Re: **Soil/Sediment Sampling Report Closure Option A**
Agency Interest Number (AI #): 104421
Chickasaw Park
1200 Southwestern Parkway
Louisville, KY 40211
Jefferson County

Dear Ms. Smith:

The Kentucky Division of Waste Management (KDWM), Superfund Branch, has received a copy of the *Soil/Sediment Sampling Report* dated May 10, 2019 for Chickasaw Park. The Superfund Branch has reviewed the report and agrees with the conclusions.

The Superfund Branch has determined that the site is in compliance with KRS 224.01-400(18)(a) and 401 KAR 100:030 Section 8(3)(a) concerning the specific release(s) identified and addressed at the above referenced site. Therefore, no further action is necessary at this time with regards to the above-referenced incident. This determination is based on data and information submitted and reviewed concerning the site characterization and investigatory work performed by ATC Group Services on behalf of Louisville Metro Government that warranties, guarantees, and assures that contaminants of concern impacting environmental media do not exceed target risk levels for unrestricted land use and do not otherwise pose a threat nor increase the impacts of on human health and the natural resources of the Commonwealth of Kentucky, or expose the public and environment to harm.

In issuing this Notice of Completion Option A (No Action Necessary), the Division reserves all rights and authority it has to require additional characterization, assessment of risk, remedial action and/or other actions necessary to protect public health and the environment if the Superfund Branch determines there is a need for additional information or further developments warrant them in accordance with

KRS 224.1-400 and 401 KAR 100:030. Nothing in this concurrence shall preclude the Superfund Branch from exercising any administrative, legal and equitable remedies available to require additional response actions in the event that: (1) previously unknown or undetected conditions arise at the Site, or (2) the Superfund Branch receives additional information not previously available that would otherwise impact or affect the Superfund Branch's issuance of this Notice of Completion Option A (No Action Necessary) determination.

The Commonwealth of Kentucky is committed to the protection of human health and the environment, and the safe and productive reuse of sites and properties on which releases have occurred or there is the perceived presence of releases. The Superfund Branch appreciates your efforts to protect human health, safety, and the environment. If you have any questions or comments concerning this determination please contact me at 502-564-6716 or 502-782-6574.

Sincerely,

Brent Cary, P.G. 162898
Geologist III
Superfund Branch
