

# NEW

## IPS COIN & CARD PARKING METERS

### Presenting SmartMeters

### Parking made stress-free

Park with one easy swipe. Presenting new SmartMeters in Downtown Louisville, KY.

The City of Louisville is installing new card and coin accepting parking meters downtown to provide more payment options for customers. These new meters are solar powered and help minimize our carbon footprint, while providing valuable data for the City to evaluate future parking design.

# HOW TO USE THE COIN AND CARD PARKING METER

## Illuminated display

View parking rate, hours, time limit, and other important information.

## Keypad

Press [+ ] to add time, [- ] to subtract and [OK] to approve amount. [Cancel] voids the transaction.

## Follow these easy steps:

Look at the SmartMeter's lit display to find parking rates, hours, time limits and other pertinent information

Insert then remove your debit/credit card. We accept Visa, MasterCard, Discover or American Express

With the blue [+ ] or [- ] buttons, select your payment amount

Press green [OK] button to confirm your payment, or red [CANCEL] button to stop your transaction. The meter will attempt to authorize the payment shown on the screen if neither button is pressed after 35 seconds

Wait for authorization of the card

When approved, the display will then show the amount of paid time and when the meter will expire. If declined, the meter will request a different card

The display will show how much \$\$\$ is charged to the card in total. And the meter goes back to the standard information screens

Or just pay with coins!
