**DISCLAIMER:** The Lead Safe Louisville Project addresses every lead hazard identified by a state-licensed independent environmental hazard assessment contractor. Louisville Metro Government, through the Department of Family Services, Housing and Community Development Division, assumes no liability or responsibility for the veracity of the test results, nor the classification of the housing as either "Lead Safe" or "Lead Free". While Louisville Metro Government has no reason to suspect that the determinations of Lead Safe and/or Lead Free are incorrect, it assumes no liability for personal injury, damages, claims, costs, expenses, losses, fees, expenses of any kind or nature arising out of the occupancy of the units listed in the registry.

Although the lead-based paint hazards—including lead dust contamination—are cleared on the date of a final inspection, there is always the possibility that lead-based paint surfaces can be re-damaged. You are encouraged to immediately report any evidence of the presence of any lead found in an improper condition, within the listed units, to both the owners of the housing and the Louisville Metro Government, Department of Housing & Family Services, Housing & Community Development Division (502-574-3107).
