show up, but a standard on.

1372 "Harward, Sonya" (457645056)
02:35:18.760 --> 02:35:22.150
Think would be 30 minutes before um.

1373 "Harward, Sonya" (457645056)
02:35:22.150 --> 02:35:26.680
If you only got 10 people there, let all tens speak, even if.

1374 "Harward, Sonya" (457645056)
02:35:26.680 --> 02:35:33.850
10 people didn't sign up, you know, but if you've got 200 people there, then you take 30 minutes worth of it.

1375 "Harward, Sonya" (457645056)
02:35:33.850 --> 02:35:38.140
And everybody's got 3 minutes, use a timer and then.

1376 "Harward, Sonya" (457645056)
02:35:38.140 --> 02:35:43.450
There's time left, they can meet you in the corner somewhere.

1377 "Harward, Sonya" (457645056)
02:35:43.450 --> 02:35:48.490
So, a couple of hours, if if 200 people show up, we're only going to let 10 people.

1378 "Harward, Sonya" (457645056)
02:35:48.490 --> 02:35:53.140
No, no, no, I'm talking about giving a 30 minute window to sign a. Oh, okay.

1379 "Harward, Sonya" (457645056)
02:35:53.140 --> 02:36:03.250
So W, why don't you do, like, you let them sign it from 530 to 6? That's the time. If, if the meetings are to 6 with a maximum of this many people.

1380 "Harward, Sonya" (457645056)
02:36:03.250 --> 02:36:06.730
Yeah, why don't we do it that way? And then that's the time period.

1381 "Harward, Sonya" (457645056)
02:36:12.970 --> 02:36:17.050

We can get all of that set up to help you set all that up too. But, um, is.

1382 "Harward, Sonya" (457645056)

02:36:20.140 --> 02:36:28.180

We'll say 30 minutes before, we'll say, 3 minutes a person, do we want to say a maximum of 90 minutes an hour and a half?

1383 "Harward, Sonya" (457645056)

02:36:28.180 --> 02:36:33.040

Her meeting, or do you want to set it as an hour? I can't see going beyond an hour and a half. Yeah.

1384 "Harward, Sonya" (457645056)

02:36:41.020 --> 02:36:46.150

I mean, I don't mean 60 people, 20 people normally for.

1385 "Harward, Sonya" (457645056)

02:36:46.150 --> 02:36:52.750

That amount of folks that we're trying to draw in and get there it's, you know, we've devoted so much on this. You, you got.

1386 "Harward, Sonya" (457645056)

02:36:52.750 --> 02:36:56.410

Hour and a half, at least up to 2 hours.

1387 "Harward, Sonya" (457645056)

02:36:56.410 --> 02:37:03.550

But, like, they're going to be only got 10 people there may only take an hour to answer everybody's question and then everybody wants to leave or.

1388 "Harward, Sonya" (457645056)

02:37:03.550 --> 02:37:12.040

Or whatever, but I would say a minimum maximum 2 hours, why don't we schedule them for an hour and a half but then based upon what's actually happening? Yeah.

1389 "Harward, Sonya" (457645056)

02:37:12.040 --> 02:37:16.630

Sit there a little longer. Do you need to? I agree. Okay.

1390 "Harward, Sonya" (457645056)

02:37:16.630 --> 02:37:23.020

So, we'll we'll let 30 people sign up. Yes.

1391 "Harward, Sonya" (457645056)

02:37:23.020 --> 02:37:32.050

Or, do you want to say 20 people when there's questions? Because, I mean, it sounds like you're going to be responding to questions, or are you just taking a.

1392 "Harward, Sonya" (457645056)

02:37:32.050 --> 02:37:35.680

Comment there we go, so we'll say 30, 30 people, 3 minutes of.

1393 "Harward, Sonya" (457645056)

02:37:38.710 --> 02:37:44.230

Okay, did you, um, well, okay, good. Thank you. Sorry.

1394 "Harward, Sonya" (457645056)

02:37:44.230 --> 02:37:49.870

No, no, please, sir. No, it's, it's up to you. Not us no, I was just trying to.

1395 "Harward, Sonya" (457645056)

02:37:49.870 --> 02:37:53.770

Deal with the question of the question of whether or not taking questions.

1396 "Harward, Sonya" (457645056)
02:37:53.770 --> 02:37:58.870
And again, I think you all have to be the ones to sort of guide on that.

1397 "Harward, Sonya" (457645056)
02:38:03.130 --> 02:38:12.910
I don't know what you all are used to, or what what people expect. Okay.
There we go.

1398 "Harward, Sonya" (457645056)
02:38:12.910 --> 02:38:24.340
Okay, you know, 1 of the things, I don't know that I would take
questions. And the reason why is because I think what we're trying to do
is gauge gauge the problems of what the people have.

1399 "Harward, Sonya" (457645056)
02:38:24.340 --> 02:38:30.040
They're going to present them to us and then we're gonna come back and if
we still need data from.

1400 "Harward, Sonya" (457645056)
02:38:30.040 --> 02:38:36.910
Dr combs and the rest of those folks, we pull that gap, but I don't think
we're ready to answer questions. We are not.

1401 "Harward, Sonya" (457645056)
02:38:36.910 --> 02:38:42.220
Anywhere near ready now I, I absolutely.

1402 "Harward, Sonya" (457645056)
02:38:42.220 --> 02:38:45.490
Bring their questions, but for me to answer.

1403 "Harward, Sonya" (457645056)
02:38:48.520 --> 02:38:50.165
D. D. I agree.

1404 "Harward, Sonya" (457645056)
02:39:08.520 --> 02:39:16.210
Want to put on the agenda, kind of wrap up any suggestions as to the next
meeting. I think we'll.

1405 "Harward, Sonya" (457645056)
02:39:16.210 --> 02:39:22.840
Try to no, it's on. I mean, I may not be speaking into it, but.

1406 "Harward, Sonya" (457645056)
02:39:22.840 --> 02:39:27.730
I think we'll try for the next meeting to have excuse me.

1407 "Harward, Sonya" (457645056)
02:39:27.730 --> 02:39:34.990
Officials present or questions, but other than that, I don't know. Uh,
Dr, whether you have any.

1408 "Harward, Sonya" (457645056)
02:39:34.990 --> 02:39:38.350
Additional data, uh, I guess Paul's gone.

1409 "Harward, Sonya" (457645056)
02:39:38.350 --> 02:39:43.960
Um, but do you know whether or not you all are working on any additional
data that you think you might be presenting?

1410 "Harward, Sonya" (457645056)
02:39:47.950 --> 02:39:51.850
And clean some things up, but there's nothing really outstanding other
than.

1411 "Harward, Sonya" (457645056)
02:39:51.850 --> 02:39:55.240
Okay, good. So we'll assume that.

1412 "Harward, Sonya" (457645056)
02:39:59.140 --> 02:40:03.040
Provision from here, we can get to to, to talk.

1413 "Harward, Sonya" (457645056)
02:40:03.040 --> 02:40:06.850
I I took the note about the mayor's office. I think there was some mentioned.

1414 "Harward, Sonya" (457645056)
02:40:06.850 --> 02:40:13.150
Specific individuals who had functions EMS, emergency services. I heard.

1415 "Harward, Sonya" (457645056)
02:40:13.150 --> 02:40:16.930
I suppose it may be appropriate to have somebody from public works. I don't know. But.

1416 "Harward, Sonya" (457645056)
02:40:16.930 --> 02:40:21.280
We'll see, um, but I think we're done.

1417 "Harward, Sonya" (457645056)
02:40:21.280 --> 02:40:27.490
Unless somebody in the interim says, we think that jokes or.

1418 "Harward, Sonya" (457645056)
02:40:27.490 --> 02:40:30.940
Joe should come and talk thanks. Everybody.

1419 "Harward, Sonya" (457645056)
02:40:31.235 --> 02:40:31.805
Richard.
