

# North Park Use Area Enhancements

The proposed North Park Use Area improvements include both active and passive recreation opportunities. The passive recreation area includes a formal multipurpose lawn for civic events and gatherings, a new shelter, and a nature-oriented playground. The active recreation area includes basketball and tennis courts, a picnic area, and recreational features for teens and adults. A new nature education center next to the lake provides space for educational displays and meetings. New trails connect all of these features in a cohesive network. The existing Cross Country trail remains with some modifications to accommodate other site features.

Total Spaces: 165 Cars & 13 Trailers

## Key Features
